VOL. XIII

DESERONTO, ONT., FRIDAY, JULY 5, 1895.

NO. 42

Anything we can do for You?—We address this question to every reader of this paper, whether they live in Kingston or a hundred miles away from it. We are selling Dry Goods—not only dress stuffs but dry goods of many kinds. Ours is a store of many departments, each of them under the guiding hands of experts in their line. The store is conducted on a modern scale and offers the buyer every inducement their line. There are no goods made that are any better than the lines we carry. There are no prices quoted on first-class stock lower than ours.

Dry Goods by Mail.—We offer out-of-town folks superior advantages for buying by mail. We execute every order entrusted to us promptly, carefully and faithfully. People living many miles away can shop with us as pleasantly and profitably as the people who come to the store.

Send us your orders for anything you may need. State explicitly what you want, and if it is not in our stock we will make every endeavor to get it for you.

Stacey & Stacey
DRY GOODS IMPORTERS

106 & 108 PRINCESS STREET, KINGSTON.

We deliver all orders free of postage charges. Send money by P. O. Order or Registered Mail.

Address a Postal Card to

C. B. SCANTLEBURY,
Belleville,

The WALL PAPER KING of Canada.

Then write upon the other side:

Dear Sir,—
Please send me samples of Wall Paper suitable for (mention rooms) and not to exceed (mention price) per single roll. I saw your advertisement in (mention paper).
Yours truly,

YOU will receive by return mail samples of Wall Paper suitable for any kind of a home, and which we positively guarantee better, and lower in price than any other house in Canada. The samples will be large and in sets comprising Wall Paper and Border, and will enable you to make a selection for an entire house as you sit by your own fire and with your friends to assist in the selection.

You have absolutely no responsibility in the matter—you simply write the postal as above and we do all the rest—send you samples enclosing order blanks, a guide "How to Paper or Economy in House Decoration," showing how to estimate the quantities required for the different rooms, and directions for ordering, etc., in fact we entirely relieve you of the trouble and anxiety of Wall Paper shopping.

Our Mail Order Department reaches throughout the Dominion. We pay the express charges on all orders of a reasonable size. Full instructions with samples.

PHAEONS, BUGGIES, CARTS AND TRAPS

—Of all kinds go to—

John Finnegan and Son,

BELLEVILLE.

NOTE.—Steel Tubular Axle Wagons.

FOXBORO.

Wm. Falconer attended the C. E. Convention in Deseronto.
The dry weather is causing much anxiety and farmers are discouraged.
The village is full of visitors.
Miss McKee, one of the teachers, will spend the holidays in Montreal and Prince Edward Island.

A number of our sporting men took to the races at Niagara.
Great interest is manifested in the Manitoba school question.

MARYSVILLE.

T. Hurley and sister, of Thurlow, were the guests of Miss Anderson on Sunday.
J. E. Ryan and T. H. Fort attended the entrance examination in Deseronto last week.
Miss Mary Curry is attending the primary examination at the same place this week. We wish her success.
A number from this vicinity took to the races in Niagara on July 1st and 2nd.

Messrs. McNeil and Ryan visited Read on Sunday.
The material for the vault at St. Mary's cemetery has been placed on the grounds and we expect it to be soon completed, the money requisite for it being donated by the late C. P. Lyman, as was likewise that for the bell.
Miss Agnes Drucoll, of Deseronto, and Miss Matel Ryan, of Belleville, spent a few days at their respective homes last week.

Mrs. J. Fahy, of the Marysville House, is under medical treatment in Belleville hospital for the past two weeks.
On Sunday last, Mrs. J. Drummond had a cactus blossomed which has in all one hundred and eighty blossoms but only about a dozen are fully developed as yet. Miss Oliver has also a most beautiful one, the blossoms being larger and prettier, but fewer in number.

Miss E. Asselstine, of Marlboro, is visiting friends here.

SHANNONVILLE.

Mr. A. McAllister, of Pt. St. Charles, Que., who has been visiting at his home returned to his employment on Monday last.
Mrs. Dr. Hudson, of Keolin, has been visiting her sister, Miss Maud Earle, during the past week.

Mr. Alex. Findlay, of Springfield, London, is the guest of her father, A. B. Randall.
Mr. John Mayell, who was in Belleville writing on the recent examinations, returned home on Monday.

Mr. & Mrs. Jas. Kerr spent Monday last at Niagara.

Mr. & Mrs. Archer, Deseronto, were visiting their brother, Mr. A. Stratton, this week.
Mr. Harry Earle, Belleville, spent the 1st at home.

Mrs. E. M. Lake and children are visiting her sister, Mrs. Anderson, of Deseronto.

TYENDINAGA RESERVE.

L. O. L. No. 99, will turn out in full force for services at St. Johns Church on Sunday afternoon next.

The Division School Pique on Saturday 29th June was in every sense a grand success. Pupils and their parents are pleased to hear that Miss Gordon will return after the vacation.

The shields of the Band met on Wednesday at the Council House for the transaction of important business which had been laid over from last month.

A picnic to celebrate Dominion Day was held at Eagles Nest at which there was plenty of firewater and many sore heads. It is time an example was made of some of the law breakers.

The Muhawk Orangemen will appear in a new uniform at the celebration of the 12th of July in Belleville.

The venerable Missionary celebrates his 70th birthday today, the 5th July.

CONWAY.

The farmers in this vicinity are all busy in their meadows. The hay crops are very light owing to so much dry weather and the pastures are also getting very bare.

Mr. & Mrs. Ham, of Kansas City, are the guests of George Ham, Esq., also Mr. Vrooman, of Valer, is visiting at the same place.

Miss S. Shorey spent Friday and Saturday with her mother, Mrs. W. H. McDonald, Esq., made a flying visit to Stella and Emerald last Friday.

J. S. Neilson, Esq., and family passed down on the Erie last Friday on their way home after spending a few days at friends at Port Hope.

W. H. Wright will feel very proud now when he gets talking about "that boy of mine."

Mr. & Mrs. R. Phippen are spending a few days with friends at Sydenham.

Messrs. Haylock Bros., of Pictou, have been freshening up the residence of Robt. Neilson, Esq., with paper, paint and varnish.

The Presbyterians held a strawberry festival in the hall at Belleville last Thursday night which was a success.

Mrs. Wm. McKeever arrived home last week after spending a few days with friends in Belleville.

DEMORESTVILLE.

Miss Maud Lambly, of Bloomfield, is visiting at Dr. Cryan's.

The service was well attended at the Methodist church on Sunday evening.

Wm. McGinnis is at the Kingston hospital to have an operation on his eyes.

Miss H. Cryan and Mr. F. Wilson were married on Thursday last at the home of the bride, after which they left for Old Orchard Beach.

The Misses Gordon are spending a short time among friends at Pictou and Waupoos.

Orrin De Shaw, Jr., has moved to the village.

The Sunday Schools of this place propose having their annual excursion at a date not far distant.

Mr. & Mrs. S. Palmer spent Saturday and Sunday at Robt's Mills.

James Gordon was a guest at H. R. Barrie on Sunday last.

Miss Julia Gordon, of Tweed, is stopping with her brother, Nelson Gordon for a short time.

Mrs. R. S. Holmes, of Montreal, is spending a few weeks in her native village.

Miss Alice Mills, of Toronto, is visiting her parents for a short time.

T. Leslie and sister, of Northport, attended service here on Sunday evening.

HILLIER.

The drought continues and farmers are in anything but a happy state of mind.
A great many took to the big day at Pictou on Monday. Sorry to see so many drunken soldiers, a disgrace to their uniforms.
John Napier, nurse the loss of his faithful hound which was scalded by parties unknown.

Our troops have returned home from the camp at Kingston. All had a good time.
Some early have been cut, but the yield is not all an average.

BLESSINGTON.

The farmers have very little trouble with hay in this part as the crop is very light.
The people who attended the Workmen's excursion last week for here were very much pleased with the trip.

I. Robinson raised his new barn on Friday and it now enclosed.

Eugene Badger and sisters, of Melrose, visited here on Sunday.

Miss Gerlie Mills, of Belleville, is visiting at Mr. Ross' home.

Messrs. M. Robinson and Daisy Phillips attended the examinations at Belleville last week.

Mr. Ira Lonsing, of Huntingdon, visited friends here last week.

Misses Ida and Jessie Sherman are now home from the neighborhood.

Quite a number of our young folks attended the picnic in Mr. Hanley's grove last Wednesday.

Mr. Andrew Denke, Jr., left for Clinton on Tuesday to take up his abode there in future.

Andrew will be much missed by one and all. Miss Bertha Denke has gone to her home in Shiring for the summer holidays.

Miss Edith Leslie has been in our section sewing for the past week.

Rev. Mr. Garth proposes organizing an Epworth League for our young people in the near future.

Mr. & Mrs. J. Robinson and Blanch attended the lawn social on Thirteenth last Monday.

The cherry season has now arrived and with it the usual number of "night birds" but they don't disturb the neighbors much as they seem to be a quiet species.

Miss Hattie Gowden visited at Mr. J. Robinson's last week.

Miss Clara Bowden has returned home after spending a few days at Mr. D. Beatty's.

CANADA HAS ALL THE NICKEL.
And This May Give Her Control of the Shipbuilding Industry.

"When nickel steel comes into general use for the construction of vessels, as it undoubtedly will," said a Canadian gentleman at the Great Northern, the other day, "Canada will, in a sense, control the shipbuilding industry, because, so far as is at present known, there is very little nickel outside of the Dominion, while we have nickel bearing pyrites practically without limit. That whole vast stretch of territory reaching from Lake Superior to Labrador is rich in it and will produce hundreds of thousands of tons of it annually for an unlimited period whenever the demand requires it."

"How will this control the shipbuilding industry?" asked in this way. It has been demonstrated by conclusive test at your proving grounds at Sandy Hook and elsewhere that steel mixed with say five per cent. of nickel is stronger than ordinary steel. In the construction of man-of-war the advantage is obvious and in building merchant vessels it is equally plain, as it will enable them to be built much lighter than they are now, which means less coal and less man power with an equal amount of security and equal amount of speed. It will only be a few years when a wooden vessel in the port of Chicago will be a commonplace of a novelty and the new vessels will before very long, for the reasons indicated, be made of nickel-steel and this will be the only means by which the purpose of a great shipbuilding yards in Cleveland, Detroit, South Chicago and other points.

Another advantage which steel having nickel in its composition possesses over ordinary steel is that it will not corrode and that barnacles cannot get a foothold on it, so that nickel-steel ships at bottom will never require to be scraped."—Times Herald.

Magic Liquid.

Much amusement may be afforded, at a party by pouring out of the same bottle a liquid which assumes three different colors. This is how it is done: Steep logwood shavings which may be bought at any drug store in water, and when a good red color has been obtained pour the liquid into a wine bottle. Take three tumblers and, without being observed, rinse one of them out with strong vinegar; put a little powdered alum into the second and leave the third without any preparation. Pour the liquid stirred with a bright key or any piece of iron which has been previously dipped in strong vinegar; pour into the first tumbler, and the red liquid will assume a violet tint.

Edicated Soldiers.

It speaks well for the German army that of the 250,000 recruits who joined the colors in 1894 there were only 617 who could not read or write. According to the official reports issued at Paris no less than 25,000 were ignorant of these elements of education among the 910,000 conscripts who joined the French army during the same period. At Lisbon—admittedly far from being a cultured town or city in Portugal—more than half of the population can neither read nor write.

New Species of Ape.

The Zoological Gardens at Berlin have just been informed that a bright red ape was seen before in Europe. It is of the orang-outang species, and of a bright red color, with black neck and a remarkable hooked nose. The inhabitants of Sumatra are said to regard it with superstitious reverence. It is alleged that these apes can smell their larynxes to an enormous extent, uttering loud sounds which cannot be described in words.

DISTRICT ITEMS.

Belleville postal authorities are asking \$2 for boxes and people refuse to pay such a large amount.

Belleville reports 11 births, 6 marriages and 10 deaths for June.

George Tice, stage driver, looking at the races at Robt's Mills, throws from his buggy and seriously injured.

Belleville's imports last month show an increase of \$7,010, and exports a decrease of \$80,000 as compared with the same month of last year.

Dr. T. W. Jeffs, of Queensboro, and Miss Cave, of Toronto, were married last week.

Mrs. Henry Sweet, formerly of Trenton, died at Duluth, aged 35.

NEWS OF THE DAY.

Prince Bismarck's health is very unsatisfactory.

A Big Polist farmer, Mr. Wm. Emery, committed suicide by taking Paris green.

The jury at Saint St. Marie disagreed in the case of Louis Savia, on trial for murder.

A laborer in Dublin was blown to pieces by a tin canister he picked up on Boyne street.

Lord Salisbury's Cabinet now consists of thirteen members, and is the largest ever formed in Great Britain.

The International Intercollegiate cricket match closed at Philadelphia with a victory for the United States.

Delegates to the International Railway Congress met in London, will go Windsor to pay their respects to her Majesty.

Mr. F. G. Wallace, formerly of Toronto, was seen at Beauport, Quebec, while swimming out to rescue his son, who was adrift in a boat. He will be buried here.

Mr. Walker and a young lady of London were driving across the Northern and Northwestern R.R. when a train killed the horse and smashed the buggy. The occupants were not hurt.

METHODIST CHURCH.

Rev. R. Taylor conducted the services last Sunday.

Rev. E. N. Baker, M. A., B. D., of Belleville, will occupy the pulpit at both services next Sunday. Rev. Taylor will preach in Bridge Street church, Belleville, on that day.

Great preparations are being made for the Sunday school picnic which will be held on the 17th.

ST. MARK'S CHURCH NOTES.

A meeting of the Brotherhood of St. Andrew will be held on Thursday, July 11th, in order to consider plans for the work of the summer and autumn months.

A large attendance at the picnic at the ice-cream social to be given by the ladies' aid on Wednesday evening. A pretty feature will be the so-called fair.

Rev. J. H. Coleman is in Kingston this week.

Rev. H. B. Patton is now well started in his new field of work in Prescott. Rural Dean Carey of Kingston was in Prescott on Wednesday of last week, and reports a very satisfactory condition of the parish. He says that both the congregation and his new rectory are well pleased.

The health of the Archbishop of Ontario shows much improvement.

HIGH SCHOOL PROMOTION.

FROM FIRST FORM TO SECOND FORM.
Fifty required to pass—Lorne Oliver 80, Ed. Brown 73, Edith Scott 73, Aggie Stevenson 73, Annie Johnson 72, Gerlie Kent 72, George Morrison 70, Emma Anderson 70, Alice MacGaughey 65, Tess Edwards 64, Stella Holmes 65, Jessie Gordon 64, Annie Cannon 58, Edith Allison 67, Frank Clark 56, John Hays 56, Lulu O'Connor 51, Leah Nasmith 50, Fred O'Connor 48, Ethel Edgar 47, Edgar Chapman 44, Robert Nasmith 40.

OBITUARY.

It is with no ordinary feelings of regret that we chronicle the lamented death of Frank Daniel Clement, one of the most respected residents of the town. The deceased had suffered during the winter from an attack of the grippe which, although it left some traces, was in time overcome. Nine or ten weeks ago he caught cold which was followed by an attack of mild malaria or typhoid fever. From this he did not recover as rapidly as expected and though able to do about his usual work, it was thought a change would be beneficial and he went down to spend a few weeks at Portmouth where he suffered a relapse. While there he suffered a relapse and in spite of everything that medical skill could suggest he gradually grew weaker and finally died.

Mr. Clement was about 40 years of age, a powerful looking man and that such a person should have been cut off was a painful surprise. He was married Miss Janet Croft, of Portmouth, by whom and one son he is survived. The remains were brought to Belleville on Tuesday afternoon. The funeral took place on Wednesday afternoon, religious services being conducted at the house by Rev. R. Taylor, assisted by Rev. W. S. McTavish. A large concourse of friends had assembled to pay the last tribute of respect. The bearers were Messrs. Richardson, Messrs. George Gwynny, A. S. Vallee, R. N. Irvine and E. W. Scott. The remains were interred in the family plot in the Fairview cemetery.

The widow and her boy have the sympathy of a wide circle of friends in this great affliction.

WOULD NOT BE WITHOUT IT UNDER ANY CIRCUMSTANCES.

Douglas Bro. & Co., Napawee, Ont.:
Dear Sirs.—During years 1890-91, I was troubled with a large skin growing on the right side of my neck near the ear. Had consulted several physicians and used every remedy, but it did not go away. I told to use Douglas' Egyptian Lintment. I did, and before I had used half a twenty-five cent bottle it was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. It can make any kind of its value until he has used it. I believe anyone who has used it would not be without it under any circumstances.

Respectfully yours,
NATHANIEL W. REID,
Enterprise P. O.

STRAWBERRY FESTIVAL.
A very successful strawberry festival under the auspices of the Royal Templars of Temperance of Northport was held on Wednesday, 24th, at the residence of Manly R. Way. Although the weather was unfavorable the large attendance was both packed with a large assembly, representatives being present from Deseronto, Pictou, the Belairs and other places. Among other presents from Deseronto were J. M. Smith, R. Miller, D. W. Dart, Mr. and Mrs. G. Bradshaw, F. Butler, etc., and a large quantity of ice cream, cake and other seasonable delicacies were dispensed in apparently unlimited quantities. Addresses, music, good fellowship and a happy time generally. The Northport Templars are excellent entertainers and the whole affair was creditable to all concerned.

HAVE YOU SEEN THEM?
Our large assortment of boys' blazers. We have something to please the most fastidious mother at very reasonable prices. Your inspection is invited. Gough the Cistler, Belleville.

FLOWER SERVICE.
The annual "Flower" service of the Presbyterian Sunday school was held in the Church of the Redeemer last Sunday afternoon. The service was held in the church in procession from the school room to the church all wearing bouquets of pretty flowers. The church festival was a very successful one. A large concourse of people was present. The service was given by Jessie Graham. "Why did God make the flowers?" an interesting selection was given by six little girls, Helen Hampton, Lena Davies, Lily Barr, Lena Monaghan, Eva Cook and Gerlie Gordon, led by Miss Nellie Gammon. A pretty vocal solo "Ever Looking Upward" was sweetly sung by a boy rendered recitation by Cora Bruyes. An exercise entitled "How Children are Saved" was given by the same group. "The Happy Song," led by the choir, the school joining in the chorus, was then sung. G. W. Wright took a solo and Mrs. Dart and Miss Huff a duet during the singing of this selection. "The Message of Nature," in which Jessie Montgomery, Lottie Cronk, Mabel McGraw, Kitty Hall, Elsie Loggatt, Anna Dalton and Elsie Among the flowers was the next selection. A recitation "Little Girls" by Emma Cook, followed by a song "The Flowers" then sung with great effect. Rev. W. S. McTavish, being called upon, delivered a very happy address which was listened to with great pleasure and attention. All present were very happy and gave a few closing remarks and the chorus "Sowing the Seed," was then sung and the service closed. The service was given by the teachers and pupils for the different exercises. Floral contributions were collected and sent to the sick, etc. The service was in every respect of a bright and profitable character.

LADIES OF DESERONTO.
Our assortment of ladies' oxford shoes, in color and black, at a much superior to any we have ever had. We have taken special care in selecting goods for this department. Call and inspect them when in Napawee or Belleville. Prices range from \$6.00 upwards, an extra quality shoe for \$10.00. Haines & Looket, 410 streets.

DESERONTO NEWS COY OUR JOBBING DEPARTMENT

Is replete with an abundant supply of new type and printing material. We are located in a position to execute fine job printing in all its branches in first class style and at rates to suit the times. Send for our price list. Orders by mail will receive our prompt and careful attention.

DISTRICT ITEMS.

United States treasury returns for the month of June 30 show a deficit of \$2,925,000.

Sir Charles Tupper gave a largely attended party in London in honor of Dominion Day.

The Canadian sealer Sala has been seized in Behring Sea by an American revenue cutter.

Chatham, the youngest city in the Province, celebrated its admission to that status Monday.

The statue of Sir John Macdonald, erected to his memory by the nation, was unveiled at Ottawa.

There was a break in the price of wheat in Chicago Monday and September closed 1-4 cent lower.

Cyclist John S. Johnson rode a mile at Island Track Monday in 1:59 1-2, the fastest ever made in a race.

The Toronto yacht Vedette won the Queen's Cup in the race off Hamilton Monday. Twenty-three yachts started.

The seizure of Dominion Day in Montreal was the unveiling of a statue to De Meillon, the founder of the city.

Rev. O. C. S. Wallace, pastor of St. George's Baptist church, Toronto, has accepted the Chairmanship of McMaster University.

Owner Jos. Duggan, trainer Chas. Ray for the alleged inconsistent running of the horse.

Mr. Gerald Ballou, a nephew of Lord Salisbury, and brother of Mr. A. J. Ballou, has, it is stated, been appointed Chief Secretary for Ireland.

Extra guards have been placed on duty at the Toronto jail, owing to a rumour that some attempt might be made to assist a prisoner awaiting extradition to escape.

The Queen appears to have taken a new lease of life. Her activity and her energy are surprising her entourage. Her interest in the change of Ministry is very keen.

Ald. Patrick Kennedy, of Montreal, and the representative of Montreal at the Quebec Legislature, died about midnight on Saturday night. He was one of the most able lawyers and most respected of Montreal's citizens.

Cold in the head—Neal Balm gives instant relief; speedily cures. Never fails.

BETWEEN LIFE AND DEATH. THE NARROW ESCAPE OF A WELL KNOWN NEWBURGH MAN.

BY THE LOSS OF A FINGER MR. CHAS. MOORE OF THAT VILLAGE NEARLY DROVE DOWN, BUT HE RESCUED AFTER DOCTORS HAD FAILED.

In the pleasant little village of Newburgh, on the Bay of Quinte, a few miles from Newburgh, lives Mr. C. H. Moore and family. They are favorably known throughout the entire section, having been residents of Newburgh for years. Recently Mr. Moore has undergone a terrible sickness, and his restoration to health was the talk of the village and many a home in Napanee and vicinity heard of it, and the result was an accident that caused him the loss of the forefinger of the right hand. It was following this accident that his sickness began. He lost flesh, was pale, suffered from dizziness to the extent that sometimes he could scarcely avoid falling. He consulted physicians and tried numerous medicines, but without any benefit. He was completely growing worse and the physician seemed puzzled, and one of his friends thought he would recover. One day a neighbor urged Mr. Moore to persuade his husband to give Dr. Williams' Pink Pills a trial, and after much persuasion he consented. After a few days he began to feel better, and it no longer needed persuasion to induce him to continue the treatment. A marvelous change came over him. Each day he seemed to gather new strength and new life, and after eight boxes had been taken, he found himself again a new man. Mr. Moore is now about sixty-five years of age, he has been healthy and has worked hard all his life until the sickness alluded to, and now, after taking Dr. Williams' Pink Pills, he is once more able to work in his accustomed way, and does not hesitate to give the credit to the medicine that restored him to health at a cost no greater than a couple of visits to the doctor.

Time and again it has been proved that Dr. Williams' Pink Pills are the best that physicians and other medicines fail. No other medicine has such a wonderful record, and no other medicine gives such undoubted proofs of the gentleness of every cure published, and this accounts for the fact that go where you will hear nothing but words of praise for Dr. Williams' Pink Pills. This great reputation also accounts for the fact that unscrupulous dealers here and there try to impose a bulk pill upon their customers with the claim that it is "just as good," while a host of imitators are putting up pills in packages somewhat similar in style in the hope that they will reap the benefit of the merit of the genuine Pink Pills. No matter what any dealer says no pill is genuine unless it bears the full trade mark, "Dr. Williams' Pink Pills for Pale People," and the name of Dr. J. C. Williams, Newburgh, N. Y., and always refuse substitutes which are worthless and may be dangerous.—Napanee Beaver.

Just having killed an immense bull buffalo, and sent the meat to market makes me think more forcibly that ever that the Galloway is to take the place of the extinct buffalo. Having in the ten years between 1875 and 1885 tanned nearly 300,000 buffalo hides into buskins, robes, and more than any other man, living or dead, I think I know where I speak when I say the Galloways and their grades furnish the robes equal to the famous robes of years ago.

Any one can tan them equal to the best Indian tanning. The squaws did that work entirely. One day when the hunt was going on the squaw at once stretched out the robe on four poles quick, and in freezing weather they were ready to be made into buskins, robes, and more than any other man, living or dead, I think I know where I speak when I say the Galloways and their grades furnish the robes equal to the famous robes of years ago.

NEW STROKE CURE. FORMER METHODS DISCARDED FOR ICE WATER BATHS.

The Patient is Handled Swiftly by Novel Appliances and Submerged in Ice—This Reduces the Temperature of the Body and Saves His Life.

Richard Collins was the first patient to test the new stroke apparatus in the House of Relief in Hudson street, New York. It proved a complete success.

The apparatus, which was designed by Dr. Louis A. Stimson, the house surgeon, is operated by electricity. From the moment a patient arrives until he is on the high road to recovery, he is lifted and carried about and laid down by electric force. Not only is this more gentle for the patient, but it saves the strength of the employees, especially if the patient is a big man. The method of treating strokes has been completely changed of late. Formerly hot cloths and plasters were applied to the extremities to draw the blood from the head and so reduce the temperature. Ice water baths form the basis of the new cure.

Both the apparatus and the method of treatment can best be described by taking Collins' case. He is an Irishman, 54 years old. He was taken to the hospital, and he was laid down in a building and accepted it, though he was not fit for such heavy labor, and in no condition to stand such heavy work as he was now required to do.

He suffered much that day, but kept at his work. About two o'clock he began to stagger and suddenly fell unconscious. An ambulance was called, and the wayman saw it was a case of stroke, so he hurried his patient to the House of Relief.

By the time he reached the hospital his temperature had reached 102 degrees. He was carried to the operating room. Here he was carefully rolled into a hammock. This hammock, supported by two iron bars on the sides, as if the man were lying in a blanket. The head is kept a little higher than the feet. The bars connect with an electric crane, which will carry 600 pounds, running on a track fastened to the roof. A switch in the wall turns on the machinery, and the hammock, with Collins in it, was lifted from the floor. It was guided across the room and stopped over a tub filled with ice water, which was another tub containing big chunks of ice.

The hammock was lowered, and Collins was soon immersed in the tub of ice water. With this, the patient's head, the temperature of the body began to fall. In half an hour it had gone down several degrees, though still above normal, and the patient was conscious. The signal was given, and the electricity turned on and Collins lifted out of his icy bath.

This time therefore was kept on, and the patient was kept in the tub for a few minutes. A peculiar tent has been erected. It is of iron, and in fact, a wire tent surrounded with a strong iron wire and covered with a thick layer of insulation. The patient is placed in the tent, and the wayman, standing every box. Always refuse substitutes which are worthless and may be dangerous.—Napanee Beaver.

Just having killed an immense bull buffalo, and sent the meat to market makes me think more forcibly that ever that the Galloway is to take the place of the extinct buffalo. Having in the ten years between 1875 and 1885 tanned nearly 300,000 buffalo hides into buskins, robes, and more than any other man, living or dead, I think I know where I speak when I say the Galloways and their grades furnish the robes equal to the famous robes of years ago.

A SEASON Of Dread and Fear for Thousands of People.

If You Would Banish the Blues
and all your other distresses

Use Paine's Celery
Compound.

Yes, this is just the season when we hear men and women lamenting about their health. They find that their physical and mental energy has deserted them, and they are sinking deeply into the pit of despondency. The hot weather invariably produces thousands of miserable feeling mortals. They lack nerve force, strength and vitality. They are easily irritated by dyspepsia, flatulence, biliousness, head trouble, constipation, nervousness and sleeplessness, they cannot rest at day or night, and life becomes a burden heavy and intolerable. The great recuperator, strength and health giver for such weary, worn-out and self-indulgent people is Paine's Celery Compound, now so universally approved by medical men. Paine's Celery Compound in its peculiar composition combines the best of nature's healthy and pure blood, the first essential to perfect health, strength and activity. When the great medium is used in summer, languor, irritability, nervousness and sleeplessness are permanently banished, and men and women go about their duties with a vim, with an energy that indicates health and robustness. Use Paine's Celery Compound at once, if you would enjoy life in the hot weather.

M. Napoleon Garrett.

CURED OF DYSPEPSIA.

A SEVERE CASE CURED BY BIRDOCK BLOOD

BITTERS AFTER OTHER TREATMENT HAD FAILED.

GENTLEMEN—After being treated by three doctors for Dyspepsia I decided to try Birdock Blood Bitters. By the time I had taken two bottles of the B. B. B. I was completely cured and have since been strong and well. When I suffered from dyspepsia I was weak and thin I could hardly walk, but I now weigh over 160 pounds and feel as well as ever I did in my life.

Caplin River, Que.

NEWS OF THE DAY.

Floods did great damage in North Simcoe.

San Francisco was visited by a very destructive fire.

Mr. Seagrave's Mercantile won the Wayne Hotel Handicap at Detroit.

Two children named Schmitt strayed into the river at Paisley and were drowned.

Chick, the Detroit Derby winner, won the Liberty St. Steeple Chase at the Oakley track, Cincinnati.

The recently organized Women's Art Association of Hamilton will have an exhibition of paintings in February next.

Three young men were fined an aggregate of \$30 and sent to Gaol for scratching plate glass windows with a diamond.

It is reported that Mr. John W. Foster will receive a fee of \$250,000 from China for his services in negotiating the treaty of commerce.

The S. S. Augusta Victoria grounded in the new K. W. Wilhelm Canal, but was hoisted off at a delaying traffic for a time.

Mayor Aubrey of Hull, has been found guilty of accepting bribes, and disqualified for seven years and fined about a thousand dollars.

Thomas Bailey of Guelph was found bound the railway track with a number of serious wounds in his head. His recovery is doubtful.

At Lennoxville, Quebec, Mr. J. H. Hall was horribly murdered with a razor by Mark Shivers, a 31st of January, walk. The murderer also cut his own throat and his recovery is doubtful.

The husband of Mrs. Huff was horse-whipped at Winton by a crowd of masked men illustrating his case.

The woman is recovering from the effects of her dose of poison.

Hon. Mr. Mills' amendment in the House in favor of decreased expenditure was defeated by a Government majority of 36.

A fitting on the main steampipe of the whalerboat steamer Christopher Columbus broke down on her trip from Milwaukee to Chicago, and several people were badly scalded.

In his speech at the opening of parliament the Hon. Mr. Queen laid suggests that Great Britain, Canada and Queensland join in laying the Pacific cable if the other countries hesitate.

The Bimballist League of Great Britain has presented a memorial to the Chancellor of the Exchequer, seeking to refute the statements made in a recent memorial by the gold defenders. The Bimballists have some very strong names on their presentment.

The wedding ceremony of Mr. Riland and Miss Labely of Ottawa was hardly finished when it was interrupted that the groom had a wife already. The bride went back to her parents, and is waiting for further developments.

Mr. Kiviat's letter replies to a statement of Hon. Mr. Oulmet to the effect that if the Manitoba Catholics, as Mr. Oulmet implies, are willing to conform to Government regulations and requirements and only want to add religious instruction to their school curriculum, the whole question can easily and quickly be settled.

Fifty years of ancon in our family Diarrhoea, Dysentery, Cholera, Colic, Cramps, bowels completely out of order and full, eat, drink, Dr. Fowler's Extract of Wild Strawberry as the best remedy in the market. It saves children's lives.

A BOGUS AGENT.

The firm of T. Milburn & Co. man's terms of proprietary medicines, have for some time past been in receipt of letters from correspondents in and about Gravelly and Meadowvale, stating that a man has been operating in those districts, representing himself as an agent, and has been peddling medicines from house to house offering them as the medicines—Burdock Blood Bitters—put up by this well-known and reliable firm.

A Globe reporter, having been placed in possession of these statements, called at the office of Messrs. T. Milburn & Co. on the 1st of June, and was shown a number of communications from merchants in the locality, all of whom declared the peddlers the information at first received and as given above.

Not only had his firm been in receipt of communications, Mr. Milburn said, but some of his customers from Peel County had called at the office in Toronto and had informed him that this bogus agent had sold stuff at several houses which had necessitated the calling in of the doctor to treat the members of the families who had used his compounds.

In closing the interview, Mr. Milburn, that head of the firm, said: "We have no such agent, nor do we sell our medicines through peddlers or agents other than druggists and general merchants, and on this account we desire that farmers and others buying our remedies should understand that any person peddling from house to house cannot represent us. They should, therefore, be on their guard against bogus medicines being foisted on them for those of our manufacture. I may say that we are willing to pay any expense incurred by the doctor to detect and conviction of this man, or of anyone falsely representing himself as our agent." Globe, Toronto, June 27.

ITS VALUE PROVED.

OPINIONS EXPRESSED IN QUEBEC WITH REGARD TO THE NEW SPECIFIC.

Quebec, June 3.—There has been considerable discussion in this city, both among the members of the medical fraternity and private citizens, with regard to the numerous undisputed cures from various diseases of the kidneys through the use of Dodd's Kidney Pills. The matter has been not only discussed privately among the friends and acquaintances of those who have received benefits from the use of the remedy, but has been chronicled in the public press. The general consensus of opinion is that the medicine has undergone a thorough trial, and has proved itself fully deserving of the great praise which has been bestowed upon it.

A CHANGE IN THE STATIONS.

The chairmen of the districts in the Bay of Quinte conference met Wednesday last week in the Methodist tabernacle, Belleville. It was decided to change the stations of several of the ministers, as some difficulty had arisen in the appointment of Rev. Jas. Anderson, at Columbus. Mr. Anderson was stationed at Tamworth, and J. J. Rice moved to Belleville North. Rev. Dr. Macdonald, appointed by the conference to Belleville North, was located at South Darlington, and Rev. H. I. Allen goes to Columbus, and Rev. S. G. Rorke to Esquimaux. The changes are understood to be satisfactory to all concerned.

WHY NOT YOU?

When thousands of people are taking Hood's Sarsaparilla to overcome the weakness and languor which are so common at this season, why are you not doing the same? When you know that Hood's Sarsaparilla has power to cure rheumatism, dyspepsia and all diseases caused by impure blood, why do you continue to suffer? Hood's cures others, why not you?

Hood's Pills are prompt and efficient. 25c.

Clothes for the Little Ones.

The warm weather is here, and the children are as sensible of it as the older people, even if they do not make many complaints. Don't make the mistake of loading a child with the exaggerated long frocks of Rick Rack. Give your child to make her look prettiness and attractive to your relatives and friends.

Give her a sensible attire, in which the little maid can scamper over the fields or rocks, and plunge herself into the mud or dirt without being hampered with clothes.

Make them as light and scanty as a sufficient covering will permit, and let her, like her small brother, glory in the abandon and delight of living as nearly like the children of primitive man as all her modern ideas will permit.

"Fine clothes make fine-looking birds," but the little maid in a blue denim garment dress, with a free use of all her limbs is often more interesting, even with discoloured looks and mud-stained fingers, than the plump child with the fine clothes, who must take her exercise in as moderate a way as her elders.

Druggists say that their sales of Hood's Sarsaparilla, especially in all of the above, there is no substitute for Hood's.

MEDICAL TESTIMONY.

During half a century Hood's Cod Liver Oil to be the most necessary thing to take for consumption. But the trouble has been its improper method of preparation for sale. Miller's Emulsion of Cod Liver Oil is the only reliable formula on the market. None but the livers of the Norwegian Cod are used in its preparation. In conjunction with the hypophosphites of lime and soda it has the most wonderful effect on consumptive patients, who, after taking it for a while, see their ribs rise from their beds and enter upon a new lease of life. Miller's Emulsion is the great nerve strengthener, the blood purifier, and cures Coughs, Colds, Bronchitis, and all Lung Affections. In Big Bottles, 50c and \$1. Sold by W. J. Malley and W. G. Egar.

STORIES OF MONTE CARLO.

Some of Them True, Many False, But All

Highly Interesting.

But who should this morning be

told vermouth at the marble table and

old friend whom I will call Mr. Specta-

tor? He lives at Monte Carlo, and has

passed a score of seasons here; he has

plenty of money; he goes to the Casino

every evening, and he never pays a cent.

He is a man of great capacity in

life to be an observer of things and to

mark the ways of man and womanhood.

In the summer he will mark them at

Aix-les-Bains, at Lausanne, or at Trou-

ville. He knows everything about what

is going on just now in Monte Carlo.

He has seen the Russian princess pawn her diamonds

last week, and what Cuban sugar planter

has been at the apoplexy at the Hotel

Carnegie but he will not tell you with pre-

sided alibi. "He was a fool, sir," quoth

Mr. Spectator, "why didn't he go to the

Administration? Why didn't he make

his declaration? They know well enough

that he had lost 200,000 francs in the

course of ten days. They would have

paid his travelling and hotel expenses back

to Paris, or back to Brazil for the matter

of that. He was a fool, sir."

Mr. Spectator, I will explain that

when a cleaned-out player made a candid

admission of his impetuosity the

Administration gave him a sum of

money sufficient to defray his journey by

railway to the place whence he came and

his incidental expenses on route. He

mentioned Mr. Spectator, who was a

family of five persons were allowed

fifteen francs apiece to take them from

Monte Carlo to London, the sole condi-

tion being that the recipient should not re-enter the

Casino unless he or she recaptured the Adminis-

tration for their own good. He was

which he did, and the result was that

he had not gone farther than Nice, re-

ceived some weeks afterwards a handsome

sum of money, and he was back in

Monte Carlo. He was a fool, sir, I

believe," added Mr. Spectator, "a title of

the sensational stories printed about ruined

gamblers hanging round the Casino, and

the general idea of blowing out their

brains in the reading-room. The majority

of these canards are not set on foot by ob-

servation, but by the pen of the writer.

One of the pleasantest characteristics

of Monte Carlo is that every time you

meet him he has a fresh story to tell

you about an infallible system for win-

ning at roulette, and this time he re-

galed me with a most interesting narra-

tive which I will call the "Wellington boot

system." Capt. Backum had played for

many years a large number of systems,

and by the time he was twenty he had

played out a handsome fortune. A

happy thought occurred to him. He al-

ways wore Wellington boots. His capital

was last five francs. He changed his

into five francs, and he never started

more than one place at a time, and if he

won he withdrew his stakes after the

money was paid, and he withdrew his

placed in a side pocket, and whenever

he had won four pieces he changed them

into a large gold piece, and he changed

of his boots. He played for ten days

before his stock capital was exhausted.

Then he returned to Nice, and he

found that he had won four hundred

francs. "This was two years ago," con-

tinued Mr. Spectator, "and he has since

last five francs. He changed his into

five francs, and he never started more

than one place at a time, and if he won

he withdrew his stakes after the money

was paid, and he withdrew his placed in

a side pocket, and whenever he had won

four pieces he changed them into a large

gold piece, and he changed of his boots.

He played for ten days before his stock

capital was exhausted. Then he returned

to Nice, and he found that he had won

four hundred francs. "This was two

years ago," continued Mr. Spectator, "and

he has since last five francs. He changed

his into five francs, and he never started

more than one place at a time, and if he

won he withdrew his stakes after the money

was paid, and he withdrew his placed in

a side pocket, and whenever he had won

four pieces he changed them into a large

gold piece, and he changed of his boots.

He played for ten days before his stock

capital was exhausted. Then he returned

to Nice, and he found that he had won

four hundred francs. "This was two

FRUIT EXPERIMENTS IN ONTARIO.

Result of the First Year's Work in Testing

Varieties.

Already the work of the experiment

stations of Ontario is making itself

appreciated. The first annual report,

which has just been published by the

Ontario Department of Agriculture, has

sixty-four pages of valuable reading mat-

ter and numerous tables showing the

result of the first year's work in testing

varieties. As the secretary says in his

letter of transmittal, it would be impos-

sible to give a full account of the work

for publication this first year were it not

that practical fruit growers of long and

valuable experience in the various lines

have been selected as the experimenters.

These men are able to draw lessons from

the knowledge gained from years of ex-

perience, and will not waste fruit which is

the specialty of each. In this way the

reports from these gentlemen become most

valuable to the country.

Apples.—Mr. W. H. Dempsey, Superin-

tendent of the Bay of Quinte station,

speaks well of the Winter St. Lawrence,

Pewaukee and Ontario apples.

He says the Pewaukee is a large apple

and more productive than the King and

the Ontario. It is one of the most profit-

able apples we have. My own Ontario ap-

PORTLAND CEMENT.

WATER LINE, PORTLAND CEMENT AND Plaster Paris for sale cheap, and full instructions given for use on construction. Write for prices. THE RATHBUN CO.

Mowers, Rakes, Binders

manufactured by the Peter Hamilton Mfg. Co., Peterboro, are without equal in manufacture and work in the field. Because we sell them as cheap at our shop as other agents can sell them, these agents will endeavor to lead you to believe that they are inferior to the machines they are selling. Now, we are in a position to prove to you that the very reverse is the case. We sell in large quantities for cash, and are therefore enabled to sell them at jobber's prices. Come in and examine, or write us for prices. We have the Chicago and Shrew Rakes at \$18.

CARRIAGES AND BICYCLES.

We have hosts of the finest Carriages at prices that cannot be equalled. Five styles Road Carts. Our Up to Date Bicycle at \$55 is the cheapest thing on earth. A few Corn Cultivators left at \$5.50.

H. FOWELL, Belleville.

P.S.—Seven second-hand Buggies and 2 Phaetons for sale cheap.

THE TRAMPS OF THE OCEAN.

Interesting Facts About a Class of Vessels That Are Unpopular.

The ocean tramp is as well known as the land tramp. The ocean tramp is, however, of a very different character from the tramp with whom we are familiar. Although, like its land counterpart, it has no fixed place of abode, but travels about everywhere, it depends for its livelihood upon its own work, instead of upon the contributions of others.

The ocean tramp is a steamship, says Golden Days. They are so called from their willingness to go anywhere and take a hand in any trade that promises them a profit. Scores of them may be seen at any shipping port, from New York, Philadelphia, Liverpool, London or Boston. Some of them are large, some small, some clean, some ugly, and some neat and trim. They vary greatly in appearance.

As a rule, however, these tramps of the ocean are worse than land tramps, being the companies who own them. Belonging to no regular line, or any trade in particular, they are able to do a cargo wherever they are able to do so. Many of them are utterly unseaworthy, and their wages are paid to the crew at the point of departure, and the machinery is in bad repair. Often the power is inadequate to propel the ship against great stress of weather. The steering gear is jam at some critical moment, the hull in the last stages of decay and, in fact, nearly everything is in the state with them that could be the matter with a ship.

Yet, in spite of all these discomforts and dangers, so long as the vessel holds together and the crew safely travels from one port to another, no one complains except the crew, whose arrangements are often such that they cannot leave the ship.

To prevent desertion care is taken to ship only married men, besides the mate, and these men are given half pay in advance for their families, on condition of giving bond against desertion. A more uncomfortable and in every way disagreeable life than that aboard an ocean tramp cannot well be imagined. The crews are made up of mixed races, and their wages are paid according to the vessel and the trade in which it is engaged. The average wages may be said to be as follows: Chief officer, \$38.00; second officer, \$24.00; chief engineer, \$28.00; second engineer, \$26.00; carpenter, \$24.00; steward, \$22.00; cooks, \$22.00; boatswain, \$18.00; able seamen, \$17.00; ordinary seamen, \$16.00; fireman, \$14.00.

These wages are a little better than those which are paid on other ships, on account of the extra hazardous risks taken by the men. The tramp ships make the most erratic journeys, wandering pretty much over the whole world before returning to the same port. After carrying a cargo of coal from Cardiff to the West India Islands, it may go to New York, thence to Rio Janeiro, then to Antwerp, and may then go to Cape Town, and from there to Shanghai, going to San Francisco before returning to the port from which she originally came.

The operating expenses of the ocean tramp are very small. Always on the assumption is reduced as much as possible and the crew is small, while the other expenses are kept at the lowest notch practicable.

They are very unpopular at sea, and, like their namesakes on the shore, their life is against every one. They are the terror of small craft, such as yachts, and fishing smacks, and many a boat that has been run down in a collision blames a tramp steamship for the accident, as the tramps keep a poor lookout, or none at all.

Life of the Poor in Paris.

To get enough to eat is not the chief difficulty, for that is always to be had with a little ingenuity. For instance, there are here 30,000 soldiers continually under arms, housed in huge barracks in different quarters of the city, for whose support enormous supplies of provisions are required. Naturally there is a great amount of surplus or unconsumed victuals, instead of being destroyed or sold, these are given away to whoever chooses to ask for them. All one has to do is to follow the line (stand in line) early in the morning to the great Central Market, where the meat is sold, for the soldiers' kitchen is cut up, the butchers and market gardeners sell a soup made from the bones of the meat and the vegetables, which, though not very clean, is still palatable and wholesome and one can get a breakfast for two soups. As night falls the soldiers are sent to the barracks, where the meat is sold, for the soldiers' kitchen is cut up, the butchers and market gardeners sell a soup made from the bones of the meat and the vegetables, which, though not very clean, is still palatable and wholesome and one can get a breakfast for two soups.

CHINESE JEWS.

Curious Particulars About the Strange Tribe in the Interior of China.

Until within the last few years but little of the history of Jews in China is known. This can only be accounted for by the fact that the Empire has been virtually closed to all foreign nations. It appears, however, that some of the Christian missionaries were specially permitted to enter into the interior of the Empire. The Jews of China do not intermarry with heathens and Mohammedans, do not marry Chinese women, and do not observe their religion with strictness. But such has been their poverty that they have sold some of the materials of the buildings around the synagogue. They look to the Emperor to repair their temple, but scarcely expect it. Their religion makes outcasts, and some of them follow it secretly, like Mohammedans.

The inquiries were interrupted by the jealousy of some of the Mohammedans, who threatened to persecute the strangers, and this led to their abrupt departure from the city. The synagogue was in a very ruinous state, and the few people they saw were apparently extremely poor and had no teachers. Chao-King-Kwei, one of the Jews, gave the key of the great chapel of the "Pure and True Synagogue" to Chao-King-Ching, another of the Jews, who opened the great chapel and sold a Jewish book, eight in number, large and small. Mr. Milne says in his "Real Life in China":

"They brought with them two Chinese Jews, with whom I had frequent interviews, as they resided in our mission during their sojourn in Shanghai. Neither of them had a Hebrew name. The one was forty-five years of age, and the other forty. They had both submitted to the right of circumcision in infancy. One of them had a remarkably Jewish cast of countenance, but in nothing were they distinguished from the surrounding masses except in religious profession, for they talked the Chinese language, dressed in Chinese style and in the usual Chinese manners and customs."

Both Bishop Smith and Mr. Milne furnish descriptions of the eight Hebrew manuscripts which the messengers purchased at Kae-Fung-Foo. There is a little difference between the two descriptions in some of the details, but they substantially agree. The Bishop says the books "are written on thick paper, bound in silk, and bear the internal marks of former, probably Persian, origin. Mr. Milne says they contained sundry portions of the Pentateuch, and then adds: "These manuscripts were chiefly on large scrolls, a few of them in smaller book form, written on thick paper and some on sheepskin. One or two were of considerable antiquity. The writing in most was clear and distinct, without vowel points." Measures were afterward taken to obtain complete copies of the law.

The sect itself places its introduction into China at the commencement of the Christian era but the synagogue was not built till long subsequently. At first they consisted of seventy families, which have been scattered and reduced until only seven remain, numbering about 300 persons, and distributed about the neighborhood. On a certain day they honor the Jewish writings, but before the service they must all bathe in the place appointed and then they may enter the synagogue. The rabbi then takes a seat in an elevated position and reads a scroll, and a large red umbrella is held over him. They bow toward the west when they worship and call upon God the Chinese language by the name of Ten, or heaven. On the twenty-fourth day of the eighth Chinese month they hold a great festival, perhaps the feast of the Tabernacles, and called "the festival for perambulating around the sacred writings," because they go in solemn procession around the hall of the temple.

For fifty years they have been without competent teachers to instruct them in their thirty sections of the law and the twenty-seven books of the prophets. As the Jewish alphabet has but twenty-two letters the number twenty-seven is made up by counting as ten characters the five which have been added to the famous Jewish traveler, Benjamin of Tudela, who mentions China in the twelfth century, seems not to be aware of the Jews in the empire. He has heard, however, that a Mohammedan, who wrote in the year 877, makes an allusion to them. The next writer who mentions them is the Moorish traveler, Ibn Batuta, in 1400, and it is said that soon after this the Spanish Jews speak of their brethren in China.

Not till the time of Marco Polo, however, is there anything definite upon the subject. As quoted by the Rev. H. Venn, in his life of the great Jesuit missionary, Xavier, who related that he had heard "I met at Malacca with a Portuguese merchant who had recently returned from China. He told me that he had been asked by a grove aboriginal Chinese resident in the royal city whether Christians fed on swine's flesh. To this the merchant answered that Christians did not refuse; but why was the question asked? The Chinese replied that there was a certain tribe in the interior of China, shut in by mountains, whose customs and manners were widely different from the Chinese, and that they abstained entirely from swine's flesh and celebrated solemn observances many festivals."

It may be expected that Alaska will eventually produce large quantities of jade. This rare mineral, which is not found in any part of the United States, is greatly valued in China and certain other countries of the Orient. Early explorers in Alaska have found it, and knife-sharpeners and other implements of jade at Point Barrow, Nome Cape, Cape Prince of Wales, and on St. Michael's Island and Homestead Island. Some of these were of high finish, translucent and beautiful. They somewhat resembled similar articles used by the natives of Siberia, and it was at first supposed that they had been brought across Behring Strait in trade; but this subsequently proved to be a mistake.

A few years ago George M. Dawson picked up a number of small jade pebbles on the upper Lewis and Clark trail, far from the eastern boundary of Alaska, the material of which was strikingly like that of the implements described.

Market Report.—"It seems to me," said the man with the market basket on his arm, looking disconsolately at the stock of ribs and shanks hanging on the wall, "that the beef part of the market has struck this shop pretty hard."

"Yes, sir," replied the man behind the white apron, eyeing him sharply. "It's pretty hard to make both ends meet these days."

Adrian Rathbun made a fine display of fireworks on the evening of Dominion Day.

He and see the fancy scroll drill at the ice cream social in St. Mark's hall next Wednesday evening.

The Tribune staff desire to thank W. P. Brown, Napanee road, for a beautiful description of the very best ice cream.

Karl's Clover Root, the great blood purifier gives freshness and cleanness to the complexion and cures all skin diseases at 25 cts., 50 cts., \$1.00. Sold by W. G. Egger.

A ploughing match under the auspices of the provincial association and the Frontenac farmers institute will be held near Kingston on Wednesday, Oct. 30.

Mr. and Mrs. F. S. Rathbun and family left yesterday for Falmouth Heights on the coast near Boston. Mr. Rathbun will return next week but his family will remain for two months.

H. A. Osborne's Fine Art Souvenir of Deseronto is now ready, and is on sale. It is an excellent production, and he deserves credit for his enterprise. We predict a large sale.

Lord Salisbury has formed a strong government and the imperial parliament will be dissolved next week. The general election will be over in about three weeks. The issue is doubtful, though the probabilities appear to favor the government.

James G. Connor, advance agent for Uncle Tom's Cabin Company, was arrested at Colatook, on Monday, on the charge of having stolen baggage vehicles at Dundas, on December 4th, 1894. He was taken to Hamilton for trial.

Harold McE. Rathbun has passed a very successful examination for entrance as a cadet to the Royal Military College, Kingston. We desire to congratulate our young friend on his success.

The Weather.

The weather during the past week has been hot and dry. Rain is greatly needed for the languishing crops. Nights are generally cool. The maximum temperature for the week were: Friday 82.5, Saturday 82.2, Sunday 79.4, Monday 89.4, Tuesday 83, Wednesday 85, Thursday 93.

Dominion Day.

Monday was a quiet day in town. Many went to Napanee and Pictou demonstrations. However the greater number of our people constituted themselves into family picnics and the whole Bay shore for miles was filled with camp. It was a day of restful pleasure. In the evening the streets were lively.

Died in Waterbury.

Annie Morrison died in Waterbury, N. Y., on June 27th, under the most distressing circumstances, having taken an overdose of opium. It is the old story of man's perfidy and woman's frailty over which we would fain throw the covering of charity. The unfortunate girl spent part of the winter in Deseronto, and only seven weeks ago left her home in the best spirits and with the kind wishes of her mother and other members of the family. The remains were brought to Deseronto for interment. In the proceedings of the coroner's inquest at Watertown we observe the name of one James Hill, of Deseronto, occupies an unenviable prominence in connection with the case, thus showing that our town has not been free from the presence of this despicable vice and base species of humanity.

Marysville Picnic.

Rev. Father Quinn and the congregation of St. Mary's church, Marysville, will hold their annual picnic on Wednesday, August 21st, in Grace Anderson's grove, about five minutes walk from the railway station. The Marysville picnic last year was by general consent one of the most successful and best conducted ever held in Tyndalton. The committee are determined to keep up their reputation and this year the event will be in every way worthy of the previous ones. From all sides come offers of assistance and generous donations. A gold watch will be given to the lady selling the greatest number of tickets. Purchasers of tickets will have a chance to draw the following prizes: an eight day cathedral gown marble clock, silver cake dish, and a ruby pickle crock. Among the prizes for athletic sports will be a silver crock, gentleman's arm chair, handsome glass water set, a first quality bicycle, and a new suit of clothes. To be served in that liberal profusion characteristic of Tyndalton people. Addresses will be delivered by several prominent public men. It will be seen that inducements to attend are numerous and powerful.

Shin's Cure is sold on a guarantee. It cures indigestion. It is the best cough cure. Only one cent a dose 25 cts., 50 cts., and \$1.00. Sold by W. G. Egger.

Hogs Cleaned the Meadow.

Last year an Indiana farmer had a meadow so badly infested with asters as to render it worthless for hay, so he decided to try the hog pasture method and cut the remainder for home use. The hogs were turned on when the grass and weeds were six to eight inches high. The animals took to the weeds, leaving the grass. Being without rings they took to rooting and in three weeks the weeds were destroyed. The hogs were then turned off and at harvest time the field yielded over two tons per acre of pure timothy. The expensive pasture was almost worthless. This spring the pasture land promised a good yield of hay free from weeds.

REMOVING SALE.

GEORGE SNIDER desires to inform the general public that, while he has the general public of the Deseronto community, he is now moving to the new house, opening from Main Street, and that he offers Jewellery, Watches, Silver, and other goods, etc., at bargain rates. He takes all his old patrons, especially, to remember him in these temporary quarters.

THE CULTURE

CURRENTS AND GOOSEBERRIES.

They Come Early in the Season When There is No Other Substitute.

Since the advent of the current, gooseberries have been the fruit of the neglected. No others are so highly related. They come early when there is no substitute for them. For wanting them, there is no superior. They can be raised easily and cheaply, are a sure crop, will come into bearing the second year, and always bring a good price on the market.

I came past a number of gardens to-day. In all of them were currants and gooseberries, but not a single hill that would produce even fair berries. The grass and weeds were abundant and some of the bushes had 200 canes to the hill. I never saw a currant or gooseberry bush thinned unless given by a specialist. My first fruit is a single stalk, and if planted three feet apart will out- yield any other method of thinning.

I raise from cuttings, rooting them in beds and planting nothing but well-rooted plants. I plant four feet apart and allow them to grow. When the bush is formed the new growth is well clipped each year. I would as soon think of leaving my hair unclipped as my bushes. It will take but fifteen minutes to clip enough for one family's use. It makes finer berries, earlier picking, and the bushes look so much neater. Some grow their bushes every year but I do not after the second. Yesterday I tried to dig into a patch five years old, and though the bushes are four feet apart, to force up a spade of dirt would break hundreds of roots. I am now plowing would injure them. I keep them heavily mulched, turning the mulch over if it gets woolly. This can be quickly done with a fork. For worms I use Paris green or London purple. I can save twenty bushels of gooseberries in twenty minutes with a good sprayer. I begin as soon as the worms come. I give my wood ashes every third year and keep them constantly mulched with coarse stable manure. With such treatment I think a patch will last for twenty years—American Agriculture.

A Transplanting Stand.

No insignificant part of garden work is the transplanting of small plants from boxes, where they have been started early, to the soil of the garden. It is not easy to find a permanent home. With a "digger" one can cut individual plants from a box with very little disturbance of the earth and the roots are not injured. It is tipped up at an angle of forty-five degrees

or so. Better than holding the box tilted in its position with one hand, while the other cuts out the plant, is the use of such a transplanting stand as is shown in the cut, which holds the box of plants at the desired angle, and is also provided with handles so that the box can be picked up and carried handily, the position when thus carried being in a horizontal position. A half hour's work in the tool shop will provide this very convenient article.

Spraying Apple Trees.

As to spraying apple trees, all depend on what they are to be sprayed for. If for the scale, which of late has proved so damaging to the apple crop, they should be sprayed twice before the buds open; and with Bordeaux mixture, which they are to be sprayed to destroy the codling moth, this should be done once after the blossoms fall and once before the fruit is gathered. Bordeaux mixture, adding about two pounds of London purple to 100 gallons of the water, mixing the purple first in a small dish into a thin paste, and then adding it to the tank of water. London purple is better than Paris green, for the reason that when mixed into the water, it does not settle as Paris green does. After spraying thoroughly for the codling moth, if you will, except when a rain follows the spraying, a light spray of case it should be repeated. A light spray, just enough to wet every part of the tree, is all-sufficient.

Horizontal Notes.

Probably nine-tenths of the apple orchards of New York State are in sod, and many of them are meadows. Of course they are falling.

Whenever we get down to managing an orchard as carefully as we manage other crops we shall reduce failure to the minimum. Everything that grows must have care except a weed.

To grow on novelties in seeds and plants. Try a few each year as an experiment, to learn their value, but never rely on them for your main crop. Some may prove desirable to grow, while others may be valueless with you. Order your seeds in the winter.

To plant strawberries rapidly and well, says an exchange, grow a straight-planted spade into the ericoid, draw out the spade and firm the soil by stepping on each side of the plants. As soon as a row was thus planted by one boy and a man to three days, without loss of a single plant. They had to dig the plants, mark the ground, and averaged eight hours per day.

Some do not much because it is "too much trouble." I saw strawberries being for customers last season at seventy-five cents per crate, because they were dirty. Had they been cleaned, they would have brought \$2. Figuring at 100 crates per acre (small enough), the loss is \$125. Mulching would not cost over \$10 per acre. Besides, mulching increases the crop. It keeps the land moist in dry weather. It does not pay to grow strawberries without mulching them. The sooner it is done the better.

English Pig Ten Feet Long.

An enormous pig, believed to be the largest ever seen, has been slaughtered at Linton, Cambridge. The pig, which was 10 months old, weighed nearly 90 stones, and measured 10 feet in length and 7 feet in girth.

ARMLESS, YET A PAINTER.

This English Artist Uses the Brush Cleverly with the Mouth.

When a man without arms becomes an artist there is considerable evidence that he has a strong and natural inclination for the career. This is the case of Bart- rami Hiles, a young Englishman, whose pictures have been on exhibition in London at No. 15 Piccadilly.

Mr. Hiles is not the only armless artist of merit now living. Charles Fulu, of Antwerp, has long been known as an excellent painter. Mr. Hiles holds the brush with his toes, while Mr. Fulu uses his mouth. The Englishman, however, is the more remarkable, as he is a native of the north, and in a street car accident, the Belgian was born armless. The former is only twenty-eight years of age, and is a slightly disfigured man as a landscape painter; the latter is sixty-four, and is a figure painter.

Mr. Hiles exhibits a vast amount of perseverance and cheerfulness with unmistakable artistic ability. Only two years after his accident, he had so far mastered the control of his pencil held in his mouth that he was placed in the first-class division of the second grade of French and English of the National School of Art at Bristol, and he was only sixteen when he exhibited a work—a study of a steamboat—at the local academy of Bristol.

For the next few years he studied, both in Bristol and in Paris, so assiduously and successfully that in 1885 he won a scholarship, open to the competition of the United Kingdom, of a hundred guineas, and tenable for two years, offered by the National Art Department of South Kensington.

Since then further honors have been won by him on equal terms with other competitors. He has won a second and a bronze medal, and a design for a finger-plate intended to be executed in repoussé work also received a similar distinction.

A charming design for a water-jug and a silver medal last year at South Kensington, where his skill in modelling clay with his lips was revealed by his being placed in the first division.

Among the collection now being exhibited at the recently opened art prize designs may be seen. An effective study at Venice was hung in the gallery of the Royal Society of British Artists, while a friend was counted though crowded out by the committee of the Royal Academy this year.

Mr. Hiles is a cheery, good-looking and intelligent young man. He seems to suffer but little inconvenience on account of his misfortune. His lips appear to serve him nearly as efficiently as do our hands. At the request of a visitor he took up a pen in his mouth and wrote his signature. When a cigarette was offered him he placed it on the edge of the table, took a puff, and held it in his mouth to the point of the cigarette, when, ignited, Mr. Hiles proceeded to smoke.

RECURRENT DREAMS.

Howells Describes Them and His Singular Experiences While Abroad.

I have been saying that they have sometimes dreamed of a thing and awakened from their dream and then fallen asleep and dreamed of the same thing. But I believe that this is all one continuous dream; that they did not really wake, but only dreamed that they awakened. I have never had any such dream, but at one time I had a recurrent dream, which was so singular that I thought no one else had ever had a recurrent dream till I proved that it was rather common by starting the inquiry in the "Monthly" club in the Atlantic Monthly.

I found that great numbers of people have recurrent dreams. My own recurrent dream began to come during the first year of my residence at Venice, and I had hoped to find the same kind of poetic dimness on the phases of American life at the distance of time would have been. I should not wish any such dream now, but there were my romantic days, and with his lips he was in the habit of appointing himself to have my nights as well as my days, and a dream repeated itself from week to week for a matter of eight or ten months to one effect.

I dreamed that I was in a boat on the Adriatic, and that people met me and said: "Why, you have given up your place!" and "always answered me, certainly not; I haven't done at all what I mean to do, there yet. I am only here on my ten days' leave." I meant the ten days which I might take each quarter without applying to the Department of State; and I would reflect how impossible it was that I should make the visit in that time, and that I should be found out and dismissed from my office.

Tricking a Crab.

In Africa there exists a certain member of the crab genus commonly known as the great crab. The peculiar shell of this crab has an offensive trick of crawling up the cocoon trees, biting off the cocoon, and then creeping down again backward.

STEEL CLAD FORTS.

HOW THE LOWER WAY OF NEW YORK MAY BE MADE IMPREGNABLE.

Romer Shoal Utilized—Eight Powerful Batteries to be Mounted in Heavily Armored Revolving Steel Turrets—Other Gun Positions Between Them.

Veterans of the late American civil war who saw the effect of shells bursting in old-fashioned masonry walls at Fort Mifflin and at various other points in the south do not need to be told that defenses of the lower bay of New York City are not now forts at all. Under the fire of old-fashioned Dahlgren and Parrott guns, they would not be forts, but slaughter pens, and before the devilish energy of modern high power rifles they would crumble like sugar.

Fort Hamilton having a considerable amount of earthwork, would not be quite as bad, but it can no longer be regarded as a serious protection for New York. On Stony Hook there already exist modern earthworks of great value for both their resisting and attacking powers, and sites for similar gun emplacements have been selected on Coney Island and its vicinity.

But while these batteries would do much to resist the approach of a hostile fleet toward this city, it has been deemed desirable to design even stronger fortifications.

On a line running about east-northeast and west-southwest, across Romer Shoal, four steel turrets are to be set up. The old method of building a foundation in shallow water by throwing down loose rock and then placing concrete blocks on top of this rip-rap work will probably not now be adopted, that which is called the pile method will be used.

The piles will be sunk to take the weight of the fort, and these piles will then be connected by steel plates until the water can be pumped out. The piles will be driven to the lowest tide level will thus be secured for machinery, magazines and quarters.

Upon solid foundations will then be erected sloping batteries, above which will be revolving turrets. The backing of both batteries and turrets will be much in line with that which can be given to similar defenses on board ship, and there is every probability that the forts will be absolutely invulnerable to the heaviest ordnance mounted on any ship.

Each turret will have its own revolving machinery. The thickness of the armor plate will be determined by the relative status of armor and the gun at the time the forts are ready for their attack. Protection, and to a certain extent, the caliber and length of gun will be dependent upon that relative status. It is to be expected, however, that the four forts will contain eight of the most powerful pieces that can be made.

The alignment of the forts is such as to enable all of them to command the approach to the main ship channel and to sweep the whole front of the bay entrance. With such a battery in place the ocean bottom from Navesink lights to Rockaway Beach could be made a great rifle field, and a hostile fleet would have little hope of clearing a way through the torpedoed channels by such guns.

In the wing connections between the turrets will be mounted a number of 6-inch rapid fire guns, with, perhaps, also a few 8-inch.

A lighthouse caps the summit of one of the turrets, though in war time, of course, there would be no light, and probably the structure itself would be taken down.

TOOTH WORMS.

The Chinese Dentist Looks for Them When the Teeth Ache.

It would seem that in dentistry as well as in ways that are dark "the heathen Chinese is peculiar," and in the Journal of the British Dental Association, Mr. C. Robbins has communicated some curious essays on the subject written in English by Chinese students at the Anglo-Chinese College, Fookow. They describe in quaint language the performances of the dentist who are usually itinerants of the Squah order.

They appear to have three methods of treatment: 1. Extraction, the patient's attention being distracted and his lamentations overpowered by the beating of a drum. 2. The application of arsenic to kill an exposed pulp; and 3. the extraction of "tooth worms." This latter operation, however, performed by women, is very frequently resorted to, and undoubtedly worms are produced from the tooth, as these amateur dentists adopt the Chinese proverb, "The tooth is the worm's home." The story—used always to prove against finding his diagnosis had been mistaken by taking a pebble of suitable size in his watertight pocket—and then solves introduce these worms, which are usually concealed under their long finger nails. A Chinese student describes the operation thus (we give his own words):

"Now let me advert to the practice of arresting the tooth worms. One of my relatives was once attacked by a severe cold, and after the cold was broken up by restoring activity to his skin he had a neuralgia which gave him such an intense suffering that he could neither eat nor repose, but moaned with a voice so audible and so plaintive that it sent a thrill to the heart of every one in the house. The second day after the increase of his pain to a remarkable degree; indeed, it is impossible even at this distant period to recall the without horror on the miseries of his toothache attack. Finally, he submitted to the operation of a woman, dentist whose agency was to arrest tooth worms. Her method was as follows: She first took a stick and a silver pin. As the other instruments she requires in her normal art, she was using to exhibit them to any one who came to her for treatment. She then, after her trickery, she brings the chopstick in contact with the diseased tooth and cautiously pushes it through the hole in search of the edentulous worms; after a while scrapes out a lump of yellow mucus and it in a cup of water. Each man consists of from ten to fifteen worms, and sometimes two or three hundred worms are secured if the patient has an exact bargain at first that the fee should be destroyed according to the number of worms secured. The normal fee is 400 cash (3d), and only the poor may take advantage of being in penny to pay 500 cash.

Batters are Good Riders. It is a curious fact that all butchers and slaughter houses are in the country. He plain but is perhaps due to their dealing in meat which makes them like horse flesh.—Buffalo Enquirer.

ALL ABOUT NICARAGUA.

THE LITTLE CENTRAL AMERICAN REPUBLIC IS IMPECUNIOUS.

Its Natural Resources, However, Are Said to be Exceptionally Rich—Finances of the Government in Poor Condition.

The total population of the republic of Nicaragua is put by the best authorities at 300,000. Of the inhabitants, 70 per cent, one-tenth being to unutilized agricultural lands, while the main body are classified as "Indians." The Indians are mulattoes, negroes, mixed races and Europeans, the latter, according to the New York Sun being but few in number.

The area of the republic is only about 49,000 English square miles. There are few towns, and all of them with two exceptions are small and rude. The population of Managua, the capital, is 15,000, and that of Leon, formerly the capital, 35,000. The town of Corinto is the principal port on the Pacific, and the leading capital (a mixture of white and Indians) predominates there. The most important industry of the inhabitants of Nicaragua is the raising of cattle, the hides of which are exported; and among the other exports are coffee, bananas, sugar, indigo, coconuts, cacao, Brazil wood and cedar.

The greater part of the imports are from England, and the greater part of the exports to the United States. There are over 100 miles worked by American companies, in nearly all of which gold is found, and the greater part of the exports to the United States are of gold and silver mixed with copper. A good deal of American capital has been sunk in them.

Nicaragua is especially rich in valuable woods, the mahogany, the cedar, the locust, the alamo, and the roble. There are also medicinal trees, besides other commercial trees, including the castillo elastica, from which India rubber is made; the guaiacum tree, and several trees which produce gums. Wild animals, monkeys, alligators, lizards and snakes abound, besides tropical birds to the number of 140 species. Mosquitoes swarm in all damp places, and there are fierce wasps. The foraging ants move in large armies. The sea, rivers and lagoons are alive with every variety of tropical fish.

There are numerous volcanic peaks, a few of which are still active, but most of them have long been extinct. The last great eruption was that of 1855, when Coughuina scattered its hot ashes over a circle of 150 miles in diameter. The last eruption of the volcano was in 1855, when Coughuina scattered its hot ashes over a circle of 150 miles in diameter. The last eruption of the volcano was in 1855, when Coughuina scattered its hot ashes over a circle of 150 miles in diameter.

The form of government is constitutional and republican. The legislature consists of two branches, the senate and the house of representatives, the members of both of which number only thirty-nine, who are elected under the Nicaraguan system of universal suffrage. The president now in power, Gen. Santos Zelaya, was elected in the Nicaraguan way last year, and held office for four years. He has a council of four ministers, who have charge of that number of departments of the government.

The army of Nicaragua consists of 2,000 men, with a reserve of 10,000, besides a nominal militia force of 5,000. The active police force consists of 1,000 men, and the reserve is 10,000. The army is in the field against a European force.

There are about 100 miles of railway open in the country, which were built at a heavy cost. One line extends from Corinto, a distance of fifty-eight miles, and another from the capital of Granada, 32 miles. A number of concessions for new lines of greater length have been granted to contractors, who are blamed for delaying their construction. There are over 1,200 miles of telegraph lines. There are a fair number of schools for the population.

The finances of the government are, always in bad condition, on account of the disturbances that often prevail, and in many years the expenditures for the army have been beyond the total receipts. Two-thirds of the total annual revenue are derived from government monopolies on spirits, tobacco and gun-powder, and the remainder chiefly from import duties and a tax on slaughtered cattle.

A soap dealer who should open an agency in China would lose money. In many parts of China the children wear, no clothes for many months in the year. The majority of the people never wash. "Do you wash your child every day?" a Chinese mother was asked. "Wash him every day?" was the indignant response; "he was never washed since he was born!"

FOR OVER FIFTY YEARS,

Mrs. Winslow's Soothing Syrup has been

used by millions of mothers for their children

when teething. If disturbed at night and

broken of your rest by a sick child suffering

and crying with pain of Cutting Teeth, send

at once and get a bottle of "Mrs. Winslow's

Soothing Syrup" for Children Teething.

It will relieve the poor little sufferer immedi-

ately. Depend upon it, mothers, there is no

mistake about it. It cures Diarrhoea, regu-

lates the Stomach and Bowels, cures Wind

Colic, softens the stool, and reduces

Inflammation, and gives tone and energy to

the whole system. "Mrs. Winslow's Soothing

Syrup" for children teething is pleasant

to taste and is the prescription of one of the

clearest and best female physicians and nurses

in the United States. Price twenty-five

cents a bottle, sold by all druggists

throughout the world. Be sure and ask for

Mrs. Winslow's Soothing Syrup.

CATTLE HUSBANDRY.

Those Six and Half Cent Steers From

In a recent issue of The Mirror and

Farmer, attention was called to a pair of oxen

sold in the Massachusetts market

that were fed by G. W. Randall of Maine.

Regarding such sales as bacon lights for

the guidance of those who are begging

for an unwilling market. Mr. Randall

was asked to give further information in

regard to their breed, method feeding

and any other information that he might

have to impart in relation to them. He

replied as follows: Will say that the oxen

that I sold were five years old; bred,

Hereford. These oxen were kept in the

farm summer and winter, and have done

the work of the farm. They had all the

good hay they would eat and four quarts

of meal and bran mixed daily. Just

as good cattle can be duplicated with good

care and some feeding if they are fine

grades. My method of raising steers from

calves is to let them have the milk until

they are six months old. I give them

providence as soon as they will eat it.

They have good care all the time. I let

them run in the pasture summers, but do

not give them provender when out to

graze. In the winter they have all they

will eat, and in summer provender. I

will sell mine when they are three years

old. I raise Hereford steers altogether, as

I think they are more easily raised

than other breeds. I have never written for

publication, but if you find items that

you desire to use, you are free to use the

publish them.—W. Randall.

Readers will understand that the letter

is in answer to specific questions. We in-

terest attention to the reply to the question

whether the management of the steers was

under special advantages and involved a

degree of skill not easily within reach of

those who would apply themselves to the

task of raising steers. His re-

sult is as we expected and to the point,

which in effect is bred from good animals

and apply good sense in the feeding.

Now there was nothing in the feeding

that was extravagant, the one point being

that they were kept growing. We infer

that they were given the milk of the cow

whom they suckled until six months old.

This is unnecessary, as abundant evidence

shows. Skim-milk has been found an ad-

equate substitute for milk in calf

feeding.

Steers have sold for as low as \$40 that

weighed 1,500 pounds, and within a year.

What a shame between this sum and \$60.

It is the farmer that sells the former

steers that is played out and not the

farm. Farming abandons such farmers

and not they the business; they are run

out by events.—Mirror and Farmer.

CARING FOR LAMBS.

How to start the Young Creatures in the

Way of Quick Growth.

While the lamb is young is the time to

start it in the way of quick growth. Its

growth and maturity is a matter of

nature from hay and corn depends very

largely on the start it gets during its first

few weeks of existence. If it once gets

used to an amount of food, it will never

again make it do its best. At first you

must feed the lamb through its mother.

To make her give plenty of milk, she

must be well fed. In the winter and all

the year she will eat all the food that

she can get. It should be good

clover hay—early cut and well cured.

She needs plenty of wheat bran. If you

do not give her this, her milk will be

poor. I would give her no corn, or very little.

If I wanted to fatten her with the lamb, I

should give her a ration of this mixture

by weight: one pound of clover hay, and

parts of wheat bran, ten parts of linseed

meal. I would gradually accustom her to

this food, and as she became used to it, I

THE SILENT SUBSIDER.

The Route of the Alfalfa Plant Strike as

There are some silent subsidisers that do

their work with ease, and in their way,

as effectually as any team or plow ever

hit, and which in some lands use of a

subsidiser is essential to the best be-

ginning of such work. The clover plant

is right, and is one of these, and

alfalfa is its superior. Its roots work

Sunday as well as Saturday, night and

in the course of my experiments

with my compass I made several fluids,

all of different strengths. One day, with

several friends, I went to Lake Michigan

to test the compass. The affair worked

perfectly when the contents of one of the

bottles was used, very badly with others,

and again all at all with some.

"I was delighted when I found that the

compass was a success with one of the

mixtures. One of my friends, however,

asked me how the contents of that bottle

differed from the others. Then I realized

that I had made a fatal error. I had not

marked the bottle, and was as much at

sea about it as my friend. That was

three years ago. I set to work at once

to rectify my mistake and spent several

thousand dollars in having the contents

of that bottle analyzed, but all to no pur-

pose. Perseverance pays, however, for

several months ago I succeeded in getting

a formula for the successful mixture.

"The compass is about two and one-

half inches in diameter and three inches

high. Under the needle is a strip of met-

al. Beneath the face of the compass is a

saucer, in which the chemical I spoke of

is placed. The whole is connected electri-

cally with an enlarged horseshoe mag-

net 10 feet long made of soft iron bars 12

inches wide. The poles of the magnet

are connected by wire with the ship's dy-

namo, thus giving us the electrical power.

"The moment a ship enters the mag-

netic field of the vessel which carries my

compass, which I calculate at six miles,

the needle of the compass is deflected in

the direction of that ship. In turning it

passes over the metal plate on the face,

and as it does so it closes an electric circuit

which sets alarm bells ringing, telling of

the approach of the other vessel.

"When I first brought my compass to

the notice of shipping men the cry was at

once raised that the magnet would seri-

ously affect the ship's steering compass.

Such is not the fact, for this can be

proved in the way usually adopted in all

A DEFIANT BEAUTY.

CHAPTER I.

"Where should this music be—in air or on the earth?"

The last soft, sweet note of the singer had died away upon the air—the delicate, well-blended burst of applause follows it and then a sense of well being among the fashionable throng, a knowledge that for the next five minutes their own voices may be heard in the dimly lit tribune against the mutual friends, it is as close to the end of the season that many regard this musical evening at Lady Swandown's as really their last in town, and are already dreaming of flight upon the morrow. A flight from fogs and smoke, and equivalent to the calm, cool depths of the country. It is a tremendous crush, and the heat is almost intolerable; and in the crowd of the dying flowers, but everybody, past and present, and future, in an artistic sense is present so that not to be here would mean being out of the world.

The coveted five minutes has already drawn to a close, and now as Lady Swandown moves and her corner makes the spot dense, everybody glances after her, with a calm sense of expectation.

The crowd parts as she draws near, and permits her to lay her hand upon the shoulder of a girl who had been her friend for years. "You will play, won't you? Everyone is so anxious, so on the very tip-toe of hope. Come—come now."

She speaks nervously, as if a little afraid of a capricious refusal at the last moment; but the girl, giving her a quiet smile, says, "I have never had much of a cough since that time, and I finally believe that Ayer's Cherry Pectoral saved my life."—W. H. Ward, a Quilby Ave., Lowell, Mass.

Almost a Hopeless Case.

A Terrible Cough. No Rest Night nor Day. Given up by Doctors.

A LIFE SAVED

BY TAKING
AYER'S CHERRY PECTORAL

"Several years ago, I caught a severe cold, attended with a terrible cough. The doctors, no rest, either day or night. The doctors, after working over me to the best of their ability, pronounced me a hopeless case, and said they could do no more for me. A friend, learning of my trouble, sent me a bottle of Ayer's Cherry Pectoral, which I began to take, and very soon I was greatly relieved. By the time I had used the whole bottle, I was completely cured. I have had much of a cough since that time, and I finally believe that Ayer's Cherry Pectoral saved my life."—W. H. Ward, a Quilby Ave., Lowell, Mass.

CANADA'S PHOSPHATE MINES.

A Collapse in the Industry Caused by the Competition of Florida.

The phosphate mining interests of Canada are in a state of utter collapse at present, and to remedy this state of affairs the Canadian Mining Association proposes to endeavor to induce the Dominion and Provincial Governments to introduce the general use of phosphate fertilizers on Canadian farms through the agency of the experimental farms. As an illustration of the stagnation of this branch of mining, it may be mentioned that three years ago 3,000 men were employed in phosphate mines in the English market of the phosphate of Algiers and the high-grade product of Florida, which can be worked and marketed much more cheaply. The mining men point out that leads in Georgia have advanced in price from \$3 to \$30 a ton, whereas the use of fertilizers, May, in fact, most of the farms of Quebec have been exhausted by the wasteful and unscientific farming of the inhabitants, and so the necessity of doing something to improve their farming methods, and thus relieve the phosphate miners, will be pressed upon the Government.

Phosphate was mined extensively in Canada until recently. The principal mines were in Ontario county, and the output averaged from 25,000 to 35,000 tons. The higher grades were shipped to Europe and the lower found a market in the United States. The large profits led to the opening of new mines, and constant demand boom took place. The excitement culminated in the formation of the General Phosphate Corporation, Limited, with a capital of \$1,000,000, and 2,000 shares of \$50 each, acquired in Ontario county at an outlay of \$200,000.

High-salaried and experienced men were engaged in both London and at the mines. Then followed the development of high-grade phosphates in Florida, and the flooding of the European markets thereby caused a big drop in the price of Canadian phosphates. The mines were compelled to suspend or reduce operations, and the share prices fell from 30 cents in 1893 to 6 cents in 1894. This year there is practically nothing doing.

As frequently happens in such cases, the chief sufferers have been land speculators rather than the mining companies. One block of land purchased for \$100,000, and sold for \$5,000 was sold for \$100,000. It consisted of 1,000 acres, and half this area was sold for \$100,000 and the other half for \$50,000. A property of 100 acres bought at a sheriff's sale for \$15 was finally disposed of for \$125,000. The mine owners feel that at present their only hope is the general adoption of superphosphates as a fertilizer by the Canadian farmer.

BURDOCK

BLOOD

BITTERS

CURE

DYSPEPSIA,

BAD BLOOD,

CONSTIPATION,

KIDNEY TROUBLES,

HEADACHE,

BILIOUSNESS.

BURDOCK'S PILLS act gently yet thoroughly on the stomach, liver and bowels.

eremotously, a little frown darkening all her face. "Do you think I am a fool? Compliments to whom compliments are due. Good enough! But none from you, thank you! Don't I know you?"

"Well, you should," says he, mildly. "Well, I do. And I know that you regard with contempt the woman who could stand up before her world, however small it be, and let herself be publicly admired. By herself, I mean. I mean her talent. Come now, may the truth for once, confess you think me forward, brazen, vain and all the rest of it."

"You are so evidently anxious that I should not content myself, that I really hardly like to refuse you," says he coldly. "But as you are also the daughter of hearing me speak the truth, if only for once in my life, I feel bound to say that you are wrong in your surmise. I have not up to this regarded you as vain, brazen or forward."

"So say your tongue, but your eyes say something else," returns she, with a reticent but charming upturning of the shoulder. "Four lines, I think, I should like to see in your surmise. I have not up to this regarded you as vain, brazen or forward."

"My eye offends me then—shall I pluck it out?" asks Dalrymple, a slightly mocking expression in the feature in question. "Why should I? My eye thinks and means another? Be sensible, my little cousin. Am I so afraid of you that I should let you?"

"Lifting up her chin, and looking over his shoulder with an exaggerated air of one desirous of escape: "I should like to go home if grandpa—Ah! Dick—you!"

She grows suddenly radiant, and her face glows with the small and the already thus the violin too much for it, gives the free little fingers to the next ugly—a middle sized youth of the coming age, if delightful, countenance.

"Buried alive; genius for once in the shade. I've been commissioned to dig you out," says he, his face all one brilliant grin. "Lady Swandown said you were here, but that as Dalrymple was your companion, she—" He pauses, struck by a stony glance from the slender maiden before him.

"Please go on," says she, in a terrible voice. "Noel and I are quite longing to hear the end of that remarkable beginning of your. Why should Lady Swandown imagine that, because Noel was with me?" Here she pauses, and with hot cheeks turns angrily toward Dalrymple, as if hardly knowing how to go on.

"It is a conundrum! Never guessed one in my life. Give it up," says he promptly, gravely, but with the suppressed amusement in voice and face that always engages her.

"It is not a conundrum. It is an impossible thing to say the steady. She turns to Dick—"My eye—the brother of my dear friend, and lays her hand upon his arm.

"It should like some champagne—and grandpa," says the mollifying Dalrymple unmoved, addressing himself to the back of her departing head. She hears him, however, and unable to restrain the joy of battle turns once more.

"I require it," says she quickly, "considering I have been with you for five minutes." "Oh! I am, come on, do. I never saw such a girl as you are to-night," says Mr. Sylvester, giving her a little pull.

"Well, it is only when I am with Noel," she says, with a whimsical twist of her charming head, at last permitting herself to be drawn into the outer room.

"The whole face is eager, passionate and not without a touch of temper. The chin, a little pointed, is a feature in itself. There is determination in it, and a certain hardness, but on the whole it suits the mischievous face, and adds a touch of mystery to its beauty. With the bright eyes, and close cut Auburn curls, this pretty, half-frightened child looks more like a boy than a girl, and is almost ready to be almost read, but yet not read that has been mercifully saved from that."

And now the magic of her touch makes itself known; swelling, rushing through the room, her music is thrilling, thrilling the air, and rendering even the indifferent dumb. "What power! What genius! And as the first subdued but yet nervous tremor of the music fades, the artist alone remains. A smile that is almost serene, and that is almost unconscious, curves her lovely lips. That is the smile that is a life beyond all that the mere material world can give is beyond doubt.

And now the magic of her touch makes itself known; swelling, rushing through the room, her music is thrilling, thrilling the air, and rendering even the indifferent dumb. "What power! What genius! And as the first subdued but yet nervous tremor of the music fades, the artist alone remains. A smile that is almost serene, and that is almost unconscious, curves her lovely lips. That is the smile that is a life beyond all that the mere material world can give is beyond doubt.

JAPAN'S LITTLE NEGROES

BLACK PIGMIES OF HER NEWLY ACQUIRED TERRITORY

How Will the Japs subjugate Them? They are Wild and Fierce Fighters and are said to be very brave.

The Japanese will accomplish a task hitherto deemed hopeless if they succeed in subduing the tribes of savages and dwarfs which inhabit the interior of their newly acquired island of Formosa. These wild people have maintained their independence for centuries, refusing to be civilized or to submit to the yoke of the conquering invader.

They dwell in the fastnesses of the mountains, and some of them are head hunters. Bags of a peculiar network are manufactured by them expressly for the purpose of carrying heads secured in their warlike forays.

"I have heard of their chiefs when about to be executed by the Chinese saying: 'I have no fear of death; I have taken many heads and only wanted six more to make the hundred.'"

These savages are of Malay stock. They say that they did not belong originally in Formosa, and describe their origin by pointing to the south and showing copies of the customs of their ancestors are alleged to have arrived. Their like from nutty to gayly colored garments of their own weaving, made from the fibres of the banana and ramie plants. They tattoo their faces and build elegant huts of bamboo, over the doorways of which are hung as trophies skulls of wild boars and apes and sometimes tufts of Chinamen's pigtales.

It is only in their territory, which strangely dare to invade, that the Japs are bearing laurel groves. Consequently, the camphor can only be obtained with their consent, and money is paid to the chiefs to refrain from destroying the distilleries plant set up in their country. Nevertheless, trouble frequently arises and the stills are constantly being destroyed.

Several Formosan tribes are engaged in the camphor trade, and they negotiate with the savages through the intervention of the southern Chinese. The Japs, however, make advances to the Hillmen on condition that the latter shall set up a certain number of camphor trees, and supply monthly a fixed amount of camphor at a price agreed upon.

Formosa is 230 miles long and 75 miles wide being as big as Sardinia and Corica together. Estimates of the population vary from 2,000,000 to 3,000,000, because the number of savages is unknown. The soil is bursting with fatness, and no other crops are produced. It is a beautiful island, and a beautiful place to live in.

The eastern half of the island is a beautiful place to live in. The soil is bursting with fatness, and no other crops are produced. It is a beautiful island, and a beautiful place to live in.

What is

Castoria

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Opium, Morphine nor other Narcotic substance. It is a harmless substitute for Paregoric, Drops, Soothing Syrup, and Castor Oil.

It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curd, cures Diarrhoea and Wind Colic. Castoria relieves teething troubles, cures constipation and flatulency, and bowels, giving healthy and natural sleep. Castoria is the Children's Panacea—the Mother's Friend.

"Castoria is an excellent medicine for children. Mothers have repeatedly told of its good effect upon their children."

"Castoria is the best remedy for children of which I am acquainted. I hope that, as far distant when mothers will consider the real interest of their children, and use Castoria instead of the various quack nostrums which are destroying their loved ones, by forcing opium, morphine, soothing syrup and other hurtful agents down their throats, thereby sending them to premature graves."

DON'T DESPAIR

DODD'S KIDNEY PILLS

They have laid traps for the natives in order to catch them and make slaves of them. In this account the pigmies have made a practice of killing natives having occurred. At all events, there has been no settlement by foreigners, though Malaya and Chinese have for centuries frequented the islands for the purpose of gathering edible swallows nests.

ROAD IMPROVEMENT

REPAIRING COUNTRY ROADS.

Under the Present System a Great Deal of Money is Wasted.

A correspondent of the *Urbidge Journal* says that it has been noticed by all intelligent persons that the present system of road repair is not good. A great deal of money is spent while but very poor returns are realized. Pathmasters are appointed from among the farmers, and in nine cases out of ten the man appointed knows little enough about the work which he is appointed to oversee, and in many cases he knows almost nothing at all about the matter. Let me cite an instance. Not very far from here a farmer was appointed as pathmaster for last year. He had work to the value of fully \$500 to expend on his beat. It will be remembered that in June a very heavy rain fell. It was during the intervals of this rain that the above pathmaster had his statue labor performed. The result may be imagined. The labor expended was totally lost, and the road was left in a worse condition than it was before the rain. Thus not only was the money lost, but additional money had to be taken from the municipal funds to render the road passable.

Another phase of the subject may be seen in the irregular manner in which the road is done. The pathmaster calls on his men and some of them come when they don't. Then the overseer has to be continually running after the delinquents, and there is a great deal of time and money lost in this way. The road list has not been returned for three years. All the thanks that the pathmaster gets for doing his duty is the abuse of his neighbors, while the latter are interested in no friendly terms.

Then did anybody ever watch the men "working for the Queen"? Perhaps if the muscular force of the men, and the tongue going was applied to the use of the shovel there might be better results. In some cases this is not always the case. On some beats there are men who take no interest in keeping their section in good shape. But unfortunately these sections do not form a large part of the road. The interested persons have no incentive to make a thorough job of the work in hand, and the man who gets the least for his work is the one who is most likely to feel fully convinced that if the statute labor were abolished and a tax paid by the farmers of even fifty cents per day for every day of work done, he would be paid by him (the regular tax for unperformed statute labor being seventy-five cents), and the money applied under the guidance of skilled overseers, he would have far superior roads than we have at present. There may be some objections offered, but it seems to me that such objections may be easily overcome, and there are few farms that would not be benefited by a road which is in good shape. Our farms, for the want of labor, are doing a great many cases running down and becoming a burden to the man who owns them.

BROAD TRAIL WAGONS.

There is No Reason Why they Should Not be Used.

While the subject of good roads is being agitated in every part of the country those most interested in the subject are not doing their best to make the roads better by using narrow tires. The heavy loads are drawn over the mud roads on these narrow-tired wagons at deep rut rates, and in wet weather make them almost, and some times entirely, impassable. I have a sort of pity for a man who urges his team to make a muddy road, and who is blaming about the badness of it, when he might reduce the labor of his team from one-third to one-half by using wide tires. A very little additional expense in the purchase of the wheels and the great saving of time and temper. It is to be hoped that the first legislation looking to the improvement of the roads of the country will be one which is encouraging the use of wide tires, for one narrow-tired wagon will do more damage than a dozen with wide tires if the roads are at all soft. No one disputes the propriety of wide tires, and no one seems to have any good reason to offer why they should not be used. The farmers who follow precedent and go on using narrow tires because their fathers did before them. Lumbermen and freighters use wide tires almost exclusively, and are very busy doing so, but it seems that farmers do not care to economize in this direction. The condition of our roads costs more than any other thing that is wasted in this country, and the common use of wide tires would reduce this waste of energy to a large extent.—*American Farmer and Fanner*.

Potatoes Instead of Cedar.

The low price of cedar paving timber and railway ties of late years, says the *Manitowish Guide*, is leading some of our people to do a thing which is not only above subject with a considerable degree of earnestness, and already some of them are beginning to talk and figure on the profitable profits on a ton, fifteen to twenty acre field of potatoes, and reports say that one of our old timber buyers is talking up the practicability of making contracts for potatoes to be used as ties to be delivered at good shipping places, for which at least twenty-five cents could be paid in cash. This is a very good idea, and the price in the fall of the year is in the millions. The objection is often raised that a few hundred bushels would stock any market in the district, and that the potatoes might be taken more than a few hundred bushels to stock Chicago or a dozen other large cities and could be shipped to at a much lower rate of freight than they can from the east. The trouble is not that there are too many grown, but that there are too many that are not called for; then all that is needed is the quantity and we would soon have buyers.

Making Roads.

The best time for road work is after the spring rains have completed their work on the ground is then neither too wet nor too dry, and when dry weather sets in there is no use trying to work rutts. Road work in the fall is just as impracticable, because the track will be muddy until the freeze-up occurs and the following spring will be full of mud holes. For this reason the divide between the two roads is so that the main portion of the labor can be done after the crops are in. In every case of road work the road is made in the winter with them all the time. If men understand his business, and one superintendent cannot properly oversee more than one crew of men.

ALASKA'S GOLD FIELDS

RICH STORES OF THE YELLOW METAL YET TO BE MINED.

Miners Rush to the Yukon—Uncle Sam's Gold Experts to Visit the District This Summer and Make a Report—Great Discoveries.

Of all the world the mineralogical terra incognita is Alaska. That Uncle Sam's wealth in metals, if not yet in more precious stones, has long been known, says the *Urbidge Journal*. But up to this date these riches have remained unmined and not definitely located. Now prospectors are looking into that country in search of treasures silver and gold, and exact information on the subject is to be obtained by a Government expedition that is on the point of starting from Washington, headed by Dr. Becker and Hall. Thousands of miners have gone this spring into the interior of Alaska for the purpose of seeking the rich places found along the Yukon river. In many localities the surface gravel is rich in grains of gold. In fact there is plenty of the yellow metal, the only difficulty being to reach the diggings and get away with the stuff. The warm season in that latitude is so brief that the summer is a short one, and the winter is a long one. The prospectors must take advantage of its first opening to strike for his base of operations. He has to be on the point, for there will be no time to foot around and meditate, inasmuch as with a few weeks Jack Frost will arrive and the winter will be upon him. The prospecting of the Yukon is a very interesting and exciting of great interest to the people of this country, for there will be no time to foot around and meditate, inasmuch as with a few weeks Jack Frost will arrive and the winter will be upon him.

The yield of the placers must be remarkably rich in order to pay at all taking into view the shortness of the working season and the difficulty of obtaining provisions and other supplies in so remote a region. The miners carry their own gold to Victoria, Portland and San Francisco. Some of the most hardy of them have been seen in the interior of the Yukon, and the Alaskan natives. Along the Yukon river there is plenty of timber for building stores, and such apparatus as may be required for the wintering of the men. The Schvartsk expedition of 1891 was joined at Fort Selkirk by a prospector named Dwyer, who left the party at White River. Dwyer and his party, Selkirk he examined all the streams and found gold in every one of them. Frodo's plan of mining is carried on at Cook's lake and elsewhere along the coast. One of the richest gold mines in the world is at Juneau, on Douglas Island. The mine is owned by the Juneau Consolidated Gold and Silver Mining Company. It is a mine of low grade, averaging only about \$10 a ton, it is situated as to be easily and cheaply worked. The mass of ore is 400 tons, and the mine is worked by a small crew. The mechanical plant is the largest in the world, including a gigantic battery of 840 stamps and ninety-six crushers. The mine is worked by a small crew of men, and the output is about 100 tons of gold a month. The mine is situated on a hillside, and the ore is taken down to the mill by a system of inclined planes. The mine is worked by a small crew of men, and the output is about 100 tons of gold a month.

Another gold district of great promise is the neighborhood of Summit, sixty miles southeast of Juneau. The yellow metal has been found in several places in this district. The mine is owned by the Summit Gold and Silver Mining Company. It is a mine of low grade, averaging only about \$10 a ton, it is situated as to be easily and cheaply worked. The mass of ore is 400 tons, and the mine is worked by a small crew. The mechanical plant is the largest in the world, including a gigantic battery of 840 stamps and ninety-six crushers. The mine is worked by a small crew of men, and the output is about 100 tons of gold a month.

Another gold district of great promise is the neighborhood of Summit, sixty miles southeast of Juneau. The yellow metal has been found in several places in this district. The mine is owned by the Summit Gold and Silver Mining Company. It is a mine of low grade, averaging only about \$10 a ton, it is situated as to be easily and cheaply worked. The mass of ore is 400 tons, and the mine is worked by a small crew. The mechanical plant is the largest in the world, including a gigantic battery of 840 stamps and ninety-six crushers. The mine is worked by a small crew of men, and the output is about 100 tons of gold a month. The mine is situated on a hillside, and the ore is taken down to the mill by a system of inclined planes. The mine is worked by a small crew of men, and the output is about 100 tons of gold a month.

INSANITY.

ITS TREATMENT IS NOW BETTER UNDERSTOOD.

But to Wipe Off the Source from the Face of the Earth We Must Deal with Drunk and Immoral Marriages—Overwork a Cause of Insanity.

The future of the race depends on the future of its brain. There can be no doubt that the brain is the most important part of the human system, and it is the most delicate and the most susceptible to disease. The brain is the seat of the intellect, and it is the seat of the emotions. The brain is the seat of the will, and it is the seat of the conscience. The brain is the seat of the soul, and it is the seat of the spirit. The brain is the seat of the life, and it is the seat of the death. The brain is the seat of the love, and it is the seat of the hate. The brain is the seat of the joy, and it is the seat of the sorrow. The brain is the seat of the hope, and it is the seat of the despair. The brain is the seat of the faith, and it is the seat of the unbelief. The brain is the seat of the charity, and it is the seat of the selfishness. The brain is the seat of the truth, and it is the seat of the falsehood. The brain is the seat of the good, and it is the seat of the evil. The brain is the seat of the light, and it is the seat of the darkness. The brain is the seat of the life, and it is the seat of the death. The brain is the seat of the love, and it is the seat of the hate. The brain is the seat of the joy, and it is the seat of the sorrow. The brain is the seat of the hope, and it is the seat of the despair. The brain is the seat of the faith, and it is the seat of the unbelief. The brain is the seat of the charity, and it is the seat of the selfishness. The brain is the seat of the truth, and it is the seat of the falsehood. The brain is the seat of the good, and it is the seat of the evil. The brain is the seat of the light, and it is the seat of the darkness. The brain is the seat of the life, and it is the seat of the death. The brain is the seat of the love, and it is the seat of the hate. The brain is the seat of the joy, and it is the seat of the sorrow. The brain is the seat of the hope, and it is the seat of the despair. The brain is the seat of the faith, and it is the seat of the unbelief. The brain is the seat of the charity, and it is the seat of the selfishness. The brain is the seat of the truth, and it is the seat of the falsehood. The brain is the seat of the good, and it is the seat of the evil. The brain is the seat of the light, and it is the seat of the darkness. The brain is the seat of the life, and it is the seat of the death. The brain is the seat of the love, and it is the seat of the hate. The brain is the seat of the joy, and it is the seat of the sorrow. The brain is the seat of the hope, and it is the seat of the despair. The brain is the seat of the faith, and it is the seat of the unbelief. The brain is the seat of the charity, and it is the seat of the selfishness. The brain is the seat of the truth, and it is the seat of the falsehood. The brain is the seat of the good, and it is the seat of the evil. The brain is the seat of the light, and it is the seat of the darkness. The brain is the seat of the life, and it is the seat of the death. The brain is the seat of the love, and it is the seat of the hate. The brain is the seat of the joy, and it is the seat of the sorrow. The brain is the seat of the hope, and it is the seat of the despair. The brain is the seat of the faith, and it is the seat of the unbelief. The brain is the seat of the charity, and it is the seat of the selfishness. The brain is the seat of the truth, and it is the seat of the falsehood. The brain is the seat of the good, and it is the seat of the evil. The brain is the seat of the light, and it is the seat of the darkness. The brain is the seat of the life, and it is the seat of the death. The brain is the seat of the love, and it is the seat of the hate. The brain is the seat of the joy, and it is the seat of the sorrow. The brain is the seat of the hope, and it is the seat of the despair. The brain is the seat of the faith, and it is the seat of the unbelief. The brain is the seat of the charity, and it is the seat of the selfishness. The brain is the seat of the truth, and it is the seat of the falsehood. The brain is the seat of the good, and it is the seat of the evil. The brain is the seat of the light, and it is the seat of the darkness. The brain is the seat of the life, and it is the seat of the death. The brain is the seat of the love, and it is the seat of the hate. The brain is the seat of the joy, and it is the seat of the sorrow. The brain is the seat of the hope, and it is the seat of the despair. The brain is the seat of the faith, and it is the seat of the unbelief. The brain is the seat of the charity, and it is the seat of the selfishness. The brain is the seat of the truth, and it is the seat of the falsehood. The brain is the seat of the good, and it is the seat of the evil. The brain is the seat of the light, and it is the seat of the darkness. The brain is the seat of the life, and it is the seat of the death. The brain is the seat of the love, and it is the seat of the hate. The brain is the seat of the joy, and it is the seat of the sorrow. The brain is the seat of the hope, and it is the seat of the despair. The brain is the seat of the faith, and it is the seat of the unbelief. The brain is the seat of the charity, and it is the seat of the selfishness. The brain is the seat of the truth, and it is the seat of the falsehood. The brain is the seat of the good, and it is the seat of the evil. The brain is the seat of the light, and it is the seat of the darkness. The brain is the seat of the life, and it is the seat of the death. The brain is the seat of the love, and it is the seat of the hate. The brain is the seat of the joy, and it is the seat of the sorrow. The brain is the seat of the hope, and it is the seat of the despair. The brain is the seat of the faith, and it is the seat of the unbelief. The brain is the seat of the charity, and it is the seat of the selfishness. The brain is the seat of the truth, and it is the seat of the falsehood. The brain is the seat of the good, and it is the seat of the evil. The brain is the seat of the light, and it is the seat of the darkness. The brain is the seat of the life, and it is the seat of the death. The brain is the seat of the love, and it is the seat of the hate. The brain is the seat of the joy, and it is the seat of the sorrow. The brain is the seat of the hope, and it is the seat of the despair. The brain is the seat of the faith, and it is the seat of the unbelief. The brain is the seat of the charity, and it is the seat of the selfishness. The brain is the seat of the truth, and it is the seat of the falsehood. The brain is the seat of the good, and it is the seat of the evil. The brain is the seat of the light, and it is the seat of the darkness. The brain is the seat of the life, and it is the seat of the death. The brain is the seat of the love, and it is the seat of the hate. The brain is the seat of the joy, and it is the seat of the sorrow. The brain is the seat of the hope, and it is the seat of the despair. The brain is the seat of the faith, and it is the seat of the unbelief. LOCAL ITEMS.

New hay brought \$13 per ton at Belleville last Saturday.

There are at present confined in the county jail eight men and three women.

The steamer Varuna has commenced her Saturday trips to the Thousand Islands.

The number of creameries in the province of Ontario has doubled within three years.

A new dental college will be erected in Toronto at a cost of forty thousand dollars.

A large crowd went out to Varsity Lake last Saturday night to attend the big camp meeting.

James Connors stood his trial at Hamilton and the magistrate let him off on suspended sentence.

The county council chambers are being papered and calomined. Such gross extravagance.

The total money given for all purposes by all the churches in the Bay of Quinte conference was \$99,500 last year.

A. E. Ingram, of the Toronto Mail and Empire, was in town on Tuesday in the interest of that journal.

F. S. Solmes and W. W. Reid shipped from Picton station alone over 47,000 lbs. of live hogs during the past two weeks.

The New Orleans Jubilee Singers will continue their camp meetings at Macle's Point, Sydenham, commencing Sunday, July 14.

The wife of Mateo Jaures, living near Silas, in Mexico, has given birth to five children at once. They are all boys and are thriving.

John Mack, the horse thief who escaped from Napanee jail on the 17th of June, has been arrested for grand larceny at Baldwinville, N. Y.

The Express states that the music of the Citizens' Band of Deseronto at the Napanee celebration last week was excellent and much appreciated.

Mrs. J. M. Poltras and family are again camping out this season at Butternut Cove one of the coolest nooks in the long reach of the Bay of Quinte.

Of over one thousand appointments made by the different stationing committees of the Methodist churches in Canada this year only two were protested.

A plumb line suspended a few feet from the side of a large building inclines a little from the perpendicular, because the weight is attracted by the edifice.

The Grand Encampment of Oddfellows will hold its session at Picton on July 23 and 24th, the cantons will march in procession and give an exhibition of fancy drills, etc.

Among the many improvements which Supt. Sherwood has effected of late along the line of the Bay of Quinte Railway is the lowering of Miller's grade near Napanee Mills.

The Havlock Eclipse comes to hand. It is a neatly printed little journal. H. B. E. Dryden, formerly of this office, is the publisher. We wish him all success in his new venture.

The Soes of England of Belleville, ran their excursion to Kingston and the Thousand Islands on Wednesday, July 31st. The train stops at stations between Belleville and Kingston.

Through carriages driving a load of Canadian Foresters from Napanee had a complete upset at the corner of Second and Thomas streets last Sunday afternoon. Their vehicle was badly wrecked.

The total income of the Presbyterian Church in Canada last year was \$2,167,593. This is the largest amount ever raised in one year, although the year was marked by general business depression.

When is London to be connected by telephone with the outer world? A great many business men in the district are asking that question. Few villages of its size are without this means of communication.

The imperial parliament was dissolved on Monday and the election campaign is in full swing. The towns and boroughs will poll to-morrow and London on Monday. The county constituencies will poll their votes next week.

At Belleville market last Saturday the following prices prevailed: Chickens 45c to 55c, eggs 11c, butter 20c, cherries 12c, box, raspberries 12c, black berries 12c, green peas 12c, potatoes 65c bag, new potatoes 12c quart, tomatoes 40c doz.

L. Hopkins, of the City Grocery, shows us a very handsome and ingenious calendar which he lately received from his brother in New York. It is in the shape of a large fire cracker and is so arranged as to be a useful desk calendar. It is manufactured by the Baldwin & Gleason Co., Ltd.

Next Thursday evening is the regular meeting of the Town Council.

The Deseronto carwoks are building four motor cars for Oshawa and some trucks for Belleville.

Cockshutt's J. C. G. Riding plow and Twin plows are the best and cheapest. For sale by Miles S. Plumley, Napanee.

There has been a great falling off in the tonnage carried along the Erie canal this season. This is due to railway competition.

James Stewart, one of the Rathbun Company's men, was somewhat injured by a break of a jam of logs at Leslie's mill, Belleville.

At Belleville market on Tuesday 3314 boxes of white and 845 of colored cheese were offered. Sales 645 white and 185 colored at 8c.

At the recent promotion examinations 225 passed in Deseronto, while Belleville passed 285. Belleville has nearly three times the population of Deseronto.

E. S. Westmorland has been shipping cattle to the Montreal market and will make another shipment on the 20th. He is paying cash for fat heavy cattle ready for market.

Miss Louisa Cocking, late of Deseronto, had a narrow escape from suffocation by gas at the residence of Mr. Leslie, Kingston, during the past week. It was a very close call.

The party who by mistake took an umbrella from the Methodist church on the evening of the last meeting of the Epworth League will oblige by leaving it at this office.

Railway people state that the Grand Trunk has not been as busy in twelve years as far as freight is concerned. It has been found necessary to promote a number of brakemen to the position of conductor and a large number of new hands have been taken on.

It is to be hoped that the next county council of Hastings will be progressive enough to build a house of industry. Such an institution is a necessity in this county. The present mode of caring for the poor is long since out of vogue in intelligent communities.

The fire loss of the United States and Canada for the month of June, as estimated from daily records, amounts to \$3,223,000, and for the six months just past \$66,497,600. During June there were 162 fires of a greater destructiveness than \$10,000 each. The principal fire during June was that at San Francisco.

The records of the Pennsylvania Hospital of the Insane, dating from 1841, show that of the 10,000 patients treated 4,500 were cured and 2,705 were improved. There is a lesson of hope in these statistics. Insanity is not the incurable disease it has been so generally supposed to be in the past.

Notice has been received from the Post Office department at Ottawa, that a system of parcel post has been established between the Dominion of Canada and the colony of New South Wales. The rate for such parcels will be twenty cents for the first pound, and sixteen cents for every additional pound.

Robert Wiseman and William Lynch paid a visit the other evening to "Divinity" camp near Bogart's wharf. They were most hospitably entertained, the supplies in the latter being apparently inexhaustible. Buttermilk is kept on tap presumably in a large cask judging from the quantities quaffed during that evening.

Oswego was visited by a disastrous fire last Saturday morning. Wallace's department house, Kingston's pharmacy, Burden & Maraden's drug store, Miner's grocery and J. I. Gibson and Madigan's shoe store were burned. Help was summoned from Syracuse and Fulton. Losses \$105,000; insurance \$45,000. Mrs. Isaac Bond perished in the flames.

There has been great political excitement this week owing to a ministerial crisis at Ottawa, the cabinet being divided.

In reference to the Manitoba school matter introduced this session and the majority wishing it deferred until January. The three French members of the government tendered their resignation but an arrangement was effected yesterday and peace again reigned.

The honor of the Victoria cross has, for the first time in the history of that order, been conferred upon a colored man—a coal-black negro who saved the life of his superior officer on the field of battle by throwing himself in front of his commander and receiving in his own body the bullets that would otherwise have struck his chief.

The dark-skinned negro is a corporal in one of the West Indian regiments of the British army.

Fire at Napanee Mills. A fire occurred at the Napanee cement works, Napanee Mills, last Saturday evening resulting in the destruction of the building containing the Diablock mill. The fire broke out after supper. Supt. Allen and the men of the village by great exertions and the men of the village by great exertions prevented the spread of the fire to other buildings. Some inconvenience will follow, but the building will be speedily rebuilt, chiefly of terra cotta, so as to render it fire proof.

Kingston Presbytery. A meeting of the Presbytery of Kingston was held at Madoc on Tuesday. Rev. Mr. Findlay, superintendent of missions, was present.

The home teaching report showed that all the twenty-one mission stations within the limits of the presbytery are supplied and that excellent work is being done. Rev. D. MacKenzie accepted a call to Winchester. Rev. J. L. George tendered his resignation of the John street congregation, Belleville. A meeting of Presbytery will be held at Belleville on the 23rd inst., to consider the same.

Games To-Day. Deseronto and Napanee cricket clubs will play to-day on the grounds of the Deseronto club. Deseronto and Bath baseball clubs will try conclusions in the driving park.

1000 Island Excursion. The annual church excursion to the 1000 Island, conducted by Revs. Crossley and Stratton, will take place on Saturdays, Aug. 10th and 17th. The two best days of the Park season.

Annual Picnic. The annual picnic of the West End Mission Sunday school will be held on Thursday, July 25th. A steamer has been chartered and a picnic ground selected at a point down the bay.

Fraternat Visit. The members of Belleville lodge of A. O. U. W. will pay a fraternal visit to Quinte lodge, No. 215, on the evening of Friday, 19th inst. Dr. Walker, D. D. G. M., will be one of the delegation.

The Glorious Twelfth. With favorable weather there will be a great turn out at Belleville to-day, the Orange celebration at that city being on a most extended scale. Local lodges will participate in the event.

Close Season. An order-in-council has been passed prescribing the close season for certain kinds of fish, as follows: Salmon trout, to 30th Nov.; white fish, to 30th Nov.; speckled trout, 15th September to 1st of May.

Entrance Exams. Twenty-four out of twenty-eight pupils of Principal Cole's department who wrote at the recent high school entrance examinations have passed, subject to the approval of the department. This beats all previous records.

Business Changes. During the building of the Oliver block the business occupants will be found in other quarters. L. Hopkins will be found in part of Mr. Stoddard's shop; G. E. Snider is located in the sample rooms of the Deseronto house. Miss Smith shares part of Miss Vassall's shop.

Cavalities. R. H. Bogart, had his hand lacerated by a knife which he held in one hand while putting on a belt in the sack factory, necessitating repairs by Dr. Vandervoort. Robt. Colbertson sustained an ugly and dangerous wound a pike pole having been run into his knee. Dr. Newton is attending him. D. McBride lost a part of a dexter finger while another was lacerated by a saw in the sack factory on Thursday of last week. Dr. Vandervoort dressed the wound.

Banqueted. Dr. Walker, of Belleville, D. D. G. M., was banqueted last Saturday evening by the members of Shannaville lodge, A. O. U. W. The entrance examination was given by a local master workman. The dinner was given at Davidson's hotel and was a great success, visitors from other lodges being also present. Speeches eloquent and witty were delivered and Dr. Walker's praises were set forth in becoming terms. Dr. Walker in a neat speech thanked the brethren for the compliment paid him and extolled the order as one deserving of success.

Principal Cole's Resignation. G. A. Cole, Principal of the Public school, has resigned his position. It is his intention to retire from active school work for a year in order to pursue a course of studies at some seat of learning in order to more fully qualify himself for the teaching profession. Mr. Cole came to Deseronto from Madoc over seven years ago. He has proved himself a very capable and successful teacher and the present high standing of the Deseronto public school is in large measure due to his untiring labor. When he came to Deseronto there were only six teachers in the public school, now there are eleven. As is evidenced by the recent promotion examinations the past term has been one of great progress. The entrance examination will show that Mr. Cole's department has done exceedingly well. The public generally will regret Mr. Cole's removal. The school board accepted his resignation with reluctance. It is his intention to leave Deseronto in the course of two weeks.

Foresters at Church. The members of Court Quinte, No. 1, C. O. F., assembled at their hall last Sunday afternoon and with members from Napanee and other places, marched in procession to the Church of the Redeemer to attend divine service. The entrance examination was given by a local master workman. The dinner was given at Davidson's hotel and was a great success, visitors from other lodges being also present. Speeches eloquent and witty were delivered and Dr. Walker's praises were set forth in becoming terms. Dr. Walker in a neat speech thanked the brethren for the compliment paid him and extolled the order as one deserving of success.

Dougherty 101, James Richardson 97, Arthur Wilkins 88, Slimmie Mitchell 128, Fred Whiting 98, Antoine Audin 92, Mary W. Slater 87, Number passed at Easter 27.

MISS MCILLAN'S ROOM.

Part II to Second Book. Marks necessary to pass 80.
Mabel Barber 307, Lizzie Bald 309, Henry Baker 329, Clara Barnett 280, Ira Bassett 318, Bertha Bolcher 330, Annie Boyette 310, Clifton Black 284, Claude Bogart 346, Annie Brough 326, Eva Cook 238, Harry Cook 327, Walton Cronk 275, Ella Deane 314, Leonard Guyon 310, Arthur Haynes 312, Susie Henry 293, Joseph Houle 362, Frankie Jamieson 282, Laura Maloney 340, Eddie Macdonald 334, Lena Monaghan 329, Lottie Morison 322, Louis Oliver 341, Annie Payette 287, Wilfred Powlis 315, Claude Reynolds 306, Ena Richardson 342, Lillian Simons 340, Jessie Sharp 335, Myrtle Smyth 328, John Seider 364, Arthur Valieu 359, Evelyn Whitten 389, Bertha Culbertson 314, Melvin Woodcock 301.

MISS PHIPPS'S ROOM.

Junior II to Senior II. Marks necessary to pass 80.
Myrtle Bogart 404, Cora Brayne 474, Sammy Brown 460, Norman Beasley 425, Robbie Cole 463, John Carroll 345, Arthur Clarke 370, Harold Dougherty 516, Marney Dean 507, Harold Davey 477, George Field 329, Harry Gorman 518, George Gordon 471, James Gartland 433, Eva Harrison 488, Fred Harbard 452, Ethel Irvine 462, Marney Jones 382, Mabel Lindsay 440, Charley Macdonald 478, Charley McLaughlin 492, Jessie Montgomery 410, Bridget Macdonald 491, Wilbur Moore 468, Annie Morrison 418, Ethel Taylor 468, Patrick Nolan 416, Frank O'Connor 349, Willie Pearson 481, John Putras 453, Harry Perry 380, Clarence Rorke 455, Frank Spring 477, Edith Staines 300, Willie Smart 440, Winnie Starr 412, Willie Sule 482, Thomas Warren 472, Gertrude Wilson 535, Jennie Woodall 441, Ida Wright 422, Lizzie Wilson 428, Gertrude Wilkes 414.

MISS ANDERSON'S ROOM.

Senior II to III. Marks necessary to pass 80.
Annie Akey 571, Clayton Brown 566, Percy Beasley 487, Frank Britton 472, Bertha Foster 467, Frankie Field 616, Jennie Graham 418, Cassie Hunt 509, Blair Leggett 442, Herbie Luffman 438, Hattie Leonard 433, Mabel McGaw 433, Campbell Macdonald 396, John McNeil 404, Frank McHenry 409, Ethel McNeil 410, Alice Rogers 460, Annie Stewart 413, Howard Taylor 496, Alex. Terrier 431, Emma Terran 463, Gordon Thomas 458, Kate W. Woodall 535, Pearl Young 471, Reggie Slaves 557, Joseph B. Louis 503, Harold Woodall 582.

Junior III to Senior III. Marks necessary to pass 80.

Annie Culbertson 571, Beatrice Fellingwell 562, Edith Frigle 110, Leo Snider 518, Reggie Slaves 557, Joseph B. Louis 503, Harold Woodall 582.

MISS PEARCE'S ROOM.

Junior III to Senior III. Marks necessary to pass 80.
Carrie Brayne 623, Leo. Culhane 719, Ethel Foster 487, Leo. Gault 645, Alice Keator 731, Mary Murrain 707, Elsie Stover 619, Ernest Watson 687.

III to IV. Marks necessary to pass 80.

John Bain 724, Pearl Bisset 615, Joseph Brough 810, Annie Cuth 837, Charlie Cole 780, Albert Caughlin 637, Norman Dean 861, Annie Dunwoodie 643, Jack Elliott 761, George Farrell 639, Frank Fleming 825, Katie Ehl 816, Jennie Harvey 764, Theresa McNeil 744, Cleary McNeil 628, Ethel McKee 678, Fred McNeil 807, Lottie Newton 731, Ella Richardson 759, Bert Rorke 744, Grace Smith 813, Ethel Scott 758, Mabel Scott 785, Wm. Vandervoort 716, Willie Wilson 842, Lena Warren 688, Annie Maloney 660.

MISS ROBERTSON'S ROOM.

Junior IV to Senior IV. Marks necessary to pass 80.

Annie Macleod 512, Adelle Anderson 458, Annie Dalton 444, Emma Barber 495, Eliza Hingley 403, Ernest Chapman 507, Frank Burt 421, Fred Elliott 515, Grace Hingley 557, Gertrude Leggett 564, Gertrude Booth 439, Jennie Rayburn 497, Jennie Baker 491, James Warden 490, James Murray 465, John Stewart 621, Laura Stewart 460, Laura Guyon 429, Leah MacNeil 447, Lily Warden 632, Laura Moore 480, Lena Richardson 601, Lottie Cronk 591, Lulu Scott 535, L. J. Fretz 516, Mary Wilson 626, Mary Robitaille 441, Naomi Stafford 658, Nellie Lloyd 602, Nellie Prickett 418, Nellie Bassett 430, Ralph Vandusen 446, Stella Oliver 608, Tottie Hall 608, Walter McMaster 636, Willie Stanton 440.

ETHEL STANTON passed 225, or about fifty more than in any preceding half year.

METHODIST SUNDAY SCHOOL PICNIC.

The Methodist Sunday School has arranged to hold its picnic for 1895 at the Ten-wind grove, on Wednesday, July 17th. To this beautiful spot an excursion will be run per the Bay of Quinte Railway by a special train which will leave Deseronto at 7:45 a. m. The fares for the round trip are as follows: From Deseronto, Napawan, Newburgh and Napawan Mills, 40c; for intermediate stops, from Camden Pass 50c; for Deseronto, Napawan, Enterprise and Moscow 25c; children 15c.

Amuse and comfortable accommodation are provided for all who wish to make a picnic. The train runs directly through the grove and, therefore, excursions need have no fear of a train wreck. Baskets are fully labeled and delivered at the hour and will be well cared for until the train reaches the grove, when they should be at once claimed by owners. Companies who thoroughly understand their business are working industriously and guarantee a day's sport which will not likely be repeated this year.

This is the picnic which is always well attended by the masses from Deseronto and from the surrounding towns and country. Let business be suspended on the 17th inst. and let all participate in the enjoyment of this beautiful occasion. No one who has the ticket and joins the party, will have the least cause of regret.

NEWS OF THE DAY.

The Canadian rifle team has taken up quarters at Bally.

The sea serpent exhibited himself to two fishermen near Hamilton Beach.

James Wall of Hamilton was remanded for a week on the charge of shooting James Neslane.

Mr. Chris Greaves, a well-known hotel man of Montreal, shot himself dead with a revolver.

Mrs. Tobias Prince of Ancaster was found dying on the roadside a short distance from her home.

Mr. Williams Barnes of Woodstock, died from the effects of chloroform during a dental operation.

A crowd of tramp at New Hamburg were arrested for trying to take forcible possession of G. T. P. Railway.

Various charges against the Chief and all the members of the Brookville police force are being investigated.

Westworth County Council is taking legal steps to separate from Hamilton in regard to the administration of justice.

Gen. Lord Roberts has declined the post of Governor-General of the British Empire, according to The Manchester Guardian.

Five persons were drowned in Lake George, Wisconsin, by the swamping of the steam launch Despatch in the tornado which swept over the section.

A French paper reports the Prime Minister of Spain as saying that he will not see any operations in Cuba for the present owing to the exactions of the climate.

The traffic arrangement of the Canadian Pacific, New York Central and Michigan Central railroads over the Toronto, Hamilton & Buffalo line has been concluded in New York.

There was a sharp break in the prices of wheat in Chicago Monday, the cause being the continued liquidation of long wheat by commission houses. Crop reports from the western States were favorable.

ST. MARK'S SOCIAL.

A very successful social was held in St. Mark's Hall on the evening of Wednesday 10th inst., under the auspices of the Ladies' Aid Society.

The committee proposed to have the social on the lawn but as the evening was cool the ladies preferred staying in the hall. The ice-cream and refreshment department was under the able management of Mrs. H. H. Leslie and Miss Oliver. The following programme was provided and well rendered:—Chairman's address: Scarf drill, seven young ladies; Male quartette, "Solace a Farwell," Messrs. Briscoe, Hendricks, Lamberton and Fowler; Solo, Rev. J. J. Coleman; Solo, "When Spenser Build," Mr. Briscoe; Male Quartette, "Slumber Dearest," Messrs. Briscoe, Hendricks, Lamberton and Fowler; Reading, "Babies," Rev. J. J. Coleman; and Scarf drill.

T. H. Nasmith made an admirable chairman and in a short and pithy address stated that the purpose for which the social had been held was to help pay off the building debt of the church, and at the same time spread a pleasant social evening.

The Scarf drill was highly appreciated and called forth the most happy applause. The young ladies who took part were the Misses Kate and Lizzie Field, Miss Leslie and Annie McLaughlin. Miss Nasmith, Miss Mabel Stuart and Miss Hoppes while Miss Donald skillfully played the accompaniment. They did excellently well and won for their performance with graceful and rhythmic motion. The gentlemen who formed the quartette were in good voice and rendered their pieces in the most excellent manner. Miss Forbes' solo met with due appreciation and applause.

Rev. J. J. Coleman made some very nappy remarks in the course of his address which were short and to the point. He said he could not plead that he was surprised to be called upon to make an address for he had had two weeks warning. He said speech making was not his strong point; it made him feel sorry that he had to do it for himself. He congratulated the ladies on the number of people they had secured for their social. The audience looked much larger from the platform than from the back of the hall. He complimented the ladies on the good things they had provided, and said they evidently understood the importance of the old adage, that the way to a man's heart was through his wife's hand. He said that the social was a good means of making people know and like each other. In conclusion he thanked them very much for the kind welcome he had received since coming to this parish.

Mr. Briscoe's solo "When the Sparrows Build" was well rendered and the audience, after "Slumber Dearest" by the quartette, Rev. J. J. Coleman gave a humorous reading entitled "Babies," which was very amusing. We must not forget to mention the reading by Mr. George E. Deane of "A Child's Dream of a Star" (Chas. Dickens). Mr. Deane has a splendid voice and he thoroughly delighted the audience. His attention of the audience and received well merited applause at the conclusion of his piece. The audience were pleased to see Mrs. H. J. Aylworth ascend the platform to play the accompaniment for her niece, little Aline Anderson. Miss Anderson sang her song very prettily and with effect. A second performance of the scarf drill concluded a most enjoyable program.

The piano used was a "Kara" from the warehouse of Mr. Day.

The committee think of holding similar socials every two weeks, and as the price is low, and the refreshments are good, for two the price of admission including ice cream and cake (there is no reason why they should not be successful in attracting large audiences).

G. E. Seider is holding a big removal sale as follows: From Deseronto, Napawan, Newburgh and Napawan Mills, 40c; for intermediate stops, from Camden Pass 50c; for Deseronto, Napawan, Enterprise and Moscow 25c; children 15c.

Amuse and comfortable accommodation are provided for all who wish to make a picnic. The train runs directly through the grove and, therefore, excursions need have no fear of a train wreck. Baskets are fully labeled and delivered at the hour and will be well cared for until the train reaches the grove, when they should be at once claimed by owners. Companies who thoroughly understand their business are working industriously and guarantee a day's sport which will not likely be repeated this year.

This is the picnic which is always well attended by the masses from Deseronto and from the surrounding towns and country. Let business be suspended on the 17th inst. and let all participate in the enjoyment of this beautiful occasion. No one who has the ticket and joins the party, will have the least cause of regret.

Weak, Tired, Nervous

Women, who seem to be all worn out, will find in Hood's Sarsaparilla, made rich and healthy by Hood's Sarsaparilla, permanent relief and strength. The following is from a well known nurse:

"I have suffered for years with female complaints and kidney troubles and I have had a great deal of medical advice during that time, but have received little or no benefit. A friend advised me to take Hood's Sarsaparilla and began to use it together with Hood's Pills. I have realized from anything else I have ever taken. From my personal experience I believe Hood's Sarsaparilla to be the most complete blood purifier." Mrs. C. CROMPTON, 111 Cumberland St., Toronto, Ontario.

Hood's Sarsaparilla

Is the Only True Blood Purifier

Prominently in the public eye today.

Hood's Pills may be had, or sent by mail, in any amount.

THE JULY FASHIONS

WHAT THE SMART COUNTRY WEDDINGS HAVE BROUGHT FORTH.

The Favorite Fabrics of the Summer for

Tailor-Made Gowns The Parasols are

Not Quite So Popular as Formerly—The

Longed-for Perfect Gown.

The smart country weddings which

have taken place during the summer

months have brought forth many

fashionable gowns, and which were

furnished occasion for the display

of the most charming gowns imaginable.

Dressmaker's Magazine for July.

Light-colored fancy taffetas, crepons,

organdies, malles, and dotted Swiss

are the fabrics most employed for these

gowns, with, here and there, an occasional

piece of handsome grenadine or ac-

cord-plaid cloth.

Taffeta in tiny checks and fine stripes

or in the chine designs of blurred flowers

in faded colors are made up in the most

refined and delicate styles. The skirts are

trimmed with ribbon, and measure from

six to six and a half yards, fitted trimly

around the waist, with just a little full-

ness at the back held in tiny box-plats,

and is either round or slightly pointed;

while the front is very full and drooping.

It is often trimmed with many vertical

rows of narrow lace, yellow or black, and

often than not, opens in the centre to

show a tucked and lace-filled piece of

white linen lace. Delicate little points

of tulle or the white lawn turn down

over the silk or ribbon collar, and form

the cuff of a long sleeve; or if the gown

is short, the sleeves are trimmed with

the tucking turns up over the folded silk

band into which the fullness of the

sleeve is gathered.

A black lawn gown has two insertions

of fine French lace above a broad hem,

and is hung over a skirt of heliotrope

silk, and the sleeves are trimmed with

the tucking turns up over the folded silk

band into which the fullness of the

sleeve is gathered.

A black lawn gown has two insertions

of fine French lace above a broad hem,

ALL SORTS OF SACHETS.

Lovely Little Ones Can Be Made Out of

Crepe Tissue Paper.

Better than boxes for some small fami-

ly belongings as faces handkerchiefs and

gloves with their places in bureau drawers

are large flat sachets folding only once.

Their convenience and neatness are just

as great as those of the simply made

drawer sachets with no ornaments

but bows of ribbon and such as these even

the busiest woman can contrive to pro-

vide herself with while the woman of

leisure (does she exist in these days?)

OILCAKE.

At present prices of mill feed, Oilcake is the best value in the market. A practical dairyman of our county, operating a creamery of his own, assures us that one ton of Oilcake is worth more as a milk producer than three tons of bran. He knows whereof he speaks, as we have sold him several tons this season.

Bran, Shorts, and Cracked Grain always on hand. Special quotations in Car lots.

J. C. HANLEY & CO.,

Grocery, Feed and Seed Merchants, BELLEVILLE, ONTARIO

The Tribune.

FRIDAY, JULY 19, 1895.

LOCAL NOTICES.

L. Hopples, issuer of marriage licenses. All business strictly confidential.

Visitors to Kingston will note that the "Vindicator" is the headquarters of all the stage lines. Deseronto, Napanee and Bath visitors will receive special attention.

A Shorthand & Typewriting School has been opened in town. For information call at rooms in Mrs. Davern's residence, Corner Fourth and Thomas Sts., near Methodist Church.

Mr. F. S. Hawkins, Chattanooga, Tenn., says, "Shiloh's Kidney saved my life. I consider it the best remedy for a debilitated system I ever used." For Dyspepsia, Liver or Kidney trouble it excels. Price 75 cts. Sold by W. G. Egar.

When you require glasses and desire properly fitted ones have our Optician test your eyes free of charge before buying glasses at all. It will pay you.

ANON & CO.,
272 Front St.
Belleville.

LOCAL ITEMS.

No woman ought to find it difficult to laugh in her sleeve these days.

Sept. Irvine advertises for a number of girls to work in the match factory.

N. B. Colcock has sold the Brookville Times to Arthur T. Wingless and W. J. Henry, of Toronto.

The English team defeated the Canadian team in the fifth competition for the Knapdale cup by a score of 638 to 618.

At Belleville on Tuesday there were boarded 2,650 boxes of white and 540 boxes of colored cheese at 7-3-4 to 7-7-50.

There are vast numbers of vacant houses in Toronto and times are dull there and will likely continue so for the rest of the year.

On a recent trip up the Bay of Quinte a fire was discovered near the wharves on the steamer Spartan. It was, however, extinguished without serious damage.

Isaac Powles, of the Reserve, showed green corn on the market on Tuesday, the first of the season. Mr. Powles is one of the most progressive farmers of this district.

Principal Knight left this week for Toronto where he will spend a month examining papers of candidates who wrote at the recent examinations for teachers' certificates and matriculation.

Mr. Brule of the High school returned home last Saturday from Toronto where he had been for some time examining drawing and book-keeping examination papers for the department of education.

Mr. J. S. Hampton and family and Miss Maggie Stoddart are (camping out near Huff's dock down the bay. "Telegraph" camp is the designation of their resort. Mr. Hampton has shot fourteen squirrels up to date.

The R. & O. boats are experiencing difficulty running the rapids, the water being so low in the St. Lawrence. The Eskimans take the passengers from Brookville down as she draws only four feet of water.

The Hero last Saturday reduced her fare from 35c to 25c from Kingston to the Thousand Islands and as a result she carried large crowds. The fares of all the vessels on the Bay of Quinte have always been too high and should come down.

The Merrit carried a Royal Tompkins excursion from Pictou to Trenton yesterday. A great many from Deseronto went to the dock to accompany the party, but only twenty-five could be taken, the boat having her complement of passengers.

The yacht Orpha arrived in port from Napanee on Monday with the following crew: Messrs. Maybaw, Miller, Taylor, Lockridge, Cheatham, Orange, Boyes, captained by Freeman Huffman. They left the same day for the Thousand Islands.

A large crop of weeds and thistles on the new street west of the cricket ground should be cut down forthwith. Several citizens have called to express their approval of that letter in last week's TRIBUNE in reference to weeds. The streets committee should take this in hand.

Nothing so moving in ye olden times as the engineering feat which Chicago contractors are about to undertake. They propose to move the Immanuel Baptist church 50 feet. It is a stone structure, one of the largest churches in the city, and has a spire 150 feet high. After the building has been moved it will be raised six feet.

The burnt district at Tamworth is gradually being built up. C. O. Corral is putting up a fine brick store and neat brick residence. Mr. Prizella's house is about completed. The Sheffield council is putting up a town hall 32x60 feet. It will be of brick and rest on a stone foundation. There will be a look-up and other conveniences. Chas. Shields is also building a brick store.

By the opening of a lamp from a table the residence of R. J. Phillips, Centre street, had a narrow escape from destruction by fire on Wednesday evening, between nine and ten o'clock. The lamp fell off a table and in a twinkling the flames spread. Mr. Phillips gave an alarm and neighbors rushed in and with pails of water extinguished the flames. Two rooms downstairs were badly damaged.

The I. O. O. F. grand lodge of Ontario will meet in Hamilton on Aug. 14, 15, and 16. It is expected that there will be between 400 and 500 representatives present. Incidental to the grand lodge meeting there will be a competition between teams representing the Odd Fellows of Hamilton and those of Toronto for a handsome silver cup, the work selected for competition being the covering of the initiatory degree.

Grasshoppers are destroying the crops around Montreal.

Pictou junior cricketers were defeated at Kingston by a run and two wickets.

The Citizens Band came in for a great number of compliments on the occasion of the Orange demonstration in Belleville. It easily took first place.

Karl's Clover Root, the great Blood purifier gives freshness and clearness to the complexion and cures constipation. 25 cts., 50 cts., \$1.00. Sold by W. G. Egar.

Fred Hubbs, of the Examiner office, Peterboro, is spending some holidays in town. Fred commenced work as a printer in THE TRIBUNE office and has proved a competent workman.

Judge Fraick will hold a court in Deseronto at 1:30 p. m. on Wednesday, 29th inst., to hear appeals from the court of revision and to correct certain errors in the assessment roll.

Thomas McHenry was in town on Saturday. He is at present in Verona drilling for oil. He is an expert in the business and is confident that oil in paying quantities will yet be struck at that point.

The crisis at Ottawa is over, Messrs. Oulmet and Caron returning to their posts on receiving renewed assurances that the government would pass remedial legislation in January should the Manitoba government fail by that time to redress the grievances of the minority. Mr. Angers returned to return and his place will be filled by another French member.

The elections in England are running steadily against the Liberals and it is now thought that Lord Salisbury will be a majority of over 100. The Liberal defeat is attributed to their advocacy of local option which aroused the opposition of the powerful liquor interest. This defeat will end Lord Roseberry's career as a statesman. It was wretched policy for the Liberals to accept a peer as their leader.

The Addison fair will be held at Tamworth this on Sept. 17th and 18th. The event promises to be a great success. J. R. Fraser is president. A local society has bought a piece of land and laid out a trout course. A large tent will be used for the show this season, but a suitable building will be erected for use in future years. The Tamworth people are deserving of credit for their enterprise in securing the show.

Shiloh's Cure is sold on a guarantee. It cures incipient consumption. It is the best cough cure. Only one cent a dose 25 cts., 50 cts., and \$1.00. Sold by W. G. Egar.

A. O. U. W.

The members of Belleville lodge of A. O. U. W. will pay a fraternal visit to their brethren of Court Quinte, No. 215, this evening. A large attendance of Court Quinte is requested. The visitors will be entertained, after the meeting, at the Oriental hotel.

West End Mission.

Next Sunday, Mr. G. E. Dyde, in charge of the mission at Deseronto, will conduct the services at the West End Mission, Mr. Clark going to Deseronto for the day. There is a brisk sale of tickets for the Sunday school picnic to be held on Thursday 25th, at a point down the bay.

Scotland Yet.

Bro. A. D. Macintyre of Camp Scotland Yet, S. O. S., attended a meeting of the joint committee composed of representatives from the various camps in the Bay of Quinte district for the purpose of making arrangements for a grand gathering of the class early in August. We understand that the gathering will take place at Massena Park on Friday, Aug. 9th, and that prizes will be given for competition in about eighteen events.

Citizens' Band.

The Citizens' Band intend holding a lawn social on the grounds of Dr. Yeomans some time during the first or second week of August. We predict a liberal patronage. On account of the ill health of Thomas, Moyer, S. Cronk has been appointed business manager of the band and J. S. Smith has been appointed financial secretary. The Thursday night concert are invariably well attended and the selections are much appreciated.

Rapid Whetting.

On July 1st H. A. Dean, of the Bank of Montreal, whetted from Hamilton to Deseronto, a distance of 187 miles in 21 hrs. and 37 minutes. He had to lay too for 1 hr. and 40 minutes between Hamilton and Toronto to wait for daylight the roads being very bad in that section. He also stopped 1 hr. and 50 minutes at Ottawa, and his actual wheeling time was 17 hrs. and 7 minutes. A brisk breeze prevailed nearly all the distance. He recently whetted from Belleville to Shantouville in 24 minutes and 18 seconds, the time made on the occasion of the relay race.

H. A. Holley, of New York City, was the guest of F. S. Rathbun for several days during the past week. Mr. Holley is always a welcome visitor to Deseronto. On Monday afternoon Mr. Rathbun invited a few friends to accompany Mr. Holley and himself on a sail up the bay on the yacht Sista. The sail was greatly enjoyed. Mr. Holley's narration of fishing exploits on former visits being full of interest and bringing up recollections of ye olden times. The party landed at Massena Park and took tea at the hotel so pleasantly situated at that resort. Belleville was visited and a call made on H. B. Rathbun and family. Mr. Holley was very much pleased with Belleville with its shady streets and neat residences. The trip home in the teeth of a brisk southeast breeze was most interesting. Mr. Holley left on Wednesday for St. Martha's Vineyard where he will spend the summer vacation.

The heavy showers of Friday and Tuesday have proved of incalculable benefit to the growing crop.

The stmr. North King ran aground in the fog near Brighton. She was got off yesterday and the damage was slight.

Capt. John Saunders of the schooner Ella Murray was drowned near Prescott on Tuesday morning, having fallen out of a boat.

Miss Mary McNaughton, one of the staff in the general offices of the Independent Foresters, Toronto, who was present at the celebration here on the 17th of June, died the other day. She belonged to Chatham, Ont.

A nest containing eight eggs has been placed on our desk. It was found on the farm of Peter Hill, Tyendinaga reserve, and supposed to be from one bird in a species of lark. It has been placed in THE TRIBUNE museum.

Wm. Burgess, of Poughkeepsie, N. Y., is spending a few days in town. With a number of friends he has just completed a trip to the yacht Mist from Oswego up the Bay of Quinte and down the St. Lawrence, etc. The party sailed from Kingston to Clayton in two hours and five minutes. They captured great quantities of bass near Stony Island across the lake, two of them catching 55 in a few hours. Mr. Burgess will probably study law at Cornell university.

Masonic.

Bro. Robt. Geddie is in Toronto this week representing Craig Lodge, No. 401, at the meeting of the Grand Masonic Lodge of Canada.

Quick Work.

In only ten hours the Tripp Bros. with two mowers cut a field containing twenty-two acres of hay belonging to William McCullough, second concession of Tyendinaga.

Casualties.

A three year old son of Rev. E. N. Baker, Belleville, while at Divinity Camp, swallowed a fish bone which stuck in the tonsils of the throat. Dr. Yeomans was summoned and removed it. Michael Neola had his foot badly crushed by a horse stepping on it. Dr. Vandervoort attended him. One day last week Mrs. Edward Sharp's baby fell from a baby carriage, cutting its head severely. Dr. Vandervoort dressed the wound.

Salvation Army.

Capt. Churchill and Lieut. Bathgate will farewell on Sunday, 28th inst. and probably leave on the Thursday following. They have been capable and most self-denying officers. An ice cream social, the proceeds of which are for their benefit, will be held on Monday evening, 29th inst. Admission 10 cents. Every person should buy a ticket and thus show appreciation of their good work in the town.

Off For England.

Miss Oronhyatscha left on Wednesday for Toronto where she joined Dr. Oronhyatscha and party who left that city yesterday for Philadelphia on their way to the Supreme court of Foresters in London, England. They sail on the splendid steamer Kensington, to-morrow. In England Miss Oronhyatscha will be the guest of her brother Dr. Aeland Oronhyatscha at his country villa some distance from London. She will visit the continent and will probably return in September.

The Napanee Road.

THE TRIBUNE'S attention has frequently been called to the condition of the road between Deseronto and Napanee. To the traveller it always appears more like a country lane than an important highway between two large towns. The township and county councils have allowed a steady encroachment upon the road, fence being continued in a manner which cannot but cause the highway to be filled up in winter. The authorities should have long since passed a bylaw making wrong fence compulsory along the whole road. Now when the good roads movement is in full swing it is good time to make a new departure by a gradual widening and repair of this important thoroughfare.

Entrance Examinations.

At the recent entrance examinations to high schools 29 who wrote at Deseronto were successful. Of these 24 were from the Deseronto school, 28 of whose scholars wrote, no figures are given this year, but we learn that Wilfred Tucker, of Deseronto, aged twelve, had the largest number of marks. The following are the names of the successful candidates:—Casie Archer, Oliver Allison, Nellie Baker, Lulu Booth, Maggie Cronk, Norma Dunwoodie, Jennie Jones, Hattie Harrison, Maud Parnham, Edith Smith, Florence Taylor, Rowland Dunwoodie, James Port, Jack Hyatt, George Smith, Herbert Hinch, Harry Hatch, Aubrey Lowe, Harry Morden, Frank Maloney, Thomas Port, Edgar Provin, John Ryan, Martin Stanton, Ernest Stanton, Willis Scott, George Tucker, Wilfred Tucker, Willie Wright.

EXCURSION TO ST. ANNES.

Arrangements are now completed for the grand excursion to St. Anne de Beaupre on Tuesday, 30th inst. This excursion is under the direction of Rev. Father Stanton, of Smith's Falls. His Grace Archbishop Cleary will accompany the pilgrims to the famous shrine. This cheap excursion will afford all parties an admirable opportunity to see the sights of Quebec, Montreal, etc. It will be run over the C. P. R. The company is noted for running its trains on time, with few stops, and no annoying delays. All bright trains are kept out of the way and no train is permitted to follow a passenger train from stations until it has passed the next station ahead. This ensures absolute safety. Fare from Deseronto \$5.75.

PERSONALS.

Prof. Maury, of Albert College, has been very ill from typhoid fever at his home in Sidney.

Mrs. J. J. Kerr and family are spending a few weeks at Wapoose, South Bay.

Miss Virginia Steele left last Saturday to spend a month with friends in Trenton.

Mrs. John Dalton and family enjoyed a pleasant trip down the Rideau this week.

Miss Lowe is visiting friends in Colborne, F. H. Sims and G. A. Cole were in Belleville on Saturday on business connected with the Hanstridge estate.

Mr. and Mrs. D. McBrice were spending some time in Bath and vicinity last week. Mr. McBrice is almost recovered from his recent accident.

Mrs. E. Shor, of Syracuse, N. Y., and Miss Helen Shor are the guests of Mrs. Bogart, Dundas street.

Miss Dalton is visiting friends at Westport.

Misses Annie and Laura Maloney are visiting friends in Kingston.

Mrs. W. W. Arnold, who with her son, has been visiting her parents, Mr. & Mrs. E. T. Miller, leaves to-day for her home in Peoria, Ill.

The Misses McGrath, of Thurlo, are the guests of Mrs. J. T. Grear, Mill street.

Misses Maggie and Nellie Maloney, of Kingston, have been the guests of Mrs. E. J. Mallon, Fort street.

Mrs. A. G. Knight was visiting friends in Pictou, on Wednesday.

Mrs. James Smith, of Belleville, was the guest of Mrs. J. A. Davis on Wednesday.

Miss Sarah Beak left yesterday to spend a few weeks with friends at River Head, N. B.

Mrs. P. J. Vines and children leave to-day on a visit to her parents at Alexandria.

E. H. Lapp is spending a few weeks friends in town.

Mrs. Elizabeth C. Cole, Dundas street, has been very dangerously ill during the past week.

Mrs. A. H. McLean, of Montreal, is the guest of Mr. & Mrs. E. T. Miller, having come up to see her sister, Mrs. Arnold, off to Illinois.

Misses Ella Montgomery and Bella Dunwoodie of Watertown, are the guests of Mrs. E. J. Edwards, Second street.

Allie Habbe, of Peterboro, is spending his holidays with friends in Deseronto.

Miss Minnie Lynch, Toronto, and Miss Maria Lynch, Orangeville, are the guests of their brother, Frank Lynch, Chesapeake.

Miss Belle Smith was visiting in Belleville last Friday.

Miss McLaughlin is visiting friends in Toronto.

Miss Lizzie Smyth was visiting friends in Trenton on Wednesday.

L. E. Stanton, M. A., of Kingston, was in town on Monday.

Mrs. D. Elliott and Master Fred Elliott are visiting friends in Trenton.

Miss Alizia Daley, of Syracuse, is spending a few days with Mrs. Robert Adams.

M. G. Springstead, of Rochester, N. Y., gave us a call yesterday. He is visiting friends in Prince Edward.

Miss Marguerite Adams is spending a few weeks with her uncle at Marlbank.

Chief Gunyon arrested J. F. Nickett, a young man who disappeared from Belleville with a horse and rig. He was fined by the Belleville magistrate.

Baseball.

Deseronto defeated Bath at baseball last Friday by 18 to 14, the game being called at the end of the 6th inning. The Bath visitors were a very gentlemanly lot of men. The Deseronto team were: M. Flood, pitcher, John Gaulin c., J. Jamieson, left b., J. Pringle 2nd b., H. Thompson 3rd b., E. Gaulin s., W. Coughlin c. f., J. Bernier r. f., G. Rabitaille l. f. Our boys acquitted themselves well.

The Marysville Picnic.

The preparations for Father Quinn's picnic, which will be held at Marysville on August 21st, are well advanced. Everything indicates a big success. The valuable prizes offered have stirred up great enthusiasm and excitement. Miss Lizzie Brennan and Miss Nellie Drumme were in town this week canvassing for the watch prize, and met with great success.

Windsor Hotel, Kingston, A. J. Fraick proprietor, centrally located on Princess Street. When leaving boats or cars take electric cars to the door. Good sample rooms and stables, large dry dining and bed rooms. First class in every respect Charge moderate.

Smoke Chew T&B MAHOGANY

Manufactured by The J. G. Tuckett & Son Co. Ltd. Hamilton

THE CLOTHES MOTH.

THERE ARE THREE SPECIES OF THIS HOUSEHOLD PEST.

Directions for Protecting Clothing, Upholstered Furniture and Other Large Articles from the Depredations of These Destructive Insects.

One would suppose that an insect so long a household pest as the clothes moth would be well known to all. But it is not so. It does not seem to be so, at least in the adult or perfect state. It is not unusual to see careful housewives chasing over

DOMINION CLOTHES MOTH.

moth that chanced to fly about the evening lamp, regarding it with a look of surprise. And yet it is not uncommon to find the delicate little moths about woollen that have been long infested, and very little thought is given to any one that the very much larger moths which fly about the lights cannot be the same. Moreover, every housekeeper knows that clothes moths are not dark to light, and a little thought would arouse suspicion that insects with this preference would not be likely to be attracted by lights. As a matter of fact, they are not, but if they chance to be flying about they choose the darkest parts of the room.

There are three species of clothes moths. The most common is the species the larvae of which has the habit of making for its protection a case or tube from the woolen on which it feeds. This moth is well shown in an illustration in a bulletin from the Vermont experiment station on household pests, in which are illustrated the full grown moth, larvae in its case and larvae without its case, all being much enlarged. The general color of the moth is light brown or the front wings and silver gray on the hind wings.

The second species is less common, and the larvae does not make a case, but a cocoon. The moth is of about the same size as the preceding, and the expanded wings are half an inch across. The general color of the moth is light yellow, and there are no dark spots. The larvae is a small white worm with a brown head. It is the most common species in the south.

The third species is so rare that it is of little consequence commercially. The larvae makes no case, but burrows in whatever it feeds upon, thus making channels.

The remedies advised by Entomologist Perkins of the Vermont station for clothes moths are as follows: If detected, etc., can be enclosed in perfectly tight paper bags before the moths begin to fly and lay their eggs, they will be perfectly protected. But if clothes moths do not appear at the north before the latter part of May and during the month of June the campaign must be vigorously prosecuted. Articles found infested or if suspected may be sprayed with benzine, and this will destroy even the eggs. If infested drawers, closets, etc., are thoroughly treated with benzine at the proper time, there will be little trouble during the remainder of the season.

After spraying with benzine and airing articles may be safely wrapped in paper, or, if possible, put in bags. A few cents' worth of paper bags is worth far more than costly cedar chests or closets. Furniture, carriages or other large articles

ANOTHER SPECIES OF CLOTHES MOTH.

In constant use are not very likely to be attacked. If stored, they should be covered with paper if this can be done so completely as to leave no opening for the ingress of moths. If this cannot be done, then a spraying with benzine or bluish-phosphorus of carbon early in June and again in a month or six weeks should prevent damage. When more convenient, cotton cloth may be substituted for paper in covering carriages and other objects.

Kitchen Moth.

Green vegetables and salads of all kinds are, according to a well-known physician, the best complexion beautifiers. A daintily made salad is an essential of a lunch or dinner table, as all experienced hostesses will admit. Tomatoes, cucumbers, and celery, sliced, and served with a dressing of salt, pepper, sugar and vinegar, make a delicious salad. An excellent lettuce salad is made thus: Rub the yolks of two hard-boiled eggs to a powder, add one teaspoonful each of sugar and pepper, one-half teaspoonful each of salt and made mustard, and two teaspoonfuls of salad oil. Let it stand five minutes, and then beat in two tablespoonfuls of vinegar. Cut up two or three heads of white lettuce with a knife and fork and pour the dressing over it. Russian salad is made by mixing cold vegetables, as carrots, peas, string beans, tomatoes, corn, beans, etc., cut in small pieces, and serve with a dressing of oil and vinegar, and a little salt and pepper.

For carrot salad cut cold boiled carrots into very thin slices and sprinkle with sugar; then add a slice of a large lemon and a wineglassful of salad oil. Here is a good cauliflower salad: Prepare and boil the cauliflower; drain and let them cool; cut them into pieces, season with salt, pepper, vinegar and oil and serve and eat them as any other salad. To make a white salad, cook and slice salmon and pour over it the following dressing: Mix one saltspoonful each of salt and pepper and one teaspoonful of ground onion; then add three tablespoonfuls of vinegar and one tablespoonful of oil.

Vermin in the Canary's Cage.

When the wooden cage of the canary is infested with lice, it should be thoroughly washed with water and soap; then it should be coated with varnish and the canaries treated with a solution of bichloride of mercury. At the first appearance of a lice, wash the cage, wash the bird immediately, and the larvae of the "any pests will be destroyed."

HOW TO COOK POTATOES.

Undoubtedly There is an Art in Boiling Potatoes.

However good a potato may be, it is easy to spoil it in cooking. From being one of the most palatable and nutritious of vegetables, it may be made both disagreeable and even disgusting, all through the fault of the cook. To cook potatoes properly, you must not have a blunt knife, but rather a small, sharp-pointed instrument. A knife that has been worn down to a blunt edge, and is of original size and shape, can deal with deep-set eyes and awkward protuberances. New potatoes, which are small and smooth, are less likely to be spoiled than the old ones, or scraped off with a knife.

Undoubtedly there is an art in boiling potatoes well. To accomplish this result, first select the best potatoes, and cut them into small pieces; let them lie in cold water for half an hour or more after paring; put them in boiling water, just enough to cover them, adding a little salt, and let them boil, not too fast, until they are nearly ready to break. A small iron skewer will better than a fork to try them with, as there is not the danger of breaking the potato. Pour off the water quickly, and the asparagus with the potatoes on the stove for a minute with the lid off, give them a shake, and place them in a vegetable dish (which has been warmed), and cover them. They should be eaten as once or they will soon pass the condition of prima.

There are many possibilities to a dish of cold, boiled potatoes; they can be fried, used in the making of bread and cake, put into a pie, or put in with a little butter in hash, soup, and many other ways. A favorite dish for breakfast in Devonshire, among the poorer classes, is prepared as follows: A round, white chip, with four penny rows, is considered fairly well trimmed, but if this is added a hollyhock rosette of white silk gauze, with some white wings protruding from it on each side, then it is beyond criticism. Small rosettes cannot be made too large. They look like the double hollyhocks that grow in old-fashioned flower gardens, but they are much larger.

Potatoes to be mashed should be well boiled and dried, then utterly broken into flour with a wire potato masher, when a little salt, milk or cream and butter should be added, according to taste and opinion. The milk should never be overdone, and as to butter, that can be added at table if delicious, and also the cream. Overstirring hopelessly spoils the dish, and if an overproportion of milk is used, and any of the dish remains cold, it is almost certain to turn sour.

Those do not like to fry potatoes, but if they mean cooking in grease, they are possibly not far wrong. But there is frying an frying. Slice the potatoes thinly, put a layer in a earthen dish, sprinkle a little flour and small bits of butter, and repeat the same until the dish is full. If desired, season with chopped onions, salt and pepper; cover with a nearly cover, the whole with milk, and bake for two hours in a hot oven. The milk will be to most a very tempting dish.

For six persons use two quarts of thin-sliced raw potatoes, three ounces of fat, half a teaspoonful of grated onion, half a teaspoonful of pepper and one even teaspoonful of salt. Use a deep pudding dish that can be placed on the stove, and spread about one-third of the whole at the bottom of the dish. Sprinkle the onion over this, and then add half the sliced potatoes. Over them sprinkle the pepper and salt, and then add the rest of the potatoes and the pepper and salt. Lay the rest of the bacon on the potatoes, and moisten the whole with four tablespoonfuls of water. Cover the dish closely, and put in a moderate hot oven. Bake for half an hour then remove the cover and cook twenty minutes longer. The bacon at the top should be crisp and brown. Serve hot.

Helpful Hints.

Tight lacing is very likely to induce redness of the nose and hands.

Solled air can no more purify impure blood than dirty water can cleanse soiled clothes.

The juice of a good lemon in a cup of soft water is a beneficial lotion for the tanned face.

A teaspoonful of salt or a piece of charcoal in the water will preserve cut flowers from wilting.

Before using new iron utensils, grease them inside, fill with cold water and heat the water gradually to the boiling point.

The best use to make of a pipe is to fill the bowl with rich earth and plant in it a bit of wandering lion. Suspend it from a bracket by means of a cord.

A coarse square of heavy drilling should be hemmed and kept with the vegetable brushes for holding boots and other vegetables that must be skinned white hot.

Gloves must be pulled in shape as soon as they are taken off, and not put away until they are dry. They should always be removed from the hand by turning them wrong side out from the wrist up.

In buying a carpet avoid the cheap Brussels and cotton Ingrains—they are the dearest carpets that can be bought, for they will not wear nor look well after the first few months. A good, all-wool Ingrain will last for years, keep its color and look bright and clean so long as it is well maintained.

The Crimping and Curling Tongue.

The crimping plate and the curling tongue have been the subject of the inventor's thought, and in the first-class curling tongued both the tongue and the crimping plate are made of iron and are electrically heated. They go with the room and are wire attached. The other new crimping is an alcohol lamp inside of the tongued. The curling plate is made of iron, and a spring catch secures it. The flame heats the iron just enough to do the work and never hot enough to burn the hair.

How to Bake Eggs.

Set in the oven until quite hot a common white dish that is large enough to hold the eggs. The dish is to be covered, allowing ample space for each. Melt in the dish a small piece of butter, break the eggs carefully into saucers, sprinkle with a little salt and pepper, then add one egg into the dish, add a tablespoonful of cream for every 2 eggs; they are slipped into the dish and baked for four or five minutes in a very quick oven.

GORGEOUS HATS.

NO COMBINATION OF FLOWERS TOO BRILLIANT TO ASTONISH.

Some of the Latest Developments in the Artificial Flower Garden—Wings and Whole Hats Are Worn—Gauze is Used on Nearly Every Hat That is Worn.

The things most gorgeous now are hats. A hat of only one thing is an object of contempt among its particular devotees, and should a girl come out with feathers and flowers in her hat, she should probably not cause much of a sensation. For that matter, if the immense red flowers worn in summer hats are not people, it would take a connoisseur in floral nomenclature to name them. For a lack of a better name they are called roses, but no rose that grows on bush or tree ever aspires to any such dimensions as those that now flourish among the millinery flora.

Here are some of the latest developments in the artificial garden: Lilacs of a deep, velvety purple; ivy leaves of tropical magnitude; yellow lilies of the valley; roses that are as large as cabbage. These are the abnormalities, but there are many legitimate posies which come in the proper size and color, and imitate nature to perfection.

A black mill hat is covered with snow-balls and dark red roses. A white round hat has exquisite white daisies, only by some freak of the flower maker they are made the size and shape of red ones.

A round hat that is not exactly sailor is the correct thing for ordinary wear just now. The crown is rather shallow, and the brim is not wide, but the larger the flower the better. A round, white chip, with four penny roses, is considered fairly well trimmed, but if this is added a hollyhock rosette of white silk gauze, with some white wings protruding from it on each side, then it is beyond criticism. Small rosettes cannot be made too large. They look like the double hollyhocks that grow in old-fashioned flower gardens, but they are much larger.

Our illustration represents a hatter's straw toque, trimmed with changeable taffeta ribbon, a heliotrope and rose-colored, surmounted by lilacs, and coq feathers.

Wings and whole birds are worn by those who do not belong to the society with the long name. White ones are the favorite, but a green parrot on a green straw hat that is trimmed with apple blossoms the effect is startlingly natural. When the wings only are used it is the fancy to put a mauve rosette in the place where the bird ought to be, sewing this artificial monotony upon the front of a round hat. Two pairs of wings are sometimes used in this way, perhaps to preserve the balance.

Gauze is used in one way or another upon nearly every hat that is worn. If not in the form of rosettes it is accordion pleated and is made into funnel-like fans that stand up in place of ribbon loops. The same accordion pleating is used for making the brim of a hat. A green straw hat was entirely covered with white and purple lilacs.

The ingenious girl will make her own mill hats. It only requires three circles of wire set within the other, with the same of wire for the crown. They are joined by means of transverse wires that radiate spoke-like from the smaller circle. The crown may be made of wire and covered with gauze, or it may be made of straw. Flowers and two or three feathers are the proper trimming.

Suitor hats of knockabout wear are no different from these, except a sash is added, except that the brims are a shade narrower. Striped bands are worn on hats with outlying sails. A new idea is a narrow black velvet band in place of the ordinary one of two-inch width. It is a very convenient device by which to refurbish an old hat.

Fashion News in Hints.

Milliners' folds of silk or velvet are reviving again for dress trimmings. This season's dress skirt is much shorter than was last season's.

Silk petticoats have assumed an elegance quite in keeping with the other luxuries and are made of rich brocades, glaze silks and fancy tulle of all sorts and kinds.

The linen dresses are very chic, and their bright silk linings and lace trimmings.

Collars and collarettes are a special feature of the new waists.

The waists of white tulle evening gowns for young girls are made like the old-fashioned baby waists, with full puffed elbow sleeves.

French nainsook, mull, swiss, organdie and dimity are the materials for white dresses supposed to come to the laundry. Brooches are again popular in Paris.

Two new materials called emporine and monstrel, which is a variety of organ with a more wiry thread, are recommended.

The Cleopatra Belt.

The "Cleopatra" belt is an imported novelty. It has come just at the right moment as the season of shirt waist and wash blouses is upon us. This belt is made with a mechanical head fastening, which is a variety of organ with a more wiry thread, are recommended.

TAMWORTH SWINE.

A Short Description of the Modern English Bacon Breed.

There is, apparently, no unknown to this country. It is in every respect so totally unlike the kind of hog which it is the ambition of the swine breeder to produce that many will be surprised to learn that the accompanying cut is an excellent illustration of the type most popular among the English, being considered a very fine specimen of the breed.

The explanation of their popularity lies in their thin, long bodies, which supply the inevitable lack at every English breakfast table. Indeed, in the production of this article, they are without a very fine specimen of the breed.

In color the Tamworths are generally sandy red, though some are a dark gray with black spots. They are hardy and prolific and have been improved so that they are now an early-maturing breed. The long, deep sides, light shoulder and jaw make them an ideal bacon hog. The flesh is lean, pink and well-flavored—N. Y. World.

Protect Sheep Against Vermin in the Head. Many American shepherds advise smearing the salt trough with tar, but this is seldom thought enough. A practice to be recommended is to smear the head of the sheep periodically, at least once a week, during the season of greatest activity of the fly, with a mixture of equal parts of tar and grease, or of tar and fish oil, or of tar and whale oil. Some have used white oil alone with good results. A brush will be found convenient to apply these mixtures. A reliable authority speaks in flattering terms of the use of an ointment made as follows: Brewster's ointment, linseed oil, one pint; carbolic acid, four ounces. Melt the wax and oil together, adding two ounces of resin to give body, then, as it is cooling, stir in the carbolic acid. The same authority mentions the use, by some breeders of choice stock, of a canvas bag cover smeared with this mixture or with one of kerosene and tallow, which may be adjusted in such a fashion as not to interfere with the sight or with grazing, and yet protect the head against the fly. The fly lays the egg from which the grub hatches. Some farmers plow a few furrows in the pasture so the sheep may put their noses in the earth and avoid the fly away—American Agriculturist.

Feeding Crib to Poultry. Get a box about one foot square and eight or ten inches deep, remove the top, and place it inside at an angle from one corner of the bottom of the box, leaving about three quarters of an inch space from the bottom and one side, and the other side of the board about two inches from the other side to allow space to fill; or it may be filled tight, and the side of the box removed and hinged so as to open and fill. Place a strip of wood about one inch square, about two inches from the three-quarter inch space at the bottom of the box to keep the grit in place. Bore two small holes in the bottom of the box near what is the top, and hang on nails so as to raise the box a few inches from the ground, to prevent the chickens from scratching dirt in. Put in the dirt, oyster shells, charcoal, etc., and the fowls will have it fresh and clean, as it will drop down as they eat it. There will be no waste as when fed on the ground or in open boxes. The same arrangement may be used for feed when it is desirable to keep feed before the poultry all the time. The device is shown in the cut.—Horn New Yorker.

The same arrangement may be used for feed when it is desirable to keep feed before the poultry all the time. The device is shown in the cut.—Horn New Yorker.

Feeding Crib to Poultry. Get a box about one foot square and eight or ten inches deep, remove the top, and place it inside at an angle from one corner of the bottom of the box, leaving about three quarters of an inch space from the bottom and one side, and the other side of the board about two inches from the other side to allow space to fill; or it may be filled tight, and the side of the box removed and hinged so as to open and fill. Place a strip of wood about one inch square, about two inches from the three-quarter inch space at the bottom of the box to keep the grit in place. Bore two small holes in the bottom of the box near what is the top, and hang on nails so as to raise the box a few inches from the ground, to prevent the chickens from scratching dirt in. Put in the dirt, oyster shells, charcoal, etc., and the fowls will have it fresh and clean, as it will drop down as they eat it. There will be no waste as when fed on the ground or in open boxes. The same arrangement may be used for feed when it is desirable to keep feed before the poultry all the time. The device is shown in the cut.—Horn New Yorker.

was written by the discoverer's son, and is generally known as the "Historia." It has been picked up by the cabin boys while the crew were in church, and were sent down from Portugal to reassure the king and details are given of our countrymen's adventures in Columbus's first voyage.

There is thus fairly good evidence that the voyage took place in the month of April in or about the year in which Columbus is believed to have been born. The king and queen, however, were not so assiduously collect information in regard to western lands, did not know of the voyage, and it is probable that he did. Herrova makes it that he probably was not the first to make the statement as to the peculiar course adopted by Columbus in his third voyage to the Indies, and that he was the first to sail to the islands and still further south before he returned his vessels westward. "He received the king's orders to sail westward to find out whether King John of Portugal had been in mistake in his opinion that there was continent to be found to the southward."

Theory and Practice.

Yacht Owner (at the helm)—Do you know that the nautical term "starboard" comes from steerboard, and was so named because the steerboard or rudder was formerly at the right side of the boat instead of at the stern?

Hired Sailor—No, sir, I hadn't much book learnin', but I know if you don't move that steerboard as you call it, a little more to starboard, we'll be upset.

He threw the wrapping paper into waste basket, but as the incident reminded him of twenty other glasses of grape jelly, he called his colored man

"The Triumph of Love IS HAPPY FAITHFUL MARRIAGE."

EVERY MAN WHO WOULD KNOW THE GRAND TRUTHS: THE PLAIN FACTS; THE NEW DISCOVERIES OF MEDICAL SCIENCE APPLIED TO MARRIAGE; WHO WOULD ATTEND FOR THE FUTURE AND AVOID FUTURE PITFALLS, SHOULD RECALL THE WONDERFUL LITTLE BOOK CALLED "COMPLET MARRIAGE AND HOW TO ATTAIN IT."

"There is at last information from a high medical source that must work wonders with this generation of men."

The book fully describes a method by which to attain full vigor and manly power.

A method by which to end all unnatural drains on the system.

To cure nervousness, lack of self-control, dependency, etc.

To exchange a faded and worn nature for one of bright vigor, buoyancy and power.

To cure lower vitality of excess, overwork, worry, etc.

To give full strength, development and tone to every part of the organs of the body.

Age no barrier! Failure impossible! 2,000 references.

The book is purely medical and scientific, unaltered in its nature, and is available to men only who need it.

A despairing man, who applied to us soon after wrote:

"Well, I tell you that first day is one I'll never forget. I just bubbled with joy. I wanted to hug every body and tell them my old self had died yesterday and my new self was born to-day. Why didn't you tell me when I first wrote that I would find it this way?"

And another thus:

"If you dumped a cartload of gold at my feet it would not bring such gladness into my life as your method has done."

Write to the ERIC MEDICAL COMPANY, Buffalo, N. Y., and ask for the little book called "COMPLET MARRIAGE." Refer to this paper and the company will send you the book, in sealed envelope, without any charge, and entirely free, until it is well introduced.

NEWS OF THE DAY.

Thieves ransack'd Burlington postoffice. The Merchants' Bank has imported \$100,000 in gold from New York.

The War Department of the United States has decided to abandon Fort Pembina.

J. J. Lemble of Walkerton was arrested on a charge of setting fire to his boot and shoe store.

The Georgian Bay foundry and machine shop at Collingwood were destroyed by fire on Sunday.

Mr. Albert Berryman, a Grand Trunk railway operator at the Stuart street station, is missing.

Capt. John Saunders of Kingston was drowned while crossing in a rowboat from Ogdensburg to Prescott.

Rev. Dr. Wild has taken leave of the First Congregational Church, London, which he will vacate in a matter of days.

There was great excitement in Montreal when it became generally known that the Banque du Peuple had suspended payment.

There has been serious break rioting in the city of Zamora, Spain. Several persons were injured, and one spectator was killed.

The New South Wales Parliament is considering a bill to restrict not only entrance of Chinese, as at present, but Japanese and Kanakas as well.

A Kanak man tried to drown a cat by wading out into the river and pulling it under the water. He got out all right, but the cat took cramps and was drowned.

News has been received in Auckland from Samoa, to the effect that the natives are again in an unsettled state, preparing a big expedition to decide on peace or war.

A force of seven thousand Japanese troops has left Tsukuba to attack the black flag at Tai-Wan-Fu, Island of Formosa. A hostile expedition is expected to take place Saturday.

Four members of the have taken possession of the Methodist church in East San Jose, Cal., and it is estimated that there are at least 300 pounds of honey between the outer and inner walls.

Mr. McCarthy succeeded in introducing his amendment on the Manitoba schools question in the House last Wednesday. He replied to Sir Wilfrid Laurier, and the debate closed with a lively clashing of words between the two speakers.

It is said that the Oswego Steamship Company, of Sydney, N. S. W., will seek colonial aid for the construction of new and fast steamers to run on its line to San Francisco. There is talk of guaranteeing a mail service of twenty-eight days from Auckland to London.

CHURCH OF THE REDEEMER.

Rev. J. F. McFarland preached very acceptably at both services last Sunday.

Rev. G. McArthur will occupy the pulpit this morning and evening next Sunday.

Miss Grey will give a very interesting meeting of the Y. P. S. C. Endeavor last Sunday evening.

A meeting of the congregation has been summoned to be held at 7.30 o'clock next Monday evening for the purpose of moderating a call to a minister. It is hoped there will be full attendance of members and adherents.

\$1.00 bottle.
Free sent by mail.

It is sold on a guarantee. It is all guaranteed. It cures Indigestion and is the best Cough and Croup Cure.

W. G. FARR.

THE PITZEL MYSTERY.

Toronto, July 16.—Last week was published a lengthy article detailing the arrival here of Frank Geyer, a detective connected with the Philadelphia police force, in search of a clue as to the whereabouts of two children named Etta Annie Pitzel, aged 13, and Nellie Pitzel, aged 11, the daughters of Benjamin Pitzel of Philadelphia. Detective Geyer, who had just arrived from Detroit was acquainted that the two children had been brutally murdered and their bodies concealed in this city by a man named H. H. Holmes, who is awaiting trial in Philadelphia on the self-confessed crime of inflicting the Fidelity Mutual Insurance Company of the Quaker City of \$10,000 by substituting the body of a medical college "subject" for that of Benjamin Pitzel, the father of the two children, who were believed to have been done to death in Toronto. The papers published the pictures of the two children and full details of the multifarious crimes alleged to have been committed by Holmes, who for ten years past had been well known by swindling insurance companies.

As the result of the publication of these facts in the press, the bodies of the two children were yesterday buried in the cellar of a house at 10 St. Vincent street, rented by Holmes in October last. The discovery of the bodies confirms the belief entertained by the Philadelphia authorities, that Holmes not only murdered the two children, but also cremated them in Detroit the body of their brother, Howard Pitzel, aged 9, and also killed Benjamin Pitzel, the father of the three children, and Annie and Minnie Williams, two women with whom he lived in Chicago. Mr. T. W. Ryves, who resides at No. 18 St. Vincent street, and who is a friend of the girls and of Holmes in the world, and, as a result on Saturday morning communicated with the detective department.

He stated that he met with two children, answering the description of Holmes and of the Pitzels children, residing for a week last October at No. 18 St. Vincent street, in a house immediately adjoining his premises.

Acting upon the information communicated by Mr. Ryves, Detectives Geyer and Cuddy yesterday morning paid a visit to the house, which is at present occupied by Mr. J. Armstrong, and is owned by Mrs. Nudel, wife of Frank M. Nudel, senior clerk of the education department of the Normal School. The house is a small two-story cottage, of an old and simple style of architecture.

Under the kitchen is an excavation which serves for a cellar, about ten feet square and not more than five feet in depth. A set of steps, almost perpendicular, lead to it from an old-fashioned trap-door in the middle of the kitchen floor. The detectives did not expect to find anything. They had already dug up two or three bodies in their and other streets in search of the bodies, and thought that they would likewise be a wild goose chase. They decided, however, to proceed with the investigation. They observed a spot where the sandy floor looked as if it had been disturbed, and set to work with a shovel in the southwest end of the cellar.

In a moment they had something was laid bare. A dead white man's hand and wrist—white, and as bloodless, more like the model of a hand exquisitely moulded in pure wax than a real hand—suddenly showed itself three feet below the surface among the sand.

The inspector instructed them to secure an undertaker and B. D. Humphrey of Yonge street was called. In the presence of the detectives he continued the work of unearthing the bodies of the two children. The search of Geyer was over. The cellar had given up its dead. The attitude was that of repose rather than that of death. The features that is, such of the features as were visible—were calm and the soil had probably assisted to a certain extent in arresting the course of decay, although both bodies were now past the prime of life. There could be no doubt from the circumstances that the grave was dug by murderers.

How the children were killed will probably be developed as the result of the post-mortem which has been ordered by Coroner A. J. Johnson.

The hole in which the bodies were discovered was about four feet square and three and a half feet deep, allowing a little over one-half a foot of space between the bodies. The younger child, Nellie, lay in a cramped position with her head to the northwest and his little legs pointing almost straight up. The older child, Howard, lay on his back, his head to the northeast and his legs pointing to the southwest. The bodies were not far from the surface, and the soil was not disturbed. The bodies were not far from the surface, and the soil was not disturbed.

From developments as to the movements of Holmes during the few days was here, the date of the murder can be definitely fixed. He arrived in the city and registered at the Palmer House on Oct. 18. The following day Mrs. Pitzel arrived, and his thought and time for that day were devoted to lulling the suspicions which had been arising in her mind as to her husband's safety, and getting her quietly settled in the Union Hotel. His first object was to look about him for a place suited to the carrying out of his plans.

An advertisement in a newspaper of a house to let caught his eye, and on the following morning, Oct. 20, he called on Mrs. Nudel at 18 Henry street and engaged the house. He told her the old story of a widowed sister which had done service when the house in which the boy Howard Pitzel was killed was created was engaged in Forest avenue, Detroit. The preliminaries were not long drawn, the house was let, and when the day of the month of Oct. 21 had been paid and Holmes, or Howard, as he called himself to Mrs. Nudel, had possession of the keys, his only request was that she should not be so wise as to get settled, he did not wish any person to call at the house for some time.

With a few preliminary details he calculated that his deed would thus be accomplished and a thousand miles or more separate from the house of his victim before a suspicion would arise.

Satisfied that the house must be requirements, Holmes that evening left the city with his wife and went Sunday at Niagara Falls, where he reviewed in his mind the plan which he had devised to put into execution. He did not intend to go into the city on the following day and visited a house in St. Vincent street, accompanied by his intended victim, whom he took away

from the Albion Hotel. On Tuesday and Wednesday he spent the day and while his attention was turned to completing the details of his scheme the two young girls named Etta and Nellie came and were left for a day or two on the veranda to convey to the neighbors the impression that some hidden plan, and to the children they were wider and happier meaning. They had not seen their mother, their sister or Dora, or the baby Alice looked through the newspaper which covered the face of her murdered father in the Philadelphia grave-yard and identified his body by his tooth, and they played and laughed and lived in the confidence that mamma was coming, and was going to bring Dora and baby Alice home. Holmes called himself, and told them so, and said the bed was the first of the furniture which was to make this cottage so much like their own home where they had last seen papa alive.

On the afternoon of the 24th, Holmes had the corpse of Mr. Ryves. That same evening, when he returned to his room at the Albion Hotel, he was very dirty. Holmes explained that he had had some friends who were connected with the British America Assurance Company and had spent the night with them. This story has been investigated by Detective Geyer and Cuddy and proven to be a false one. Holmes, in fact, had had a man chosen to have told it, was with the borrowed space he had been digging the graves of the young innocents.

The following morning he called, as was his custom, at the Albion Hotel for his children, taking them away soon after breakfast. What took place between the time of entering the house on that morning with the two children and the time of hand-bag the space to Mr. Ryves is known only to Holmes, and can be surmised. Unless Holmes when confronted with the evidence of murder which Detective Geyer has accumulated against him in the past few weeks realizes the hopelessness of his position and tells the true story of the crime, the exact method he pursued in accomplishing the death of the children will never be definitely known.

While in Detroit Holmes borrowed a large trunk from Mrs. Pitzel, under the pretext that her husband's alleged presence in the city had become known to the detectives, and that it was necessary to ship him to Toronto in a trunk. This trunk Mrs. Pitzel did not see again until she had left this city and gone to the house in Burlington, Vt., which Holmes had furnished for her. It fell into the hands of the detectives of the city of Philadelphia, who discovered that one of the hands had been raised and a hole bored beneath it. Upon this discovery Detective Geyer based his theory that a house had been rented in this city, the children induced to get into the trunk, when they were asphyxiated. The theory that there is no other than the Nudel cottage renders this theory untenable. Unless they were put into the trunk and chloroformed to death, the only rational theory appears to be that they were smothered with the mattress and pillow after the manner of the celebrated Burke and Hare murder.

To render identification almost impossible should the bodies be discovered, the fiend stripped the bodies of every vestige of clothing before he rolled them into the hole which was to be their temporary home. The clothing was then burned, but the bed and mattress were left intact. When Mrs. Armstrong was cleaning up the house for moving in, in April, she found remnants of the clothing of the children in the fireplace, under the sink in the kitchen and in the wood box. Mrs. Armstrong paid little attention to the half burnt shreds and threw them into the lane. One thing she does remember, and it bears out the statement of Mr. Ryves, that the children were dressed in dark clothes, and that is, that the material was dark.

SURROGATE COURT.

Margaret Fulton, of the city of Belleville, probate of will granted to David Moran, executor. Estate, \$1,310. Ponton & Morison, solicitors.

Annie Norman, township of Tudor, letters of administration, with will annexed, granted to Ralph M. Norman, administrator. Estate, \$1,200. D. E. Stewart, solicitor.

William F. Edwards, township of Rawdon, letters of administration granted to Geo. F. Edwards, administrator. Estate, \$4,000. J. E. Halliwell, solicitor.

Eliza Jane Heggart, of the village of Rawdon, letters of administration, with will annexed, granted to John Heggart, administrator. Estate, \$3,000. Greig & Jamieson, solicitors.

DISTRICT ITEMS.

Building operations continue very brisk in Belleville.

Mary C. Golden, of Herschel, died on the 7th inst.

John Thompson, Belleville, died on the 14th, aged 85.

Kingston water rates are to be reduced fifteen per cent.

Frances Boyd will hold a demonstration in Belleville on Aug. 12th.

The St. Lawrence skill factory will be moved from Clayton to Ogdensburg.

The store of A. C. Shields, Ganouque, was damaged by fire on Monday night. J. Ramsay, injured by a premature blast at Kingston, will lose the sight of both eyes.

The steamer Arango ran ashore off Rock Island in the St. Lawrence on Monday, but that of the vessel was the worse of her accident.

Weyton Griffin, of Ball's Corners, attended the Grand demonstration at Ottawa, and during the return trip, fell off and was killed.

Robert Easton, one of the pioneer settlers of Napassee, died on Sunday, aged 80 years. He was town treasurer for over thirty years during which time not a single error was detected in his books.

James Thompson and Eliza Jane Lownd, both of Regan, were married on the 15th; Joseph Shum of Montpelier, and Mattie Moore of Herschel, on the 10th; Louis C. Moore and Rachel Evans, of Wicklow, on the 10th.

LADIES OF DESERONTO.

Our assortment of ladies' Oxford shoes, in tan color and black, are much superior to any we have ever had. We have taken special care in selecting goods for this department, and our prices are lower than in Napassee or Belleville. Prices range from 60c upwards, an extra quality shoe for \$1.00. Haines & Lockett, 414 York street.

If consulting your eyes, do not escape any injury to your sight and ascertain the proper cure to pursue regarding the use of glasses. Testing free. Angus McFee & Co., 272 Front street, Belleville.

Still Holds Good.

We said that we could make you a summer suit quickly and satisfactorily, and the statement still holds good. We said that our price would be lower than any in town, and the statement still holds good. We said that our price would be lower than any in town, and the statement still holds good. We said that we would like to have a general talk with you on clothing, and the statement still holds good.

D. W. Dart,

EDMUND ST., MARKET SQUARE.

COLONIAL WAR MEDALS

To Celebrate the 150th Anniversary of
Louisburg's Capture,
The Louisburg Memorial Committee of

The design, suggested by Howard Pell and carried out by James H. Whitehouse,

figures on the obverse side of the medal. Two heads in profile, one being that of Sir William Pepperell, who commanded the land force which captured the town from the French, and the other that of Sir Peter Warren, who commanded the fleet that assisted in the capture. The inscription which surrounds the profiles, takes the form of a border, with the introduction of two medallions, one of which bears the head of a North American Indian, and the other a full-length figure of a colonial soldier. The inscription

COLOMBIAN WAR MEDAL.

How tells that of the

and there is also a Latin motto, the translation of which is "Despair of nothing while Christ leads."

On the reverse side of the medal is accurately cast representation of the medal which Louis XV. of France gave to commemorate the building of the fort at Fort de Chartres in 1757.

The medals are two inches in diameter and a few of them are suspended from the color of the society, a scarlet moose tail. Queen Victoria's portrait is accompanied by an appropriate address, will be presented to Queen Victoria; another to President Cleveland, and a third to the Earl of Dufferin, Governor General of Canada. All the medals have been struck from the metal of the old brass cannon found on the French frigate, said to have been wrecked in the harbor of Louisiana in 1782. The cannon was recovered by divers in the harbor of Louisiana.

HIGHEST RANGE IN AMERICA.

The Mountains of the Uintah Indian Reservation in Utah.

It is not commonly known, but it is a fact, that perhaps the highest range of mountains in America is on the Uintah Indian Reservation in Utah. Bear Peak has an altitude of 14,600 feet, but Pike's Peak is higher than Pike's Peak in Colorado. In a stretch of thirty miles there are a dozen such peaks with altitudes over 13,000 feet each, and which are snow-covered almost all the year round.

From these mountains numbers of riv-
ers of bright crystal water have their source.
They flow down through the valleys and
plains, affording the finest natural ir-
rigation in the world. The two reser-
voirs have an area of about 6,000

Electric Locomotives.

It is interesting to note that the effort to develop the electric locomotive on this side of the Atlantic is proceeding along a line entirely different from that which is followed in Europe. So far, the factory have been the results attained in the use of the overhead trolley system that we pin our faith to it and are inclined toward any change. The power of electric locomotives to be used in the Baltimore tunnel is being tested by the use of a steam locomotive and a

form as heavy work as the latter, and derive their current from an overhead conductor. In France the single non-stop effort in this field is directed toward production of an independent unit, which is, in fact, a traveling power station. The new electric locomotives of Henschelmann constructed on this plan will soon be in operation, and as those in Baden will shortly be put into use, it is thought to be afforded in the near future.

reliable data for making an interesting comparison between the two radically different types.—*Street Railway Gazette*

The Work of the Heart.

One of the most remarkable things about the heart is the amount of work it does. Considering the organ as a pump

whose task it is to deliver a known quantity of blood, against a known "head," it is easy to show that twenty-four hours a man's heart does about one hundred and twenty-four tons of work. "In other words," says contemporary, "if the whole force expended by the heart in twenty-four hours were gathered into one huge stroke, such a power would lift one hundred and twenty-four tons one foot from the ground. A similar calculation has been

made respecting the amount of work accomplished by the muscles involved in breathing. In twenty-four hours these muscles do about twenty-one foot pounds of work."

Appreciation of Granting "Easy."

Lafayette Park relates that there was remarkable identity of ideas and expressions in the compositions written by his Japanese pupils on a single theme. It is not necessary to go to Japan to discover the like. The similarity of expression in most school compositions on the same subject. It seems merely that the mature minds in Japan, as in America, note the obvious, with the difference, perhaps, that the training of the intellect is more directed toward the rationalistic

Frigid and Fervid Temperatures.
Groop, the Arctic explorer, probably experienced a wider range of temperature than any other living man. He recorded thirty-six degrees below zero at the North Pole, in Lady Franklin Bay, and another 40° below zero in the desert of Arabia, his thermometer in the shade ran up to 114.

Put Him Foot in It.
A bad break in the curate's sermon is reported in the Church Times. After appealing to the congregation, "And you all agree with my hoary head," he turned to the young men with the appeal "And you young men with your bloomiest cheek." He tried to change the phrase

But it was too late. ■

Prof. Denmark is removing to John McCleary's house, corner of Thomas and Centre streets.

Chief S. Green has greatly improved the appearance of his premises by painting his house a cream color.

E. S. Westmoreland is buying another lot of prime cattle which he expects to ship to Montreal next week.

Railway people state that the Grand Trunk has not been to buy for twelve years as far as freight is concerned.

The senators at Ottawa use 100,000 pens during the session; at least they are allowed that number to do their writing.

Wm. E. Smith is camped for the summer a short distance down the bay. He employs his time fishing and knitting hammocks.

At East Florenceville, N. B., five generations at down to a Sunday dinner Mrs. Elizabeth Boyar, aged 95, was the oldest.

A telephone at the Deseronto cemetery is very much needed. The cemetery authorities cannot act to speedily in this matter.

"Telegraph" camp broke up on Monday. The whole party had a splendid time. There are many campers along the beach this season.

The A. O. U. W. have so amended their rules, that members may carry but \$1,000 insurance, instead of \$2,000, which was compulsory until recently.

The North King is said to be the fastest boat that traverses the St. Lawrence River. She made sixteen miles in one hour and one minute on a recent trip.

The City of Buenos Aires has a population of 655,688, and is thus the largest city in the Southern hemisphere. During the past four years it has increased fifty per cent.

It is thought that the remains of the late A. L. Morden, Q. C., will reach Napanee on Sunday or Monday. The funeral will probably be held on Tuesday.

Remember St. Mark's S. S. picnic to Young's Point, Adolphustown, on the 31st inst. Tickets 25 cts., children 15 cts. All welcome.

An extension has been made to the dry kilns for the purpose of drying match splints. A large new pipe connects with the fan to carry the hot air for the purpose.

Dr. Simpson and W. J. Huff were out fishing on Tuesday evening and proudly paraded the streets with a string of the funny tribe as a result of their successful efforts.

Several complaints were lodged at this office concerning parties discharging firearms within the limits of the corporation contrary to the provisions of the statute governing such misdemeanors.

A new post office will be established at Cooper's, South Maryburg, Prince Edward County, to be known as Port Milford, which is four miles from Milford. There will be a daily service from Picton.

The Senate had not time to pass the bill of the Independent Order of Foresters which proposed to increase the amounts of insurance carried by members and it will be held over until next session of parliament.

The Australian production of gold, according to the Manufacturer, is figured at 1,731,322 fine ounces, or \$35,786,426. This is close to the United States, which produced last year 1,923,619 fine ounces, or \$39,761,205, substantially \$4,000,000 more than Australia.

Private Heynath of the 13th batt., Hamilton, has captured the Queen's prize at Rugby, the highest honor of the meeting. It is the first time a Canadian has won this honor which entitles the winner to a gold medal and £250. The result was the cause of great rejoicing all over the Dominion.

Joseph Hyndman, of Belleville, claims to be one of the oldest Orangemen in Ontario. For 60 years he has been a member of the order, having first joined in Ireland. He is now in his 80th year and attended the Orange demonstration at Ottawa on Friday. He claims to have never missed a celebration during 60 years.

Stanley Saylor, who used to visit at O. Cole's, Deseronto, in former years, died at Toronto and was buried on Monday last.

The Kingston Presbytery at its meeting on Tuesday accepted the resignation of Rev. J. L. George, pastor of John Street church, Belleville.

Captain Sweeney, U. S. A., San Diego, Cal. says: "Shiloh's Catarth Kennedy is the first medicine I have ever found that would do me any good." Price 50c. Sold by W. U. Egar.

About sixteen hands in the door department of the Sash & Door Factory were laid off last week, the stock of doors on hand being very large.

F. S. Rathbun invited the Company's clerical staff in the different offices to a sail down the bay on the Sista last Friday. About thirty-two responded and a most pleasant time was enjoyed, the party proceeding to the island and parts adjacent.

Probably the oldest clergyman in Canada in active ministry is the Rev. Mr. Cosman, Lutheran minister of Lunenburg, N. S. He was born in 1806; ordained in 1834, 61 years ago; arrived in Lunenburg 1835; has baptized 3,068; married 922 couples; buried 1,041; has preached 11,000 sermons, and travelled 200,000 miles.

The District Council of Royal Templars of Temperance met at Trenton last week. There was a good attendance and important business was transacted. The different secretaries reported steady growth and unflinching interest on the part of the different subordinate councils. Arrangements were perfected for the work of extension.

David Smith, the "huckleberry king," made a prospective tour in the Bald Mountain country last week. He reports the huckleberry crop almost a failure owing to the protracted drought. Raspberries are a great crop and will be a great crop of long raspberries. The lakes are teeming with fish, the district being a sportsman's paradise.

The congregation of the Church of the Redeemer at the meeting on Monday evening extended a unanimous call to Rev. W. S. McTavish, of St. George. The call was signed and forwarded next day to the Kingston Presbytery who sustained it and ordered its transmission to Mr. McTavish through the Paris Presbytery. That presbytery will consider it at a meeting to be held on August 6th.

At the annual meeting of the Dominion Oddfellows' Relief Association, the reports showed the benefits in the financial year to be \$65,000; total disbursements since organization, \$439,337; membership, 6,068; insurance carried, \$10,055,000; assessment income, \$17,100.74; reserve advanced to \$82,760; surplus, \$87,421. W. J. Livingston, W. H. Gowan and W. R. Mundell, the retiring directors, were re-elected.

Bailey and Barnum's Circus.

In connection with the circus at Belleville tomorrow the Elia Ross will carry an excursion from Picton, Napanee and Deseronto, leaving this place at 7:30 arriving in the city in time for the procession. Fare 35 cts. Boat will return at 6 p. m.

1000 Islands Excursion.

Remember Reva. Crossley and Stratton's excursion to the 1000 Islands on Saturdays, Aug. 10th and 17th. The popular str. Merritt will leave Deseronto at 9 a. m. on each Saturday, Cole's 9:30, Picton 10:30, Adolphustown 11:15, Bath 12:45 p. m., reaching the park at 6 p. m., returning Monday. Tickets \$1.00. Below Picton 75 cts. See bills for particulars.

Cullers' Examination.

Intending candidates for examination for licenses as sawlog cullers should bear in mind that under the Ontario Cullers' Act the only examination this season will be held at Hunterville, on Wednesday, the 7th day of August next. Intending candidates should at once communicate with the De partment of Crown Lands, Toronto, and forward the required fee of four dollars each. Only British subjects and bona fide residents of Canada will be examined for licenses.

The Amateur Sportsman.

Any of our readers desiring a good journal giving information about hunting, fishing, rifle shooting, dog, camping etc., cannot do better than send a dollar for the Amateur Sportsman, published by the M. T. Richardson Co., 27 Park Place, New York. The July copy just to hand is a splendid number as it is richly laden with interesting reading for hunters, anglers and dog fanciers. It contains the required fee of four dollars each. Only British subjects and bona fide residents of Canada will be examined for licenses.

A. G. Cole, late principal of the public school in his family, left on Wednesday forenoon for Kewwick, York Co. where they will make their home. As we stated formerly Mr. Cole intends taking a course of study with a view to qualifying himself for higher positions in his profession. A large number of friends were at the station to see them off and wish them God speed.

Mr. Cole did excellent work in the public school, was an exemplary citizen and his presence will be missed. He was a member of the Deseronto Cricket club and always took a warm interest in our door sports. He was a faithful and active member of the Methodist church and a very capable teacher in the Sunday school.

Shiloh's Cure, the great Cough and Croup Cure, is in great demand. Pocket size contains twenty-five doses only 25c. Children love it. Sold by W. G. Egar.

A BORN STORY.

The Little Adventure of a Small Boy, a Bear Cub and a Bag of Chestnuts.

Grunt! grunt! grunt! That was nothing to alarm a boy of eleven, and the half-wild pig that swarmed the woods were dangerous animals if one of their number happened to give out a signal of distress. They were all in a good humor now, for the season was thick with crop on the ground.

A plentiful crop of chestnuts caused much rejoicing in the boy's house. He had come a long way into the woods so that he might be beyond the reach of general competition, and the chestnuts were plentiful. He was out for the profit and consequently he had to be on his guard.

He was out for the profit and consequently he had to be on his guard. He was out for the profit and consequently he had to be on his guard. He was out for the profit and consequently he had to be on his guard.

A VICTIM OF FORTUNE.

A New Explanation of the Strange Tragedy in Tipperary.

An Irish correspondent of the London Spectator writes to inform the readers of that paper that the English papers seemed to have missed the real point of that horrible chapter in the history of superstition—the murder of Mrs. Cleary by the County of Tipperary. She did not fall a victim to the belief in witchcraft or in demoniacal influence, but she was really held in Ireland. She perished owing to the belief in the fairies, a belief to this hour generally prevalent throughout the whole of Munster, and Tam, too, also in the North and West. A prominent member of the believers in the fairies and their powers is the superstitious "the changing" spinner, in the "Fair Quen," writes:

From thence a Fairy the unwearied raft, There as thou slept in tender swaddling band, And as the breeze broods there for thee left; Such, men do change call, so change'd by fairies theft.

In Munster, when a child appears delicate, or a young woman consumptive or hysterical, the conclusion often is that the child or the woman has been carried off by the fairies to be made a playmate or nurse to the countess of a fairy, and the substitute resembling the person taken away is deposited in its place which gradually declines and ultimately dies. The belief that if the changing be tortured by fire the fairies will bear his cries, rush to his aid, carry it back to fairyland, and at last restore him to his real person, who will be found doing calmly in bed.

Cleary and "the neighbors" evidently believed that the being they tortured was not a child, but a changeling. As addressed her: "In the name of God, are you Bridget Boland?" (her maiden name) believing that this adjusted the being was a fairy. He said to her: "You will soon see my wife come down the chimney," believing that the fairies would snatch away the tortured fairy and restore his real person, who will be found doing calmly in bed.

TO THOSE WHO BATHE

NO SPORT IS MORE DANGEROUS THAN SWIMMING.

If You Use Proper Caution, No Exercise is Safer—Take Nothing for Granted—Never Get Frigthened in the Water—Advice to Bathers.

It is just as dangerous to play with water as it is to play with fire. Probably no sport is so dangerous than swimming, just as none is other than swimming. If you use proper caution no exercise is safer than swimming.

But what is proper caution? It is almost impossible to learn how to swim by reading any amount of printed instructions, but it is possible to learn how to take care of one's self in the water. One of the best swimming teachers I ever knew summed it all up in these words: "Don't be rash. Don't be frightened."

Do you think it childish to be cautious? Put away the idea. The bravest men are nearly always the most careful.

No matter how well you think you know a swimming place, take nothing for granted. So many changes take place in a "swim" that bather are often surprised. If you dive from a pier, how can you know without actually investigating what the water is like? That you can't see the bottom of the water is a fact, and as far as swimming in strange water, never do it without learning all you can about the conditions.

Diving is certainly the best way for you to enter the water—always provided that you know what you are doing. Diving can be more unhealthful than the dawdling habit of wading out ankle-deep or knee-deep, and waiting to get your coat and hat on. The last one is a very dangerous habit, and you are in the cold water whose temperature is anywhere from ten to twenty degrees lower than that of the air.

You can't remain on under these conditions without injuring yourself. Nature's plan is to have the head cool and the extremities warm. Go contrary to this, and you are in trouble. Deranged circulation causes cramps. In places where it is not safe to dive, you can stand over and throw a handful of water on your head. Then hurry forward and throw yourself in—fall in. Will other fellows laugh at you? Well, let them laugh, and pay for it with the twinges of cramps. I have been swimming twenty years, and I've never had a cramp, but I've followed the rules laid down here.

Never let yourself be frightened in the water. A boy found himself far outside of the breakers one day. He was deep—thick, with his feet far below him—and found that in spite of his efforts he was making no headway, or very little. Instead of being frightened, he kept on to work. He soon found that the off shore current was below the surface, and that at the very top of the water the flow was towards the shore. He kept on, and his legs, swam as near the surface as he could, and he got the beach under his feet at last. Another boy was dragged far out by one of those deadly, swift, and current that pounce on bathers unaware. He waved his arm and shouted for help. When he saw the men on shore running towards him, he kept on, and he got the beach under his feet at last.

He waved his arm and shouted for help. When he saw the men on shore running towards him, he kept on, and he got the beach under his feet at last. Another boy was dragged far out by one of those deadly, swift, and current that pounce on bathers unaware. He waved his arm and shouted for help. When he saw the men on shore running towards him, he kept on, and he got the beach under his feet at last.

"The Triumph of Love IS HAPPY AITHFUL MARRIAGE."

EVERY MAN WHO WOULD KNOW THE GRAND TRUTHS, THE PLAIN FACTS; THE NEW DISCOVERIES OF MEDICAL SCIENCE AS APPLIED TO MARRIAGE, WOULD WOULD ATTEND FOR FINE PROOF AND AVOID FUTURE PAINFUL, SHOULD BECOME THE WISHER OF LITTLE BOY CALLED "CUPID'S PSYCHIC" AND HOW TO OBTAIN IT.

"Here at last is information from a high medical source that must work wonders with this generation of men."

The book fully describes a method by which to attain full vigor and manly power. A method by which to end all unsatisfactory drudges on the system.

To cure nervousness, lack of self control, despondency, etc.

To exchange a jaded and worn nature for one of brightness, buoyancy and power.

To cure forever effects of excess, overwork, worry, etc.

To give full strength, development and tone to every portion of the organs of the body.

Age no barrier! Failure impossible! 2,000 references.

The book is purely medical and scientific, written by a physician, available to men only who need it.

A despondent man, who applied to us soon after wrote:

"Well, I tell you that first day is one I'll never forget. I just bubbled with joy. I wanted to hug every body and tell them all I had had yesterday and my new self was born to day. Why didn't you tell me when I first wrote that I would have it this way?"

And another thus:

"If you dumped a cartload of gold at my feet it would not bring such gladness into my life as your method has done."

Write to THE ERIC MEDICAL COMPANY, Buffalo, N. Y., and ask for the little book called "CUPID'S PSYCHIC." Refer to this paper and the company will send the book, in sealed envelope, without any marks, and entirely free, until it is well introduced.

NEWS OF THE DAY.

Archbishop Langevin will visit Rome. The barley harvest has commenced in Manitoba.

Wong Kee, a Montreal Chinaman, was murdered. Collingwood's new waterworks extension is completed.

A son of Mr. W. M. Craig of Bond Head was killed by a horse on the 19th inst.

The schooner M. A. Hall of Port Dover was lost a short distance out from Goderich.

Warrants for the arrest of Union Bank directors of Newfoundland have been issued.

A dividend of 37 per cent. will be paid to the creditors of the Manitoba Commercial Bank.

The Hudson Bay Railway subsidy bill has been passed by Parliament in a modified form.

The funeral procession of M. St. Aniloff was interrupted at St. John's and scenes of disorder accompanied the interment.

Canadian securities were dull and lower nearly all of last week, but closed with slight recovery in some prices. Higher prices are looked for the coming week.

Fighting of a very determined character is reported from Cuba, where the insurgents compelled a force of Spanish troops commanded by General Camacho to retreat.

At Niagara, Mr. Frank Rogers tried to frighten Italian fishermen by playing a ghost, and was fatally stabbed with the plotfork with which the Italian was working.

The wheat markets continue to fluctuate, as they are likely to do for some time, under the influence of crop reports, and on Saturday in Chicago September closed one cent higher.

The anniversary of the declaration of war with France was celebrated in London at Berlin University, and many of the various battles will be celebrated throughout Germany.

Mrs. Graham of Clinton street, Buffalo, fell over the bank of the Niagara River, and a point nearly in front of the Clinton House, she lodged on a pile of rubbish 50 feet below, and was rescued. Her injuries are painful, but not fatal.

LADIES OF DESERONTO.

An anonymous giver has given \$250 to Ontario diocese—\$150 towards the widow and orphan fund and \$100 for North Hastings mission.

S. E. Emerson, of Thurlow, shows cuts that are yet green and measure exactly four feet in height. The heads are very large, and a whole field will average as well.

A. Fairchild, between Kingston and Bath, occupied a house which was built by his great grandfather and is now one of the best built houses in Brudenburgh. It is 100 years old.

FRIDAY HALF HOLIDAY.

In all well regulated business establishments it behooves an employer to be reasonable and just in his 49 days in return they will be faithful to their employer.

Not only is this mutual benefit true on principle but it is exacted between a man's conscience and his God and so strongly do we feel on this question that we would be glad to have the power of the pulpit assist these merchants who are willing to close their places of business on Friday afternoon in order to give their clerks a little fresh air once a week during the hot weather months.

Though the cheap clothier, does not profess to be a paragon in this respect, but his clerks will tell him out in the streets that he never yet has he thrown an obstacle in the way of their early closing movements.

And on the other hand given every encouragement and although we regret to see opponents keep open, our establishment will be closed tight every Friday at 12 o'clock upon until the 1st of September. We appeal to the public to support the firm which does such a large volume of business.

Jobbing trade on that afternoon, but we submit that even he would not advance beyond the point of view with the rest of us.

Experience teaches that if you take the view of a man by too long hours you do not get the best results from his labor any more than you do by overtaxing machinery of overworking a horse, and sooner or later you use them up.

Therefore, when Mr. Gough says to the clerks of the city of Belleville that he is in hearty accord with their most reasonable half holiday movement, he takes no credit to himself because he believes he is furthering the interests of his employees, and again we say count on us giving the Friday half holiday, and we trust our clerks will tell him out in the streets that they never yet have he thrown an obstacle in the way of their early closing movements.

And on the other hand given every encouragement and although we regret to see opponents keep open, our establishment will be closed tight every Friday at 12 o'clock upon until the 1st of September. We appeal to the public to support the firm which does such a large volume of business.

A CLEVER CAPTURE.

Chief Gungy has won for himself great credit and undoubted fame by his clever capture of two men alleged to be professional pickpockets and rascals of continental fame. It appears that Frank Bishop, a mill builder of Campbellton, N. B., was on his way home from the Western States where he had been working for several years. As the Grand Trunk train was approaching Belleville on Saturday a stranger who had been in conversation with him asked him to change or lead some money. Bishop, who had been several days and nights on the train was tired and sleepy, and he pulled out a wad of bills. The stranger snatched it and ran off. Bishop followed but the thief eluded him. Bishop went to the station and a constable supplied him with a bat carried in his grip. Another train on the track prevented Bishop from following up the thief, who quickly made his escape. Bishop went into the city and interviewed the police. He was a stranger and naturally expected protection and assistance. He would have been a victim of the street if it had not been for the quick action of the police. The Belleville police displayed masterly and efficient activity. Certainly they made a diligent and earnest effort to capture the criminal. The man made his way to the Elia Ross. Had the Belleville police informed Chief Gungy they would have caught the thief at the station in the steamer in Deseronto. Bishop despairing of help in Belleville took the train going east in the evening. John McLaughlin was on his way home and hearing his story, told him to come to Deseronto where he would find a man to take up the case. As the sequel of the case was that Bishop came into town and informed Chief Gungy who at once proceeded to take action. Returning now to the suspects they bearded the Elia Ross. On the way down Miss Susan Johnston, of Chicago, was deprived of her purse containing some money and two railway tickets. It was observable that the two strangers were very sympathetic and kind in expressing their concern. One of them, Gungy, told the other to change four tens, new bills such as Bishop had, which was done. They asked to be recommended to the best hotel. He reached Elia Ross. Chief Gungy communicated with Capt. Christie and Parker Butler and was convinced that his men were in Elia Ross. Bishop appeared at first to consider it useless to go further. However on the Chief's recommendation he decided to make another effort and both set off at 10:45 p. m. Alf Woodcock driving. Fishon was reached and the hotels searched but they could not be found. The proprietor of the Townmouth refused admittance as such a late hour, thinking that they were burglars. He afterwards sent a letter of apology to Chief Gungy. The two were however at this hotel where they registered as J. G. Gardiner, of Chicago, and B. G. G. Gardiner, of Chicago. In the morning Chief Gungy and Bishop drove down to the Elia Ross which leaves at 5 to catch the North King. A few minutes before the hour for starting, a man was seen to leave the Townmouth house and coming down jumped on the steps of the Elia Ross. He was immediately after by another, whom Bishop pointed out as the man who had robbed him, telling the Chief that if he captured that man his money, \$75, would be secure. When he came down the Chief arrested Gordon or Gardiner. Gillard was on the boat and the Chief now proceeded to arrest him. Jumping aboard Chief Gungy told the Captain of his mate that there was a man he wanted to arrest, but the officers of the steamer refused to wait a minute, an act of disobedience which is rather surprising. The Chief having to look after the other prisoner, had to jump off the Elia, first telling a young farmer who was a passenger to keep an eye on the other. He was caught by the Chief. Taking Gordon into the rig, which was at the dock, the Chief told Woodcock to drive to Elia Ross, which was done in great time as he reached there almost as soon as the Elia. Here Gillard was arrested. He was very indignant and told the Chief of his rich connections in Belleville, that he had been the 1st of the 72nd of being detained on such a charge, that he must not miss the boat. The Chief told him he might miss the second boat and asked him to open his satchel which he did though no money was found of importance. Now, said Gillard, you see I am innocent, but the Chief was suspicious and did not see it that way, and told him that he had said too much and he must come to Elia Ross where he could prove his innocence by telegram. With his slick tongue Gillard won the sympathy of the other passengers on the boat, and he began to speak. Accordingly they were brought to Elia, both being first searched, when the sum of \$115 was found on Gordon and \$71 on Gillard. After a short stay for breakfast the Chief and his men came to Deseronto, the two prisoners being placed in the lock-up. On Monday morning they were taken to Belleville on the Elia Ross where they will stay for trial to-day. It appears the several women on the same train lost their purses. Chief Gungy has come in for praise from the authorities and the public generally. His prompt, prudent conduct throughout the whole proceedings could not be surpassed by any detective officer.

BARNUM & BAILEY'S CIRCUS.

In order to allow all an opportunity of attending Barnum & Bailey's circus in Belleville, the circus will carry an excursion from Elia Ross, calling at Deseronto and Northport, on Saturday, July 27, leaving Elia Ross at 10:30 a. m., and returning to Elia Ross at 10:30 p. m. The excursion will leave Belleville at 6:30 p. m. Fare for the round trip, 25 cts.

FAMOUS VOICES.

Forrest had a deep bass voice that seemed to come from the bottom of his chest. Bunyan had what was called a persuasive voice. He never scolded in his sermons.

Jeremy Taylor was always very much in earnest, and showed the fact in his voice. Lord Bacon had a voice described by one of his contemporaries as "very smooth and oily."

Henry VII. had a voice so gruff that it earned for him the sobriquet of "Bluff King Hal."

Garrick had an exceedingly flexible voice and could mimic anyone he ever heard speak.

The Duke of Marlborough had a voice that, if it could be heard above the roar of artillery.

Jonathan Edwards had sharp strident tones that grated unpleasantly on the ear of all who heard him.

Old Kaiser Wilhelm had a soft voice, and spoke in a soothing tone that gave pleasure to every hearer.

Rignold was known as the "silver-voiced." His tones were not strong were exceedingly pure and sweet.

Still Holds Good.

We said that we could make you a summer suit quickly and satisfactorily, and the statement still holds good. We said that our price would be lower than any in town, and the statement still holds good. We said that our price would be lower than any in town, and the statement still holds good. We said that our price would be lower than any in town, and the statement still holds good. We said that our price would be lower than any in town, and the statement still holds good.

W. STODDART,

The popular Tailor, Deseronto, Main Street.

The City Grocery

Main St., Deseronto.

Honest Goods,
